LIVING WATER

»*Water gardens – an experience for all.*«

OASE – PASSIONATE ABOUT WATER.

»*Water gardens – fascinating day in, day out.*«

Water is a fascinating element that makes the garden an inviting place for natural relaxation and pleasure. With OASE, the premium brand for water garden products, you can plan and design your water garden with ease, just the way you want it, down to every last detail. Let your ideas flow, with our new catalogue offering plenty of inspiration.

*Welcome
    to the world of OASE.*

Introduction

OASE – PASSIONATE ABOUT WATER.

Thomas Ferchland | Managing Director Customer Business

Dear OASE customers,

A water garden is a natural treasure, where you can relax and unwind whether you are an enthusiastic hobbyist or simply a passer-by, anywhere in the world. Your desires and needs are an inexhaustible source of inspiration for us, and they are the motivation to continuously develop new products, in order to make the water garden an ever-fascinating experience.

With OASE you have a leading international partner at your side that with innovation and quality »Made in Germany« sets convincing standards. In addition to state-of-the-art technology, ergonomic design,

high-quality workmanship and intelligent detail solutions, we focus on environmental awareness, efficiency and sustainability.

Dive into the fascinating world of the garden pond. You will see this year there are many exciting and inspiring innovations from OASE.

Sincerely, Thomas Ferchland

Inspiration
Passionate about water

A pond is full of life and transforms every garden into an oasis. Totally natural and totally individual.

Fantasy knows no limits ...

... and so are the design possibilities with OASE. The **extensive product line** of pumps, filters and light systems offers an optimal solution for virtually every garden and every requirement. Inversely, new possibilities, as well as an extensive line of accessories, inspire pond enthusiasts and all who want to become pond enthusiasts, to create the most beautiful water garden plans. From the small garden pond to the large swim pond, from the water feature to the waterfall, whether modern pond architecture or natural biotope – at OASE **quality** and **creativity** can be ideally combined.

Anyone who has experienced the world of OASE feels our great **passion for water,** and the commitment with which we fulfil the wishes of our customers. Creative and with an eye for detail, competent with a sense of uncompromising quality and intelligent solutions, we contribute to making your water garden into a very special nature experience for all.

Innovations
Research & development

There is a wealth of innovative power, know-how and experience behind the products from OASE: technology that fascinates all.

ON THE SURE ROAD TO SUCCESS

With all the naturalness of the pond experience, progress in the pond technology is also based on consistent research and development work. At OASE, year after year, with **know-how, experience and passion** engineers design exciting and innovative products that constantly extend the possibilities of water garden design. In this regard, all innovations run through a clearly structured process from the initial idea to series production maturity, that ensures a new product optimally fulfils all requirements.

There are good reasons for the unusually high quality of the OASE products. Prior to market launch all new developments are subjected to function and endurance tests under practical conditions. Thus, our customers have the certainty that at OASE they can rely on the highest **level of safety, environmentally friendly,** and the longest service life. So that they can enjoy undisturbed satisfaction with the water garden experience in all seasons.

Nature and technology in perfect harmony

Environmental awareness and sustainability are particularly important for the technology associated with the water garden. Therefore, the **new generation** of the OASE Eco product series represents an important milestone for OASE products. For example, pumps and UVC clarifiers with even higher capacity require less energy, allowing OASE customers to receive a great investment. You are not only protecting the environment, but you also save yourself energy costs (see page 256–257).

However, OASE is also pursuing new paths in terms of operating convenience, like the development of using remote control technology via the smart phone app, for example. With the new **WLAN-based technology** it is now possible to even more conveniently and precisely control the flow rates for the new OASE fountain and watercourse pumps and adapt the capacity of the devices to seasonal requirements. As stated: Nature and technology in perfect harmony.

Quality

Oase

TRUST OUR COMMITTED EXPERTS

The experience and the **know-how of the OASE experts** has been growing and growing for more than 60 years. Thus, today you can rely on unique competence and extensive knowledge that is not found anywhere else. Our specialists cover all areas of pond technology: from mechanical engineering and material engineering to electrical engineering and software development, extending to water biology and landscaping. This unique versatility is the basis for our distinctively broad assortment and the high quality of the OASE products.

You can experience the quality of OASE products again and again every day. They are your guarantee for undisturbed garden pond experiences, thanks to **high performance, long service life and reliability.** Whether pumps, filters, lights, control systems, software applications or matched accessories, extending to special pond liner – OASE always offers you the latest state of technology and many innovations that will be a source of pleasure to you for many years.

Service

Market orientation & customer orientation

Our goal is to fulfil the dreams of our customers. And at the same time, bringing them new exciting ideas.

Additional information in the **OASE app**
Available in the Apple Store & Google Play Store

A PARTNER FOR UNFORGETTABLE POND EXPERIENCES

At OASE we are here for you, for all things involving garden ponds. From initial planning, to construction and installation, to care of your garden pond, in every phase you can benefit from the special knowledge of the OASE experts and the OASE service concept. We constantly provide new impetus on the international market and offer a variety of attractive services, such as the **OASE Extension Guarantee or Clear Water Guarantee,** our **Internet newsletter, OASE-TV,** the **Online Laboratory for Water Quality** or the **OASE Hotline** and our mobile information offering via the **OASE app.**

However, for us market orientation also means staying a step ahead of the current trends in garden design and landscaping, and in technology and lifestyle, in order to offer our customers individual and sustainable solutions. This includes **contemporary operating convenience** through our intelligent control systems via the smart phone app, as well as further development of the **sustainability** and **energy-efficiency** of the OASE products.

Fountains & Fountain Pumps

Fountains:
As individual as you want!

Whether a gentle waterfall or a dynamic jet: Moving water fascinates just about everyone. Discover the versatile possibilities for staging your garden or your pond with fountains from OASE.
Where moving water creates a special ambiance, your garden becomes a completely new experience. A relaxing atmosphere

can be created by the soft bubbling from your ornamental water feature. A bubbling foam fountain is a good fit in a modern garden. And those who prefer things a little splashier select a larger fountain. The new, floating PondJet Eco offers a downright imposing fountain at 3 m in height and width. Extremely energy-efficient and with

*»Experience water
with all senses!«*

**The PondJet Eco
water show.**

Impressive, flexible,
easy and energy-
efficient!

innovative dynamic function it is perfect for small show interludes. Regardless of your preferences, OASE offers you the right products, guaranteed. Even in a garden without a pond, on the terrace or balcony water features in a gravel bed or a planter box are real eye-catchers. And if atmospheric lighting is added, summer evenings become unforgettable moments. Our Water Entertainment products are a special enhancement for your garden. Thanks to the »Plug'n Spray« principle, installation is fast so that there is more time for enjoyment. Experience all moving possibilities on the pages that follow.

Waterfalls of stainless steel: Stylish, expressive, timelessly beautiful!

An absolute eyecatcher for your garden, the terrace or your pond – the design objects from OASE. The complete Waterfall Set 30 is ideal for uncomplicated and fast installation at the edge of the pond, in gravel or in a suitable planter box. Your waterfall becomes larger and wider with the Waterfall Set 60 Solo, which can be combined with an existing filter and watercourse pump or the AquaMax Eco Classic.

With OASE Waterfall 30 / 60 / 90 you can create your own very personal waterfall that can also be integrated in a wall design with wonderful simplicity. For this you require an additional pump, which your OASE stockist would be pleased to recommend to you. Brand new – now warming LED lights can also be integrated. Easily installed, the Waterfall Illumination makes every waterfall shine.

Advisor

ELEGANCE IN THE EVENING HOURS: With the Waterfall Illumination every waterfall is easily immersed in warm and pleasant light.

WATERFALLS

Tip!

For long-term satisfaction with the waterfall, clean the stainless steel surface regularly, so that calcium deposits and dirt do not build up.

WATERFALL 30/60/90 Recessed or bolted to the wall, with a width of 30/60/90 cm, graceful waterfalls can be created. You will find the matching pump AquaMax Eco for operating the waterfall, starting on page 68/70.

WATERFALL ILLUMINATION LED illumination for waterfalls in widths of 30 cm and 60 cm.

WATERFALL SET 30 The complete set incl. pump and hose in a modern stainless steel design has an outflow width of 30 cm. The two side fastening lugs make installation fast and easy – whether in a bed of gravel or at the edge of the pond. It is also easy to install as a standalone water feature in combination with a water reservoir and cover (see page 241).

WATERFALL SET 60 SOLO The elegant waterfall with a width of 60 cm (in the Set **without pump**).

This is how easy it is: Sample set up of a Waterfall Set 30

First provide an even and firm surface – a solid base, e.g. of concrete, that serves as the pedestal.

The Waterfall 30 is then placed on this straight slab: To do this simply fasten the two side fastening lugs with stainless steel screws.

For a perfectly aligned fountain, ensure that it is setup horizontally. Use a spirit level for this.

Now connect pump and hose. Then open the rear wall and fasten the hose. The hose is then routed out at the rear opening, and the pump is lowered into the water. That's it!

