E	613-D	613-L	W0-613	—	Williamsburg blue/opal and/or crystal
I	—	—	—	831-LL	Red/yellow streaky

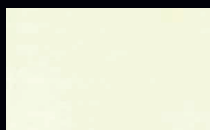

1. Every effort has been made to accurately reproduce the glass colors of the images on the following pages. However, some colors are more difficult to photograph than others. We encourage you to refer to your Wissmach sample set when an exact match is needed for your project.
2. Please refer to our website at www.wissmachglass.com for the firing schedule for fusing and slumping Wissmach Glass. Contact us directly if you have any technical questions with fusing and slumping Wissmach 90 and Wissmach 96.
3. All traditional Wissmach Glass is available with the Iridescent finish and all Wissmach 90 and Wissmach 96 is available with the Luminescent coating. Contact your wholesale distributor, retail shop, or contact us directly at the factory for current availability of colors.
4. The glass images shown on the following pages represent only a small amount of our entire glass line. Please let us know if you need for us to send you an actual glass sample for any of the missing images.
5. Color numbers 6 and X6 and all colors in price code J are subject to a possible surcharge depending upon the market price for gold at the time of production.
6. This color chart and product list does not include Wissmach 90 and Wissmach 96. Because we are continuously updating our fusing products, we have a separate product list for these items. Please ask us for an updated product list for our fusing line of products.
