

Oceanside Glass™ Exclusive Glass Families

Artique®

A scribed "antique" transparent glass family, alive with the surface striations characteristic of mouthblown sheet glass. Artique unites brilliant surface characteristics, delicate light refraction and subtle but definite background distortion. An Oceanside Glass exclusive.

[Image of 543-2A-F.]

Waterglass®

Transparent colors with a natural surface texture created by stretching the hot glass sheet while it is still in a pliable state. The result is gentle, rolling waves that resemble the surface of a lake or stream. An Oceanside Glass exclusive. *[Image of 423-1W-F.]*

Rough Rolled

Our "Rough Rolled" (RR) transparent products have a subtle, delicate texturing that gently mutes transmitted light and images. It's the look of a naturally "chilled" glass surface, like table-rolled glasses of years gone by. *[Image of 171RR-F.]*

Pearl Opal Art Mix

Stunning multi-color blends with the unmistakably luminescent Pearl glow that is further enhanced with the subtle Corsica texturing. An Oceanside Glass exclusive.

[Image of 6034-83CC-F.]

OpalArt™

Hypnotic OpalArt is created when disparate glasses are stirred together onto an opalescent base. The resulting broad swirls of color are as unique as they are magnificent. An Oceanside Glass exclusive. *[Image of OA-355-1S-F.]*

Spirit™

Sweeping comets of color on either a clear or Firelight base creates a distinct, mouth-blown look. An Oceanside Glass exclusive. *[Image of Spirit-4361-76S-F.]*

Baroque™

A "reamy" glass, produced by combining glasses of mis-matched compositions. The different glasses "oppose" each other when they are stirred together, creating artistic 3-D swirls. An Oceanside Glass exclusive. *Baroque is NON-FUSIBLE. [Image of BR-308.]*

Note On Image Accuracy

While glass is notoriously difficult to capture well in a photograph, we've taken great care to present our glass as true-to-life as possible. Since computer monitors and printers vary widely, and may not reliably portray the glass or its color, you may want to consider purchasing a Sample Set for selecting just the right glass for your projects.