17

Extras

Application example: **Waterfall 60**

Top 3 product characteristics

- *Sophisticated and graceful waterfalls of high quality, non-rusting stainless steel*
- *Individual and easy installation possibilities in three widths*
- *Even and uniform water pattern to 1 m in height*

Recommendation
The correct selection of the pump with the matching water flow rate is particularly important for a uniform waterfall. (See table: Pump recommendation)

WATERFALL

Attractive waterfalls of stainless steel

- Compact and robust waterfall of high quality stainless steel 1.4401 (V4A)
- Easy installation as permanent built in unit or bolted onto the wall
- Individual design through 3 different widths: 30 cm, 60 cm or 90 cm
- Included in the scope of delivery: Each with threaded opening on both the rear and underside, stepped hose adapter (19, 25, 32, 38 mm) and a plug
- With extended outlet for convenient installation!

WATERFALL SET

Waterfall set in modern stainless steel design

- Waterfall stand in 30 cm or 60 cm width
- Two side fastening lugs enable easy attachment on a solid substrate (e.g. concrete slab) for use in the shallow water zone or at the edge of the pond. In addition, the Waterfall Set 60 Solo has a mounting base that ensures additional stability.
- An additional possibility is installation in combination with the OASE Water Reservoir and the corresponding cover (WR 60 for Waterfall Set 30 and WR 125 for Waterfall Set 60 Solo on page 241). Simply bolt onto the suitable reservoir cover and decorate with pebbles – that's it!
- Only Waterfall Set 30: Including pump 2500 l / h, as well as 3 m ¾" hose
- Easy maintenance thanks to removable back
- High-quality stainless steel quality: 1.4401 (V4A)

Waterfall **Set 60 Solo**

START

Stainless Steel Watercourses: Modern garden design with style!

Architectural gardens often take on totally new possibilities in water design: Modern and unconventional, they put shapes and materials in the centre of focus and allow a variety of creative ideas. With the stainless steel watercourse system you create individual watercourses in your garden. Consisting of six different elements, the system offers fast and easy installation – whether in conjunction with an architectural pool as the end point, or as self-supplying circuit with the aid of an underground water reservoir. Thanks to the high quality stainless steel, the entire system is low maintenance, has a long service life and also retains its beauty over the long term.

Advisor

STAINLESS STEEL WATERCOURSES

All you need to install your waterfall are the appropriate stainless steel elements, a suitable water reservoir with cover (see page 241), a pump (see page 48 – 51) and sufficient hose, as well as material to compact the substrate, because a horizontal installation is extremely important. The Lighting Set with the LunAqua Terra LED (see page 192) rounds out the design of the watercourse.

This is how easy it is: Sample setup: Stainless Steel Watercourses

Measure the area that you are considering and select the suitable watercourse elements.

After excavation, check whether the substrate is solid enough or still must be compacted.

Fleece additionally protects the excavated area against root penetration.

Ideally the water reservoir is placed at the head end of the start element, and it should be concealed, but accessible. The hoses are simply laid out in the gravel bed along the watercourse elements.

Place the elements upside down so that they match. Then the connecting strips are bonded on.

The stainless steel connecting element is placed on and connected with eight nuts and washer screws. Ideally with a second person – turn the bolted watercourse right-side up.

Now is the time to insert the LunAqua Terra LED, if you have planned for a lighting element. Connect the hoses and pump; place the pump in the water reservoir.

The horizontal alignment of the system is extremely important – ensure that you check whether the watercourse elements are horizontal, in both directions. Thereafter the edge design can be finished – that's it!

Creativity for terrace and garden: **Stainless steel watercourses**

Top 3 product characteristics
- *Modern, sophisticated design of high quality stainless steel elements*
- *Versatile combinations for individual design concepts*
- *Easy installation with ingenious connection technology*

Recommendation
For installation, first ensure that you have an even, compacted substrate and, if necessary, fill the excavated channel with sand.

Ensure horizontal installation and never fill with too much water, so that the system does not overflow.

Depending on the length of the watercourse and the desired quantity of water, the right selection of the pump (Aquarius Fountain Set, page 48–51) and of the appropriate water reservoir (page 241) are particularly important.

STAINLESS STEEL WATERCOURSES

High quality crafted elements for individual garden designs

START

- Modern garden design made easy: Design creative waterfalls with six stainless steel elements
- Unique connection technology for easy installation – thanks to a connection element incl. sealing strips and nuts
- Robust, high-quality stainless steel 1.4401 (V4A)
- Single elements can be individually combined
- Illumination element can be combined with the LunAqua Terra LED in ground light fixture (page 192)

LUNALED

Innovative illumination with modern LED technology

- Each has 6 or 9 cold-white LEDs
- Suitable for use underwater and above the water, e.g. for illumination of a bubbling stone
- Protection class IP 68
- High quality stainless steel cap, with which the water flow rate can be regulated
- Diameter 30 mm or 50 mm
- Half peak angle of the LED: 72°
- Incl. low volt plug transformer
- Easy installation via the innovative hose connector

PRODUCT DETAILS

Hose connectors
The innovative hose connector makes the installation easy. The power cable can be routed out through the opening and does not need to be threaded through the entire length of the hose.

Stainless steel cap
The high quality stainless steel cap enables fast adjustment of the water flow rate and protects the LED from damage.

LunaLed 6 s		LunaLed 9 s	
Height	l/min	Height	l/min
2 cm	3	2 cm	7
3.5 cm	5	3.5 cm	9
6 cm	6	6 cm	11
12 cm	8	12 cm	14

Amount of water required
The right pump is crucial for an appropriate fountain height; it is best to select the pump based on the water flow rate. Do not forget that hose length and diameter also play a role.

Extras

Top 3 product characteristics
- High quality stainless steel cap
- Easy installation via hose connectors, ideal for bubbling stones
- Adjustable water feature height

Recommendation
Be creative – combine multiple LunaLeds using the OASE multiple distributor (page 230) and design your custom fountain.

Water Entertainment:
So beautiful, and so easy to install!

Illuminated water jets that appear out of nowhere, luminous, leaping fountains with ever changing patterns: These are the entertainment artists in the residential garden. The fountains are incredibly easy to install. You can make your garden into a stage in no time.

For some products the composition can vary entirely in accordance with your desires thanks to convenient, versatile adjustment possibilities via remote control. And you do not even need a pond to install a Water Entertainment product. Depending on the fountain, a discrete architectural pool or a water reservoir with a cover and gravel are fully sufficient.

Advisor

REMOTE CONTROL enables easy and convenient selection of the various permanently stored programs. In addition all Water Entertainment products are characterised by easy installation — »Plug'n Spray«.

WATER ENTERTAINMENT

INDIVIDUAL

WATER QUINTET CREATIVE Give your fantasy free rein with this individually configurable fountain. The five individual pumps can be setup or suspended in a wide variety of configurations. They are individually activated and illuminated. The stored programs in which fountain height and light intensity vary can be selected by remote control.

HIGH ABOVE

WATER TRIO / QUINTET These water effects with three or five individually adjustable nozzles satisfy the most demanding requirements. Fountain heights between 30 and 140 cm are adjustable per remote control via selection of the permanently set programs. The light intensity of the high-quality LED rings varies depending on fountain height.

RADIANT

WATER JET LIGHTNING The water jets glow in a wide variety of colours that can be changed with permanent programs. The jet length can vary, the random program »random play« shows all the settings in changing colours. Energy-efficient 12 V technology and fast installation are other standout features of this product.

FLOATING

WATER STARLET Floating on the water surface, or placed on the ground, this compact fountain is quickly installed. The five nozzles equipped with LED illuminated rings can be aligned individually and present different water patterns. The pumps and light elements run on energy-efficient 12 V technology.

Schematic diagram: **Water Starlet** in the garden pond

WATER STARLET

Compact and dynamic – the floating fountain with LED illumination

START

- Compact, floating fountain with 5 fountain nozzles
- »Plug'n Spray« principle enables easy installation
- Can be implemented as a floating unit or it can be setup on the ground
- Protected LED rings provide constant illumination of the water jets
- Different water patterns can be presented as a permanent program loop
- Safe, energy-efficient 12 V technology
- Can even be used in swim ponds
- Low maintenance requirements
- Included in the scope of delivery: Fountain (incl. 5 pumps, 5 illuminated rings, each with 6 LEDs), transformer and cable

PRODUCT DETAILS

LED illuminated nozzles
The five nozzles can be aligned individually and ensure a wide variety of water patterns.

Robust floor plate
The perforated floor plate provides optimal protection against fouling.

12 V transformer
Thanks to the energy efficient 12 V technology, the system is very safe.

Extras

Top 3 product characteristics
• Floating fountain complete set with LED lighting
• »Plug'n Spray« – principle for easy installation
• Can be used in swim ponds thanks to 12 V technology

Recommendation
Best light effects in the evening twilight.

This fountain can be used in many different environments – from the garden pond to the architectural pool.

