

## Which Model of THE GRINDER Should I Choose?

Buying a glass grinder is a big decision for any new or experienced artist. Size, price, features, accessories, and quality all have to be considered. The good news is that Techniglass makes three different models of THE GRINDER that fit different needs. Whether you're just dipping your toe into the world of glass art, or have a thriving studio, there's a model of THE GRINDER that's right for you!

All models of THE GRINDER come with the Aqua Flow<sup>®</sup> System, a Quick-Fit Bit<sup>®</sup>, the Everwear Bit Guard, an accessory drawer, and a splash curtain.

The best model of THE GRINDER for each artist depends on their needs:

- **THE GRINDER:** Ideal for professionals or those who want top-tier performance. It offers worldwide compatibility, a powerful solid-state motor, an LED light, and the largest grinding surface.
- **THE GRINDER 2:** A compact, customizable, "build-as-you-go" model. It's great for those who prefer flexibility in their setup and want to be able to upgrade in the future.
- **THE GRINDER 3:** Designed for beginners and classroom use, this model features a sleek, simple design and a quiet yet powerful 4000 RPM motor.

If you want the most **powerful and feature-rich** option, go with **THE GRINDER**. It has the largest work surface and comes with the LED LumiShield, a larger splash curtain, and is compatible with the Mini G Bit System.

If you prefer a **compact, customizable** setup, **THE GRINDER 2** is a great choice. It has a smaller work

surface, but the same powerful, quiet motor as THE GRINDER. This model is upgradable with a larger splash guard, the LumiShield LED light, and the Mini G Bit System, so it can grow alongside your skills or studio.

If you're a **beginner or need a classroom-friendly** option, **THE GRINDER 3** is ideal. It's our most compact model, but it still has a powerful, quiet motor. You can upgrade THE GRINDER 3 with an eye shield or THE SET, but it is not compatible with the Mini G Bit System.
