

PVC-U sustainability

Our sustainable commitment

Leading the environmental revolution in Building Plastics towards more sustainable buildings. Sustainability is the biggest single issue facing the construction industry today.

The Government has set tough carbon emissions reduction targets for the sector, through stricter Building Regulations and the Code for Sustainable Homes.

As a result, all new-build homes and commercial buildings will need to be 'carbon zero' by 2016 and 2018 respectively.

Environmental policy sets tough targets

Our own environmental policy commits us to ongoing improvements that will help to reduce carbon emissions from transport and energy use, improve energy efficiency within our business and offer more energy-efficient products to you and your customers, as well as further reducing waste and promoting recycling throughout our operations.

Sustainable roofline

All Deeplas roofline products are 100% lead-free, calcium organic and manufactured to ISO 14001 standards.