Schematic diagram: **Water Trio** in a reservoir

WATER TRIO

Luminous fountains for modern garden design

PRO

- High quality water feature with three varying fountains, including LED lighting
- »Plug'n Spray« principle: Immediately ready for use and easy connection
- Variations in fountain height (30 – 140 cm) and light intensity can be played back in permanently set programs
- The programs can be conveniently selected via remote control from a distance of up to 80 m
- Can be connected to a timer
- Flexible setup on a wide variety of substrates
- Robust floor plate protects against damage
- Easy maintenance
- Low energy consumption
- Safe, energy-efficient 12 V technology
- Can be used in swim ponds
- Included in the scope of delivery: 3 pumps / nozzles, external control unit, transformer and cables

PRODUCT DETAILS

External control system
Compact and easy to conceal: The control unit can be easily connected and includes a transformer as well as a ground stake.

Illuminated nozzles
The individually controllable nozzles, each with 6 LEDs, are easy to align.

Height adjustable
The nozzles of the fountain are height adjustable, so that the water level can vary by 20 cm.

Remote control
The remote control unit included in the scope of delivery has a range of up to 80 m without obstruction.

Extras

Top 3 product characteristics

- Remote controlled water feature with varying fountains and white LED illumination
- Easy installation thanks to »Plug'n Spray«
- Can be used in swim ponds

Recommendation
Splash water can be minimised by selecting a pool with at least a 3 m diameter. The OASE water reservoir WR 100 can be extended with pond liner, for example.

Water Quintet

*More individuality and easy operation –
even from a distance*

- High-quality water feature with five varying fountains, including LED lighting
- »Plug'n Spray« principle: Immediately ready for use and easy connection
- Variations in fountain height (30 – 140 cm) and light intensity can be played back in permanently set programs
- The programs can be conveniently selected via remote control from a distance of up to 80 m
- Can be connected to a timer
- Flexible setup on a wide variety of substrates
- Robust floor plate protects against damage
- Easy maintenance
- Low energy consumption
- Safe, energy-efficient 12 V technology
- Can be used in swim ponds
- Included in the scope of delivery: 5 pumps / nozzles, external control unit, transformer and cables

PRO

32

PRODUCT DETAILS

External control system
Compact and easy to conceal: The control unit can be easily connected and includes a transformer as well as a ground stake.

Illuminated nozzles
The individually controllable nozzles, each with 6 LEDs, are easy to align.

Height adjustable
The nozzles of the fountain are height adjustable, so that the water level can vary by 20 cm.

### Remote control
The remote control unit included in the scope of delivery has a range of up to 80 m without obstruction.

Extras

Top 3 product characteristics
- Remote controlled water feature with varying fountains and white LED illumination
- Water patterns can be selected from the set programs
- Can be used in swim ponds

Recommendation
Splash water can be minimised by selecting a pool with at least a 3 m diameter. The OASE water reservoir WR 100 can be extended with pond liner, for example.

WATER QUINTET CREATIVE

The creative water effect: Flexible setup for individual requirements

PRO

- Completely individual fountain for flexible configurations: Vertical and suspended
- Variations in fountain height and light intensity can be played back in permanent programs
- The programs can be conveniently selected via remote control from a distance of up to 80 m
- Programs with alternating fountain heights (30 − 140 cm)
- Can be connected to a timer
- »Plug'n Spray« principle enables easy installation
- Easy maintenance
- Low energy consumption
- Safe, energy-efficient 12 V technology
- Can be used in swim ponds
- Included in the scope of delivery: 5 pumps / nozzles, external control unit, transformer and cables

PRODUCT DETAILS

External control system
Compact and easy to conceal: The control unit can be easily connected and includes a transformer as well as a ground stake.

Height adjustable
The nozzles of the fountain are height adjustable, so that the water level can vary by 20 cm.

Suspended mounting
The pumps can also be mounted, suspended from a suitable carrier plate.

Remote control
The remote control unit included in the scope of delivery has a range of up to 80 m without obstruction.

Extras

Top 3 product characteristics
- A fountain with white LED lighting that can be set up individually
- Permanently stored programs can be selected via remote control
- Can be used in swim ponds

Recommendation
The pumps can be setup in almost any desired configuration, e.g. in pebbles, in a straight line, or in a semicircle.

Other popular variants are the recessing in or placing under covers of any type. Then only the water jets are visible.

Schematic diagram: **Water Jet Lightning** in a garden pond

Water Jet Lightning

Coloured water jets – a special highlight,
even for small water surfaces

PRO

- Luminous, coloured, laminar water arches for a special charm in the garden
- Variations of jet lengths, jet height, and RGB colours are played back in programs
- The programs can be selected via remote control from a free distance of up to 80 m
- The water jet angle can be individually adjusted
- Your favourite colour of the water arch can be set easily
- High quality stainless steel base, can be bolted onto different substrates
- Maximum jet length 1.8 m, maximum jet height 0.9 m
- Can be connected to a timer
- »Plug'n Spray« principle enables easy installation
- Easy maintenance
- Low energy consumption
- Included in the scope of delivery: 2-unit set Water Jet Lightning, pump, external control unit, transformer and cable

PRODUCT DETAILS

External control system
Compact and easy to conceal: The control unit can be easily connected and includes a transformer as well as a ground stake.

High-quality materials
An appealing design – total Water Entertainment from OASE.

Remote control
The remote control unit included in the scope of delivery has a range of up to 80 m without obstruction.

Adjustable jet angle
Because the angle of the Water Jet Lightning units can be adjusted there are many variation possibilities.

Extras

Top 3 product characteristics
- The special feature in the garden: Coloured arching water jets
- »Plug'n Spray« principle: Complete set for easy connection
- Can be implemented in the swim pond

Recommendation
Enjoy the different colours of the luminous water jets at twilight. This is when they are most effective.

The fountain should be installed where it is protected from wind, so that the water arches maintain their perfect form. For maximum enjoyment, ensure good water quality.

JumpingJet Rainbow Star Set: Dramatic, coloured fountain

Whoever experiences the arcs that a Jumping-Jet Rainbow Star playfully forms out of water cannot resist the enchantment. The effects from the lights are fascinating. You get everything in a set that can be installed quickly and offers the possibility of extension.

Please note the following: For the JumpingJet Rainbow Star Set you require the powerful OASE Aquarius Universal 6000 pump. For conveniently switching the pump on and off we recommend the InScenio FM-Master 3 garden outlet. Then on the pump itself you can individually regulate jet length and height.

The JumpingJet Set can even be extended by an additional JumpingJet. The advantage of the Add-on Set: Another pump does not need to be connected in addition to the Aquarius Universal 6000. The system is easily connected via the existing control box (12 V Master) that already controls the first JumpingJet. The Add-on Set can easily be integrated – thanks to the included Y-distributor, the stainless steel hose clamps, as well as the suitable hoses.

Extras

»Rainbow Star Set« scope of delivery

- 1 x JumpingJet with solid stainless steel base
- 1 x control box (12 V Master) with
- 1 x wireless remote control
- 1 x black fabric hose; 4 m
- 2 x stainless steel hose clamps
- 1 x control cable
- 1 x power supply cable 12 V

»Add-on Set« scope of delivery

- 1 x JumpingJet with solid stainless steel base
- 1 x black fabric hose; 5 m
- 1x stainless steel hose clamps
- 1 x control cable
- 1 x power supply cable 12 V
- 1 x Y-distributor

System requirements

- For full use of the JumpingJet's impressive light and water effects, OASE recommends that the set be operated with clean or treated water if possible (without fish stock).

- Poor water quality can impair the clarity of the jet and increase maintenance.

- The set can be installed indoors as well as outdoors; if installed outdoors a position that is protected from wind should be selected.

- In colder months the JumpingJet must be stored where it is protected from frost.

Schematic diagram: **JumpingJet Rainbow Star Set** in a garden water feature

JUMPINGJET RAINBOW STAR

Dramatic, coloured water feature for a grand appearance

JumpingJet Rainbow Star Set

JumpingJet Rainbow Star Add-on Set

PRO

- Ready to connect complete set
- Variations of water effects and colours are played back in the programs, LED light intensity remains uniform
- The programs can be selected via remote control from a free distance of up to 80 m
- Jet lengths to 4 m and jet heights to 2 m can be controlled individually
- Can be installed indoors and outdoors
- Control box (12 V Master) additionally enables connection of a JumpingJet Rainbow Star Add-on Set
- Synchronous control through one remote control unit when connecting the Add-on Set
- Complete set includes: Jumping Jet, control box, remote control, as well as stainless steel hose clamps for fixing hoses in place and additional accessories

Add-on Set

- The Add-on Set can only be operated in addition to an existing JumpingJet Rainbow Star Set
- Connection is executed via an existing control box of a JumpingJet Rainbow Star Set
- Add-on set and JumpingJet Rainbow Star Set always run synchronously
- Consists of: JumpingJet Rainbow Star, hose, control cable, power supply cable and Y-distributor

PRODUCT DETAILS

Stainless steel base
In addition to the robust body in high-quality design, the solid stainless steel base ensures stability and enables individual adjustment of the jet angle.

Scope of delivery
The set includes a black fabric hose, 4 m in length, and two stainless steel hose clamps for easy installation.

