Harbour of tranquility

# Harbour soft

Creating an environment  
designed to work for you.

# Harbour soft

## Hub

Collaborate, work or socialize.

Collaborative and individual work, without distractions, is demanded by the modern day office environment.

Hub comprises of low-level open seating spaces available in Solo, Duo and Team size options. Hub works with your existing open plan feel, whilst the acoustic panels ensure users gain increased privacy.

As a modular system, you can personalize your own space to suit your needs with options to include integrated power and data sources as well as several stylish sofa and table options.

Additionally the space can be fully enabled with integrated technology features including multi-touch display screens and utilization sensors to accurately record the use of your space.

# Harbour soft

## Booth

Break away from the norm.

A room within a room, the open-fronted booth has no door allowing this semi-private space to be used for multiple purposes from impromptu meetings to informal breakout sessions.

With its distinctive and functional louver ceiling design, this unique Booth allows your fire sprinklers to filter through, meaning no additional test requirements are needed.

Booth comes in Duo and Team size variations. Integrated audio, video and multimedia options, along with LED ceiling lighting, allow you to create the optimum solution for your needs.

# Harbour soft

## Pod

### Meeting your needs.

Formal meetings are essential, however at times difficult to bear. The Pod has features that can create a more comfortable, private experience. From an air circulation fan to a sliding door and glazed panels the Pod stays light, airy and fresh.

The Harbour Soft Pod is a fully enclosed space for complete privacy and is available in both Duo and Team sizes.

Pod comes with an option to have a multi-touch surface table and a user interface which monitors lighting, air circulation and allocated time. With further integrated technology features available, the Pod works around you and your meeting.

## Phone Booth

Privacy can be difficult to find in a modern open plan office.

Providing a peaceful environment for phone calls, video conferences and a silent retreat for uninterrupted work, the Harbour Phone Booth is designed with your office in mind.

Equipped with top of the range acoustically absorbent materials, ambient lighting and an air circulation fan, the space is practical and private yet comfortable with the option to stand or sit.

Unlike other systems the Phone Booth has no base and stands directly on the floor of your office, making it safe, quick to install and easy to relocate.

# Acoustics

## Acoustic control for peace and privacy.

Harbour provides the perfect space for important meetings, phone calls, informal breakout and collaborative work.

The acoustically absorbent multi-layer panel system results in an increase in speech privacy by reducing excessive reverberation within the space. The hard surface on the panel exterior combined with the 2.5mm rubber layer helps block the transmission of unwanted sound from the outside.

The combination of both absorption and blocking results in a much more comfortable working environment.

# Sustainability

Office Reality are committed to protecting the environment and always aim to use manufacture and use products using only recyclable and sustainable materials.

Office Reality supplier of Harbour are FSC accredited, this means all our wood products come from well managed and audited sources to ensure sustainability.