Control box (12 V Master)
Easy installation and commissioning. Thanks to the remote control unit included in the scope of delivery, the permanently set programs can be conveniently selected. With the add on set connected both JumpingJets are controlled synchronously.

Programmed combinations
These consist of the colours, blue, red, white, green, cyan (light blue), magenta (purple), yellow, and the functions, jet chopper, continuous light and random programs in rainbow colours.

Extras

Top 3 product characteristics
- *Fountain with coloured LED lighting*
- *Programs with colour, light, and water effects can be conveniently selected by remote control*
- *An additional JumpingJet Rainbow Star can be connected to the set*

Recommendation
All you need to connect the JumpingJet Rainbow Star Sets is a fountain pump with a capacity of 6000 l/h. consequently our recommendation is the OASE Aquarius Universal 6000 fountain pump.

Fountain pumps: Impressive patterns

For fountains the water is delivered upward with full force – a characteristic that distinguishes the fountain pumps from the filter and watercourse pumps. This characteristic is easy to see from the smallest indoor fountains to the fountain in a palace garden. The models that can be remote controlled are sophisticated. The power and fountain height can be controlled from distances of up to 80 m. You can conveniently reduce splashing to enjoy a quieter evening. Starting on page 44 you will find an overview of the main characteristics of the OASE fountain pumps.

FOUNTAIN ATTACHMENTS determine the appearance of a water feature and set decorative accents. Not to mention the fact that they enrich the water with vital oxygen. For this OASE offers Schaumsprudler (foaming jets), bells, and different types of fountains with multiple jets and stages. An overview of the attachments for your individual fountain is provided on page 60.

Advisor

Fountain pumps

Statuary fountains & decorative fountains

Atmospheric splashing of decorative fountains and indoor fountains has a calming and relaxing effect. For smaller planter boxes you need a compact but powerful pump.

Waterfalls, bubbling stones & large decorative fountains

Bubbling stones have a natural and charming effect. Moss and lichens can grow on rough stone, which enhances the natural appearance.

Fountains

Fountains with one or more water jets are imposing and richly varied. For bigger heights and forceful spouting you require pumps with greater power.

Aquarius Universal 440i – 2000
High capacity for indoors and outdoors: Due to its minimal space requirements it is best for use in small bubbling stones, statuary fountains and decorative fountains. The water volume of these quiet pumps can be adjusted individually.

Aquarius Universal Eco 3000 – 40000
These premium products meet even the most rigorous requirements imposed by representative fountains. Water columns up to eleven metres in height are possible. The pumps are frost proof to −20 °C and thanks to the stainless steel filter basket they have a particularly long service life.

Aquarius Fountain Sets
The complete sets for fast installation and convenient operation. The fountain can be individually adjusted with telescopic nozzle extension and pivot head. It is available as a set including one or three nozzle attachments.

Tip!

A fountain without mains power: The Aquarius Solar Fountain Set can be used for fountains/ponds without power supply.
Additional information on this product is available on page 56 and the matching solar components are on page 212.

Aquarius Fountain Set (START)

Aquarius Fountain Set (PRO) Aquarius Solar

NEW

PondJet Eco

Application examples: **Aquarius Universal** pumps are ideal for small bubbling stones, statuary and decorative fountains

AQUARIUS UNIVERSAL

For statuary fountains & decorative fountains

START

- Ideal for continuous operation
- Can be used in shallow water
- Quiet running
- The entire product series offers thermal protection
- Easy adjustment of the flow rate

From Aquarius Universal 440
- Also suitable for outdoor use (except 440i)

From Aquarius Universal 600
- Can be setup underwater & dry

PRODUCT DETAILS

Flow rate adjustment
via the flow-through regulator of the Aquarius Universal 440.

Flow rate adjustment
*with the suction and regulating duct of the Aquarius Universal 600 – 2000.
This can also be used for dry installation.*

Aquarius Universal 440/440i – 2000

OASE-Pump performance curves – comparison see page 246–247

Extras

Top 3 product characteristics

- High performance, minimal space requirements
- Flat priming and extremely quiet
- Suitable indoors and outdoors

Recommendation
The small pumps are ideal for small bubbling stones, statuary fountains and decorative fountains of any type. Ability to be connected to optional »OASE LED lights« – they become the highlight in the evening garden (page 24).

For an attractive bubbling stone water pattern, for pump selection, calculate 0.5 – 1 l/min water per cm of stone diameter.

Accessories

LunaLed 6s/9s
Innovative illumination with modern LED technology. Ideal for bubbling stones, statuary fountains and decorative fountains of any type.

*1 Aquarius Universal 440i   *2 Aquarius Universal 600–2000

Application examples: **Aquarius Universal** pumps are outstanding for operating modern waterfalls

AQUARIUS UNIVERSAL

For waterfalls, bubbling stones & large decorative fountains

Aquarius Universal Eco 3000−12000

Aquarius Universal 21000−40000

PRO

- Undisturbed splashing water, thanks to extremely quiet operation
- Easy adjustment of the flow rate
- Integrated thermal protection
- Can be setup underwater & dry
- Energy efficient thanks to low energy consumption
- Frost proof to −20 °C
- High quality workmanship with stainless steel
- Priming even at low water levels
  (up to Aquarius Universal 12000)
- Removable base for installation where space is at a premium
  (up to Aquarius Universal 12000)

From Aquarius Universal 4000
- Electronic adjustment with the optional accessory InScenio FM-Master 3 for models 4000 to 12000 (page 211, except Eco 4000)

From Aquarius Universal 21000
- With adapter set for connection of different nozzles
- Ergonomic handle for easy transport and installation
- Long service life; high capacity
- Not available in the UK

PRODUCT DETAILS

Flow rate adjustment
Easy mechanical adjustment via the flow regulator of the Aquarius Universal Eco 3000/Eco 4000 and sizes 4000–12000.

Adapter Set
An adapter set for connecting different OASE fountain attachments is included in the scope of delivery of the Aquarius Universal 21000–40000 fountain pumps.
Extras

Top 3 product characteristics
- High performance, minimal space requirements
- Frost proof to –20 °C
- Electronic flow rate adjustment (starting with Aquarius Universal 4000)

Recommendation
»Aquarius Universal Pro series« fountain pumps are outstanding for operating modern stainless steel waterfalls (page 18).

With the OASE fountain attachments, different water patterns can be created to fit your taste. The fountain attachments can be staged in combination with the matching optional OASE illumination.

For an attractive bubbling stone water pattern, for pump selection, ideally calculate 0.5 – 1 l/min water per cm of stone diameter.

Aquarius Fountain Set

Fountain set for attractive water patterns

START

- Easy mechanical adjustment of the fountain height
- 3 fountain attachments for different water patterns included in the scope of delivery
- Telescopic pipe extension with integrated swivel head for individual alignment of the fountain
- Second, separately adjustable outlet (½" to 1")
- Base footings for stable positioning on the pond floor
- Integrated thermal protection

PRODUCT DETAILS

Second outlet
On the second separately adjustable outlet, a small watercourse or water spout can be connected. Suitable for ½" to 1" hoses.

Water patterns
Three different fountain attachments are included in the scope of delivery: Vulkan, Lava and Magma.

Extras

Top 3 product characteristics
- Easy installation
- Individual alignment of the fountain is possible
- Supplemental outlet for small watercourses or water spouts

AQUARIUS FOUNTAIN SET

*Fountain set with large filter surface*

PRO

- Unique fountain set with filter intake surface
- Effective, over-proportioned filter surface through side-mounted wings
- The detachable wings can be placed in the shallow bank area
- Mechanical adjustment and cleaning from the edge of the pond
- Electronic adjustment
- Telescopic pipe extension with integrated swivel head for individual alignment of the fountain
- Integrated spotlight holder (optional accessory: Spotlight LunAqua 3 Set 1, page 205)
- Base footings with slotted holes for stable positioning on the pond floor
- Integrated thermal protection
- Click closures for convenient mounting / dismounting
- Included in the scope of delivery: 1 fountain attachment (Vulkan) and an adapter for the filter wings

PRODUCT DETAILS

Filter wings
Easy to remove filter wings can be fitted on the adapters and positioned at the edge of the pond.

Flow regulator
Flow rate on the pump filter and fountain height can be adjusted from the pond edge via the regulator on the adapter.
Extras

Top 3 product characteristics
- Attractive fountain with large filter intake surface
- Removable filter wings for use in the bank area
- Operation and cleaning from the edge of the pond

AQUARIUS SOLAR

## *Fountain set for solar operation*

- Solar powered fountain set for locations without power supply
- Connection to the SolarModule 35 or to the optional OASE Solar-Safe 41 storage and control unit
- Easily removable filter wings can be placed directly at the edge of the pond
- Telescopic pipe extension with integrated swivel head for individual alignment of the fountain
- 3 fountain attachments included in the scope of delivery
- Click closures for convenient mounting / dismounting

PRODUCT DETAILS

Filter wings
Easy to remove filter wings can be fitted on the adapters and positioned at the edge of the pond.

Flow regulator
Flow rate on the pump filter and fountain height can be adjusted from the pond edge via the regulator on the adapter.
Extras

Top 3 product characteristics
- Flexible setup and operation with solar energy only
- Perfect solution for locations without power supply
- Removable filter wings, convenient adjustment and cleaning from the edge of the pond

Recommendation
The Aquarius Solar Set is part of the OASE solar system and should ideally be operated with the SolarModule 35 or the SolarSafe 41.

Application examples: **PondJet** with PondJet nozzle

PondJet with Vulkan 37−2.5 K and lighting set

PONDJET ECO

*Compact, floating fountain –
impressive and now extremely energy efficient!*

»Environmental Function Control«
*The pumps switch off automatically in the event of dry run and prevents
damage to the device.*

NEW

- Floating fountain for flexible installation in bodies of water with any type of floor conditions
- Ready to connect complete set, consists of: Pump, float body and multifunction nozzle
- Energy-efficient, thanks to new motor technology; energy savings up to 60 % compared with the previous model
- Alternating fountain heights can be individually switched with power consumption in-line with demand
- Also ideal for short term use, e.g. for events
- Towering water spectacle up to 3 meters in height and width
- Patented frost protection to −20 °C
- »Environmental Function Control« (EFC by OASE) protects against dry run and blocking
- Additional nozzle patterns and illumination set are available as accessories
- MADE IN GERMANY: Precise and reliable German engineering art at a high level of quality
PRODUCT DETAILS

PondJet nozzle
with 1" thread, cover plate and plug. The 1" thread allows 25 mm / 1" fountain attachments to be attached on the multifunction nozzle of the PondJet Eco.

Dynamic function
The dynamic function can be activated by a switch. Thus attractive water patterns with different fountain heights are produced. This function enables an average reduction in power consumption of 105 W.

Connection possibility
for the underwater transformer of the lighting set available as an accessory.

Accessories: Illumination set and fountain attachments
The optional LunAqua 10 spotlight set wonderfully illuminates water patterns. Additional fountain attachments.
Extras

Top 3 product characteristics
- Fountain pump that can be installed quickly and easily, thanks to the fountain aggregate with aeration effect
- New, low energy consumption motor technology offers significant power savings
- Switchable dynamic program for impressive fountains

Recommendation
Thanks to the fast and uncomplicated installation, the PondJet Eco is perfectly suited for short-term implementation, e.g. for events. With the dynamic function switched on, power consumption is up to 60 % lower than the rating of the predecessor model, thanks to the new motor technology.

Filter- & Watercourse pumps

Filter and Watercourse pumps:
FULL POWER AHEAD – IN EVERY BODY OF WATER

Waterfalls and watercourses are not only small natural spectacles – moving water can do much more. The advantages are endless with the ingenious pumps from OASE. Garden ponds are ideal habitats for a variety of plants and animals. Clear water is vital for these habitats, particularly due to the oxygen contained in the water. OASE pumps move all the water in the pond, and thus ensure the required oxygen supply. Watercourses and waterfalls that simultaneously give your pond a more natural feel also offer the best prerequisites for adding oxygen to the water. Consequently you should include them in your plans. The OASE filter and watercourse pumps feed the pond filters and supply them with water at the maximum level of efficiency in such a manner

»This is where you feel the power of water!«

Powerhouse AquaMax Eco Expert

The new generation now really saves a lot of energy!

that they are then cleaned, removing coarse debris and pathogens. With clever supplemental functions the OASE pumps, such as the new AquaMax Eco Expert, are genuine powerhouses. With minimal operating noise and equipped with a motor that is particularly economical, this pump can reliably displace large amounts of water. Thanks to the innovative »Seasonal Flow Control« tech-

nology, it and several other OASE pumps adapt the required flow rate to the water temperature. This energy efficiency pays off; saving you money. Your OASE stockist would be pleased to advise you, and has the right pump for you, wholly in accordance with your pond size and application. We present our pumps to you in the following chapter, with a complete overview on pages 66–67.

Additional information in the **OASE app**
Available in the Apple Store & Google Play Store

Filter and Watercourse pumps: A strong combination

A filter and watercourse pump must be designed in such a manner that it can pump a particularly high volume of water, plus the contaminants introduced into the pond through leaves, floating plants or animals, to a filter. The filter then takes over the cleaning of the water. The right selection of a powerful filter and pump combination is the key factor for the subsequent quality of water.

With the table on pages 66–67 you can select the right pump for your pond in a few steps. You will find the suitably matched filter, starting on page 84. OASE stockists would be pleased to help you select the filters as well as pumps that will supply your watercourse with the ideal water flow rate.

economical for you!«*

OASE products
with the Eco Leaf

OASE products stand for fascination and the satisfaction of the water garden. This satisfaction can even be increased with the good feeling that you are using an energy efficient product. This is indicated by the OASE Eco Leaf.

If you save power, you are not only doing something good for the environment, you also enjoy the tangible benefit of saving money. OASE designates products that offer an »outstanding energy balance« with the Eco Leaf. For even better energy efficiency, we award the Eco Plus symbol.

For example, the AquaMax Eco Premium is one of our most economical, and at the same time most effective products. It is one of our new generation of filter and watercourse pumps that bear the Eco Leaf and that consume up to 20 % less energy than their predecessors, as our tests substantiate. If environmentally conscious and sustainable behaviour is as natural for you as it is for us, look for the Eco Leaf. And save!

Learn more about the OASE Eco Offensive on pages 256 – 257.

Advisor

Filter and Watercourse Pumps

The classic in a totally new form

AquaMax ECO Classic The completely redesigned, reliable and energy-efficient classic is the ideal partner for entry into the garden pond. The pumps supply watercourses and waterfalls and deliver pond water that needs to be cleaned and coarse debris up to eight mm in size, into the filter. Thanks to the energy-efficient OASE motors all models from size 3500 are state of the art. Now brand new: The even more powerful AquaMax Eco Classic 17500.

The new original. As always. Just better.

AquaMax Eco Premium This clever further development of the filter and watercourse pump now saves even more energy, at the same flow rate. For more effective filter performance, filter accessories can be connected on its second, patented inlet, to simultaneously displace the water from multiple pond zones. At temperatures to −20 °C, the frost protection technology, which is also patented, guarantees safe protection against frost and damage.
For special cases

AquaMax Dry This particularly powerful filter and watercourse pump has been developed especially for dry setup. It is installed below the level of the water surface and is extremely quiet in operation.

Tip!

Easy, if you know how: The right combination of filter, pump and UVC clarifier for your garden pond or watercourse essentially depends on the size of the pond, i.e. water volume, and fish stock. Use the tables on page 88–89 to determine the suitable products for you, step by step. Your OASE stockist will also be pleased to help you with the selection.

Advisor

Filter and Watercourse Pumps

For convenient adjustment

AquaMax Eco Twin The delivery capacity of this unusually powerful pump series can be individually regulated with two motors – conveniently by remote control. Matched to the filter activity this can reduce power consumption. Here as well there is patented frost protection to −20 °C.

Incredible power with high energy-efficiency

AquaMax Eco Expert At last, this extremely powerful pump designed for the most rigorous requirements can also save significant amounts of energy, thanks to its new motor! It offers full power in two capacity levels – 21000 and 26000 litres per hour, nevertheless it is extremely quiet.

AquaMax Eco Control Discover the additional DMX-RDM control device, AquaMax Eco Control, with which you can conveniently read out and regulate the pump capacity. Wherever you want.

Something for all

AquaMax Eco Gravity Thanks to gravitation optimised technology this pump range is specially suited for the requirements of gravity fed filter systems. Pollutant particles up to 6 mm in size can be filtered out of the water through the high quality stainless steel filter basket. Patented frost protection to −20 °C.

Tip!

Experts on site: Would you like competent advice on site in your garden or at your pond? The OASE Teichfreunde can help you! They are experienced pond owners and are always trained. The addresses are available at www.oase-teichfreund.de or via the OASE Hotline (+49) 05 41 − 9 33 99 98 00.

FILTER- & WATERCOURSE PUMPS

AQUAMAX

AquaMax Eco Classic *Eco*

The powerful classic in a completely new design

»Environmental Function Control«
The pumps switch off automatically in the event of dry run and prevents damage to the device.

START

- Completely redesigned: The classic – the entry level class of filter and watercourse pumps from OASE
- A totally new form: Adapted to the pond environment through organic design
- Extremely economical: Thanks to its energy efficient motor, the »AquaMax Eco Classic saves power – and money – in operation
- Uncompromising reliable: Powerful conveyance of coarse debris particles up to 8 mm in size into a filter
- Suitable for use on swim ponds and bathing ponds (inserted in an exterior pump chamber)
- Included in the scope of delivery: Special hose adapter with threaded collar for different hose sizes

From AquaMax Eco Classic 3500
- »Environmental Function Control« (EFC by OASE) protects against dry run and blocking

PRODUCT DETAILS

Coarse debris displacement
The large surface wrap around strainer allows coarse debris particles like fish waste or dead plants up to 8 mm to pass through. The pump moves this debris to the filter.

Special stepped hose adapter
Scope of delivery includes a stepped hose adapter with the sizes 1", 1¼" and 1½" and suitable stainless steel hose clamps. (For AquaMax Eco Classic 2500 ¾" – 1½")

Energy efficient motor
The efficient OASE motor works with particular economy and thus effectively reduces running costs. (From AquaMax EcoClassic 3500)

Extras

Top 3 product characteristics
- Top entry model with first-class price / performance ratio, in a new design
- Thanks to the energy efficient motor, the »AquaMax Eco Classic constantly saves power – and money
- Coarse debris displacement of particles up to 8 mm in size

AquaMax Eco Classic 2500 – 17500

AQUAMAX ECO PREMIUM

Efficient water movement in multiple pond zones

»Seasonal Flow Control«
The pumps adapt to the pond ecology throughout the year and support the pond biology through temperature dependant water circulation.

»Environmental Function Control«
The pumps switch off automatically in the event of dry run and prevents damage to the device.

Like always. Just better.
Made in
The new Original.
Germany
Like always. Just better.

PRO

- Outstanding energy balance: Reliable displacement using even less energy
- Supplemental, patented connection of optional filter accessories for debris supply from more distant pond zones
- Unique, patented frost protection: That's why the pump will not be damaged at temperatures as low as −20 °C
- Flow rate can be mechanically and electronically adjusted
- Elegant design with clever operating elements
- Quiet for dry setup on swim ponds and bathing ponds
- Plant remains or fish waste to 11 mm in size are displaced
- »Environmental Function Control« (EFC by OASE) protects against dry run and blocking
- MADE IN GERMANY: Precise and reliable German engineering art at a high level of quality

From AquaMax Eco Premium 12000
- Patented »Seasonal Flow Control« for intelligent and environ-mentally-conscious regulation of flow rate and delivery head
- An additional 30% energy savings is possible with SFC switched on

PRODUCT DETAILS

Regulator + 2nd inlet
Flow through from 0 to 100% can be mechanically adjusted. Ideal for adjusting skimmer or satellite filter capacity (accessories) in 4 steps. 2. Inlet allows connection of a satellite filter or the surface skimmer (accessories).

SFC switch
For AquaMax Eco Premium 12000/16000/20000. With the SFC function switched on, the pump automatically optimises and reduces flow rate and delivery head by up to 50%.

Extras

Top 3 product characteristics
- Outstanding energy efficiency and displacement capacity
- Simultaneous supply of debris through connection of filter accessories on the patented, second inlet
- Patented frost protection to −20 °C

Accessories

Satellite filter AquaMax Eco
Enables intake of polluted water at an additional point on the pond floor.

Schematic diagram: Filter and watercourse pump **AquaMax Eco Premium 12 V (PRO)** used in the swim pond in combination with an OASE pressure filter **FiltoClear (PRO)**

AQUAMAX ECO PREMIUM 12 V

Efficient water movement in multiple pond areas, now also in swim ponds

Innovation: »Environmental Function Control«
The pumps switch off automatically in the event of dry run and prevents damage to the device.

AquaMax Eco Premium 6000 / 12 V

PRO

- With safe 12 V technology perfect for implementation in swim ponds and bathing ponds
- Outstanding energy balance: Reliable displacement using even less energy
- Supplemental, patented connection of filter accessories for debris supply from more distant pond zones
- Unique, patented frost protection: That's why the pump will not be damaged at temperatures as low as −20 °C
- Elegant design with clever operating elements
- Maximum convenience thanks to ergonomic and easily accessible handles
- Plant remains or fish waste to 11 mm in size are displaced
- »Environmental Function Control« (EFC by OASE) protects against dry run and blocking
- MADE IN GERMANY: Precise and reliable German engineering art at a high level of quality

PRODUCT DETAILS

Regulator + 2nd inlet
Flow through from 0 to 100% can be mechanically adjusted. Ideal for adjusting skimmer or satellite filter capacity (accessories) in 4 steps. 2. Inlet allows connection of a satellite filter or a surface skimmer (accessories).

12 V Power unit
For safety, low voltage transformer, suitable for swim ponds. Power unit must be setup at least 2 m from the pond.

Extras

Top 3 product characteristics
- Outstanding energy efficiency and displacement capacity
- Perfect in swim ponds and bathing ponds thanks to safe 12-volt technology
- Simultaneous supply of debris through connection of filter accessories on the patented, second inlet

Accessories

Satellite filter AquaMax Eco
Enables intake of polluted water at an additional point on the pond floor.
Item no. 57177

AquaSkim 20
Item no. 51236 (page 162)

AquaSkim 40
Item no. 56907 (page 162)

Effectively frees the pond surface of leaves, food remnants, and other pollutants and carries pollutants directly to the filter system.

5 YEARS GUARANTEE 3+2 | low energy cost | CE | VDE

Schematic diagram: Dry setup of the filter and watercourse pump **AquaMax Dry 14000 (PRO)** with concurrent operation of skimmer and satellite filter

AQUAMAX DRY

Especially designed for dry installation

PRO

- Powerful filter pump for installation in a dry, separate, pump chamber
- Extremely quiet motor operation
- Displaces coarse debris to 8 mm in size
- Extremely stable thanks to its solid base
- Included in the scope of delivery: 2 hose connections 1" − 1½", as well as 2 stainless steel hose clamps 1½"
- Likewise suitable for use on swim ponds and bathing ponds (inserted in an exterior pump chamber)

PRODUCT DETAILS

Coarse debris displacement
The pump displaces debris particles up to 8 mm in size, such as fish waste or dead plant remains.

Hose clamps
The stainless steel hose clamps 1½" are included in the scope of delivery.

Extras

Top 3 product characteristics
- Quiet pump, especially for dry setup
- Extremely stable thanks to its solid base
- Electronically adjustable with the OASE InScenio FM-Master 3

Aquamax Dry 6000 – 16000

OASE-Pump performance curves – comparison see page 246–247

Recommendation
The AquaMax Dry should be setup below the water level in a separate pump chamber. Consequently a great advantage of the dry setup is the safe use, particularly for swim ponds and bathing ponds. In the chamber the pump is easily accessible for maintenance purposes. For this we recommend the OASE slide valves that keep your pump free of water for the time that maintenance is performed. And to remove the debris from the pond even more effectively, in addition a satellite filter or skimmer can be connected to the pump via a Y-distributor.

AQUAMAX ECO TWIN Eco^{PLUS}

Particularly powerful with flexible capacity adaptation

Like always. Just better. Made in The new Original. Germany Like always. Just better.

Innovation: »Environmental Function Control«
The pumps switch off automatically in the event of dry run and prevents damage to the device.

PRO

• Particularly powerful filter pump with individually adjustable flow rate of the 2 motors per remote control
• Reduced power consumption and effective adaptation of power to filter activity
• Minimal maintenance requirements thanks to large wrap around strainer
• Patented damper mechanism guarantees optimal delivery rates
• Coarse debris displacement of particles up to 11 mm in size
• In addition to pond floor filtration, simultaneous connection of a satellite filter or skimmer is also possible
• Unique, patented frost protection: That's why the pump will not be damaged at temperatures as low as −20 °C
• »Environmental Function Control« (EFC by OASE) protects against dry run and blocking
• Suitable for use on swim ponds and bathing ponds (inserted in an exterior pump chamber)
• MADE IN GERMANY: Precise and reliable German engineering art at a high level of quality

PRODUCT DETAILS

Controller with LED display
The motors can be separately switched on or off, or can be adjusted together via wireless remote control. Digital display of the respective capacity level.

»Intelligent« flap
The patented »intelligent« flap mechanism in the interior of the AquaMax Eco Twin guarantees optimal output even when only one pump is used.

Flexible regulation of the 2 motors
The different water intake functions can be switched and regulated individually. The following combinations are possible:
1. Pond floor filtration and satellite filter
2. Pond floor filtration and skimmer
3. Pure pond floor filtration

Extras

Top 3 product characteristics
• Flexible switching of the flow rate
• On / Off adjustable conveniently via remote control
• Patented frost protection to −20 °C

Recommendation
Depending on the debris input in the pond, you can decide from which point the water should be delivered into the filter. You can regulate or switch off the pond floor filtration by remote control, and concentrate only on the surface or pond edge. The pump is so effective.

AquaMax Eco Expert

The next generation of the powerhouses – energy-efficient for rigorous requirements

»Seasonal Flow Control«
The pumps adapt to the pond ecology throughout the year and support the pond biology through temperature dependant water circulation.

»Environmental Function Control«
The pumps switch off automatically in the event of dry run and prevents damage to the device.

PRO

NEW

- New, energy-efficient pump generation for extremely powerful and economic delivery capacity
- Perfect for use in demanding filter systems or for large watercourses and waterfalls
- Excellent efficiency and at the same time outstanding displacement of coarse debris down to 11 mm in size
- Robust and durable stainless steel housing for stability
- Unique, patented frost protection: Consequently, the pump will not be damaged at temperatures as low as −20 °C
- Protection against dry run and blocking through »Environmental Function Control« (EFC by OASE)
- Can be setup underwater & dry
- The pump is unusually quiet in operation; ideal for use in a pump chamber
- Patented »Seasonal Flow Control« for intelligent and environmentally-conscious regulation of flow rate and delivery head
- An additional 30 % energy savings is possible with SFC switched on
- MADE IN GERMANY: Precise and reliable German engineering art at a high level of quality
- Available from March 2015

78

PRODUCT DETAILS

Robust filter basket
Thanks to this robust stainless steel filter basket, coarse debris particles up to 11 mm in size are displaced with no problems.

Compact base
Integrated fixing holes in the base facilitate fixed installation on the pond floor, as needed.

Convenient operation
The ergonomic handle, aligned with the pump's centre of gravity facilitates transport and installation. The switch for SFC function is practically positioned directly on the handle.

Connection for DMX-RDM control devices
Innovative, convenient and handy, the AquaMax Eco Expert pumps can be easily regulated and controlled by devices, such as the AquaMax Eco Control via a DMX-RDM connection.

Extras

Top 3 product characteristics
- High-performance powerhouse with low energy consumption offers significant energy savings
- Patented frost protection to −20 °C
- With switchable SFC function, enabling an additional 30% savings in energy costs, depending on the water temperature

Recommendation
The energy-efficient and high-performance AquaMax Eco Expert is outstandingly suited for feeding large filter systems, as well as demanding watercourses and waterfalls.

Innovative controller and FM-Master WLAN with DMX-RDM interface for individual capacity regulation and query, as accessories.

AquaMax Eco Control

With the clever DMX-RDM control device, AquaMax Eco Control, the capacity of the connected pumps can be simultaneously queried and regulated directly on the controller! Including illuminated display, without separate power supply!
Item no. 40247

InScenio FM-Master WLAN
This innovative garden power outlet can be controlled via smart phone or tablet. In addition to 4 power outlets with an integrated timer, it also has a DMX-RDM connection for the AquaMax Eco Expert.
Item no. 40243 (page 208)
Item no. 40244 (page 208)

AquaMax Expert

Extreme performance for demanding large installations

PRO

- Excellent flow rates for sophisticated filter systems or large watercourses and waterfalls
- Coarse debris displacement of particles up to 8 mm in size
- Electronic adjustment via remote control with the InScenio FM-Profimaster (page 211)
- Side 2" outlet for easier installation in large installations
- Long service life particularly at high capacities
- Ergonomic handle for safe transport
- Can be setup underwater & dry
- Unique, patented frost protection: That's why the pump will not be damaged at temperatures as low as −20 °C
- Suitable for use on swim ponds and bathing ponds (inserted in an exterior pump chamber)

PRODUCT DETAILS

Robust filter basket
Thanks to this robust stainless steel filter basket, coarse debris particles up to 8 mm in size are displaced with no problems.

AQUAMAX ECO GRAVITY *Eco*

For gravity fed filter systems on koi ponds and swim ponds

»Environmental Function Control«
The pumps switch off automatically in the event of dry run and prevents damage to the device.

PRO

- Energy-efficient filter pump with strong and reliable delivery capacity for large bodies of water with intensive use
- Coarse debris displacement of particles up to 6 mm in size
- High stability thanks to the removable mounting base
- Can be setup underwater & dry
- Unique, patented frost protection: That's why the pump will not be damaged at temperatures as low as −20 °C
- Included in the scope of delivery: Adapter set for hose (50 mm / DA 63) and pipe connection (DN 75/DN 110)
- »Environmental Function Control« (EFC by OASE) protects against dry run and blocking
- Suitable for use on swim ponds and bathing ponds (inserted in an exterior pump chamber)

82

PRODUCT DETAILS

Stainless steel pump guard
Thanks to this high quality, stainless steel filter basket coarse pollutant particles up to 6 mm in size are displaced with no problems.

Removable base
The removable base enables pump installation in confined spaces.

Adapter Set
The included adapter set enables connection of hoses (50 mm / DA 63) and pipes (DN 75 / DN 110).

Extras

Top 3 product characteristics
- Perfectly matched to the requirements of gravitation filter systems
- High performance with minimal space requirements
- Patented frost protection to −20 °C

Recommendation
These powerful gravitation filter pumps are excellently suited for feeding larger filter systems. Ideal in combination with the OASE module filters ProfiClear Classic and ProfiClear Premium (page 120−133).

Filters & Aerators

Intelligent products and holistic systems – your experts for clear water

Many garden owners simply want to enjoy their pond, appreciating their individual design or discovering new ideas. No one wants to think about work whilst relaxing. No problem, OASE offers clever products and intelligent systems that facilitate the work and even do it for you. Whether you prefer a garden pond with fish, a larger koi pond or even a swim pond – the water will be clear, and will remain clear! OASE even provides a Clear Water Guarantee*P. 250 to make this possible. From a number of filters, UVC clarifiers and aerators you can select the products that perfectly fit your individual pond environment. The underwater filters (page 92) with multiple functions are ideally suited for small ponds or planter boxes, while pressure filters (page 96) are the optimal

*»Discover everything –
ideally together!«*

BioTec Premium

compact high-performance filter with drum filter technology and intelligent self-cleaning! Starting on page 116

specialists for small to medium-sized ponds with or without watercourses. The high requirements that medium sized to large ponds and koi ponds impose on the performance of a filter are achieved by the OASE flow-through filters (page 102). The filter capacities are perfectly supplemented by effective UVC clarifiers and reliable pond aerators. Perfectly matched, these components are

an expert team, which either as a complete set or custom combination provides guaranteed clear water*P. 250 in your pond. Discover the new high-performance filter for large bodies of water between 40 m³ und 80 m³. The BioTec Premium offers automatic coarse debris removal, intelligent self-control and highly reliable filter capacity. See for yourself on page 118.

Filter systems from OASE: Clear water guaranteed* P. 250

Every garden owner has their own idea of how they would like to design their garden with water. Consequently every body of water has its very individual requirements on a filter system. Whether large or small, with or without fish stock — the perfectly matched products from OASE make it easy for you to find the right solution.

A filter system consists of:
• A filter pump to feed the filter
• A pond filter that ensures biological / mechanical cleaning, and
• A UVC clarifier to eliminate suspended algae and reduce pathogens.

Whether an underwater filter, pressure filter, flow-through filter, or a module filter is used depends on factors such as, pond type, pond volume and fish stock.

Depending on the type of the body of water, its size and depending on fish stock, you select an underwater filter, pressure filter, flow-through filter, or module filter. If the filter must perform multiple functions, such as feeding a watercourse or serving as part of a fountain system, we recommend that you include these functions in your planning. When the fish stock increases, you should also consider increased performance of the filter. The higher the nutrient input due to more fish in the pond, the more capacity the filter should have.

The most important prerequisite for selecting the suitable filter system is the correct determination of the quantity of water in the pond (= pond volume): **Pond volume in m^3 = Length x Width x Depth / 2 (for rectangular pools, only L x W x D)**

Example: 3 m x 4 m x 1 m / 2 = 6 m^3 equals 6000 litres

Tip!

Filter systems with Clear Water Guarantee *P.250
For every body of water – from a garden pond with or without fish, to ecological biotope or water pool in a modern design – at OASE there is a filter. With Clear Water Guarantee! More information is provided on page 250 or at:
www.oase-livingwater.com

GUARANTEE *
*P.250

Selection made easy:

After working out the pond volume, you will find the filter components that are perfectly matched to your body of water.
Depending on volume, the rotary selection chart specially developed by OASE shows you a suitable filter pump in combination with a recommendation for a filter and a UVC clarifier.

Support is provided by your personal OASE stockist, who you can find at
www.oase-livingwater/haendler.

OASE Filter systems
at a glance

This brief overview shows you the four filter categories and briefly explains the main features of the respective system.

Underwater filters (page 92)

With the OASE underwater filters you create a beautiful feature even where space is at a minimum.

Suitable for:
- Decorative pools, such as galvanised troughs or wine barrels
- Pre fabricated pools up to 5000 litres
- Small ponds
- As supplemental filter element with fountain

Filtral UVC 5000 (START)   *Filtral UVC 2500 (START)*

Pressure filters (starting on page 96)

Pressure filters are suitable for small and medium-sized ponds. If needed the water can be routed to higher positioned watercourses, because the pump pressure remains intact through the filter.

Suitable for:
- Medium-sized ponds up to 30 m³
- Direct infeed of watercourses or fountains
- Architectural pools without visible technology

BioPress Set 6000 (START)   *FiltoClear Set 12000 (PRO)*

Flow-through filters
(starting on page 102)

Flow through filters are used for medium-sized to large ponds or koi ponds. They stand above the water surface at the edge of the pond or above a watercourse. The water flows back into the pond via gravity.

Suitable for:
- Larger ponds up to 140 m³
- Ponds with fish stock
- High circulation capacities

BioTec Premium 80000

BioSmart Set 5000 (START)   *FiltoMatic CWS Set 7000 (PRO)*

Module filters
(starting on page 120)

Large natural ponds or swim pond with or without koi – these modular systems remain flexible at any time.

Suitable for:
- Large ponds, swim ponds, koi ponds and lakes

ProfiClear Premium

Filters in comparison

Important note
When planning a new pond with koi stock, please ensure a minimum pond size of 5 m³!

Ponds with plants, without fish stock

Ponds with plants and fish stock to 1 kg/1000 l

Ponds with plants and fish stock up to 1–2 kg/1000 l (koi ponds)

For the pond size specifications cited above (FiltoClear/Sets) 1 m delivery head and 5 m 1½" hose were taken into consideration. Larger pumps should be used for longer hose lengths and/or greater delivery heads. Clear Water Guarantee*[P.250] in accordance with a Secchi light penetration depth of 1 m. Please note that in case of extreme temperature fluctuations, friction losses for hose lines longer than 5 m or direct sunlight due to the position of the pond (south facing) more intensive planning is required.
All references regarding our Filter/UVC combinations for special pond sizes are based on Mid-European climatic conditions. For other regions they could differ due to the water temperature and sun intensity.

ProfiClear Premium

- Perfect for koi ponds, swim ponds and other large bodies of water
- New generation of module filters for professional water quality
- Intelligent self-cleaning and self-control system

For the pond size specifications cited above (BioTec) 1 m delivery head and 5 m 1½" hose were taken into consideration. Larger pumps should be used for longer hose lengths and / or greater delivery heads. Clear Water Guarantee*[P.250] in accordance with a Secchi light penetration depth of 1 m. Please note that in case of extreme temperature fluctuations, friction losses for hose lines longer than 5 m or direct sunlight due to the position of the pond (south facing) more intensive planning is required.
All references regarding our Filter / UVC combinations for special pond sizes are based on Mid-European climatic conditions. For other regions they could differ due to the water temperature and sun intensity.

Additional information in the **OASE app**
Available in the Apple Store & Google Play Store

Pressure filters: Invisible helpers

Pressure filters are compact filters that can perform several tasks at the same time. First, the water is conveyed from the filter into the pressure filter, in which the different filter sponges ensure cleaning of the water. Suspended algae, and even harmful pathogens, are effectively eliminated through the integrated UVC clarifier. When the water subsequently exits the filter, thanks to the continuous pressure, it can even feed watercourses up to a height of 1.50 m. As opposed to flow-through filters, pressure filters maintain the pump pressure throughout the entire filter. This function makes it particularly easy for garden owners to »conceal« the pressure filter. Pressure filters can be buried in the ground, even below the water level, and remain almost invisible. Another particular advantage of pressure filters in this regard is the convenient cleaning and maintenance of the filter from outside – it is not necessary to open the cover. Compact and effective with the proven OASE Clear Water Guarantee*[P. 250]!

✓ Ideal for watercourses with height differential
✓ Convenient cleaning from the outside
✓ Easy to conceal – even below the water level

Advisor

The filter that is fed by the pump is concealed in the ground. If needed the water can be routed to higher positioned watercourses.

Pressure filters

BioPress Sets The entry level among the OASE pressure filters with reliable filtration capacity and basic functions. The BioPress is available as a set with pump and hose and is suitable for ponds up to 10 m³.
- The best filter biology and effective nutrient decomposition thanks to varying filter media
- Integrate UVC clarifier for eliminating germs, suspended algae and turbidity
- Easy, patented cleaning function from the outside, thanks to the handle in the cover

FiltoClear The expert among the OASE pressure filters with first class filter performance and special functions. The FiltoClear is available individually or as a set with matching pump. Suitable for ponds up to 30 m³.
- Effective nutrient decomposition thanks to large filter surface
- Integrated UVC clarifier for elimination of germs, suspended algae and turbidity
- Patented cleaning function from the outside without opening the cover, incl. convenient backflush function
Integrated monitoring function of the UVC clarifier, the filter flow-through, as well as contamination level

Tip!

For small ponds and decorative pools (e.g. a wine barrel or a galvanised trough) up to 5000 litres, the Filtral underwater filter is the best compact solution, consisting of filter, UVC clarifier and fountain. Additional information on these filters is provided on page 92.

Schematic diagram: Underwater filter **Filtral UVC** inserted in a pond pool

FILTRAL UVC *P. 250

Underwater filter with UVC and fountain

START

- Suitable for ponds and pre-formed pools up to 5 m³
- A multi talent with filter function and water feature
- Including OASE Clear Water Guarantee*P. 250
- Compact filter unit with UVC technology and 4 different filter materials
- Pump is already integrated for attractive fountains
- Height adjustable fountain attachments for adaptation to the specific water depth
- Adjustable T-piece for operating spouts and small watercourses
- Individual adjustment of flow rate and fountain height
- Set up completely under water – the appearance of the pond remains undisturbed
- Visual function check of the UVC clarifier
- Included in the scope of delivery: 3 fountain attachments for different water patterns

*P.250 *Details on the type and scope of the Clear Water Guarantee on page 250*

PRODUCT DETAILS

Filter media and UVC
Two different filter sponges, as well as bio surface elements and filter pebbles, ensure mechanical and biological cleaning. 7/11 watt for clear and healthy water.

Bio-cores and filter pebbles
The filter pebbles in the net bag and the bio surface elements offer adequate settling surface for the micro-organisms.

Extras

Top 3 product characteristics
• Multifunctional compact solution for prefabricated pools and smaller ponds up to 5 m³
• Clear water, guaranteed*P.250, and beautiful fountains
• The technology is virtually invisible because it must be set up underwater

Solid pressure filter set with UVC and filter pump

BioPress Set **4000**

START

- Suitable for ponds up to 10 m³
- Combination of mechanical biological cleaning and effective UVC technology
- Including OASE Clear Water Guarantee*[P. 250]
- Ideal for supplying higher elevated watercourses
- A patented cleaning function integrated in the cover facilitates cleaning of the filter
- Quick release provides easy filter opening and closing for maintenance purposes
- It can be buried for almost invisible integration in the garden
- Supplied with all hose connections for fast and trouble free installation

From BioPress Set 6000
- Different filter materials for optimal settlement of filter biology

BioPress Set 4000
- Included in the scope of delivery: 4.5 m ¾" hose and OASE filter pump 1500: 25 W; 1500 l/h Qmax; 1.9 m Hmax

BioPress Set 6000
- Included in the scope of delivery: 5 m 1" hose and OASE filter pump 2500: 40 W; 2500 l/h Qmax; 2.2 m Hmax

BioPress Set 10000
- Included in the scope of delivery: 5 m 1" hose and OASE filter pump 3500: 70 W; 3400 l/h Qmax; 2.7 m Hmax

PRODUCT DETAILS

Cleaning handle
Easy cleaning via the cleaning function integrated in the cover.

Quick release
For easy opening and closing of the filter when performing maintenance tasks.

Integrated UVC unit
The UVC unit integrated in the cover ensures fast elimination of algae and reduction in pathogens in the pond water.

Filter materials
In addition to the filter sponges, bio-filter surfaces with the specially developed flow control offer supplemental settlement surface for microorganisms. They are able to move freely in the water flow *(only BioPress 6000/10000)*.

Extras

Top 3 product characteristics
• *Clear water guaranteed through the ideal combination of filter, pump and UVC technology*
• *Easy cleaning via the cleaning function integrated in the cover*
• *The filter can be buried to the cover for perfect integration in the environment*

Recommendation
The UVC bulbs should be changed at regular intervals, ideally in spring before the season starts, to guarantee the full strength capacity of the UVC light waves!

FILTOCLEAR *P. 250

Pressure filter with UVC and patented cleaning function

- Suitable for ponds up to 30 m³
- Combination of mechanical biological cleaning and effective UVC technology
- Including OASE Clear Water Guarantee*[P.250]
- Ideal for supplying higher elevated watercourses and architectural pools
- Patented Easy-Clean technology for easy cleaning without opening the filter
- Cleaning and backflush function can be easily operated on the cover
- Possibility of monitoring the UVC clarifier, filter contamination and water flow-through
- Integrated in the natural environment, thanks to possibility of in ground installation and the sandstone look of the cover
- Compact filter size with high filtration capacity – perfect for architectural pools and where there is little space in the garden
- High quality, impact resistant material

Starting with FiltoClear 12000
- Incl. UVC clear rinse function for easy cleaning of the UVC unit
- Incl. 2" hose connection

PRO

PRODUCT DETAILS

Easy Clean technology: Rotary switch on »Filter«

The UVC clarifier eliminates algae and reduces pathogens. Then the »treated« water flows through the fine mechanical and large pored biological filter elements of the filter unit that decompose the pollutants and clarify the water.

Easy Clean technology: Rotary switch on »Clean«

Turning the rotary switch activates the cleaning function. Then move the cleaning lever up and down to »squeeze out« the filter elements. Simultaneously clean water flows into the filter and forces the polluted water out of the unit. Then you simply return the switch to the filter position.

- Including OASE Clear Water Guarantee*P. 250
- Filter technology simply selected and ready for connection
- Complete set includes: FiltoClear pressure filter incl. UVC clarifier and matching AquaMax Eco Premium filter and watercourse pump
- FiltoClear: High filtration capacity in a small space with patented cleaning function
- AquaMax Eco Premium: Extremely energy efficient displacement
- Ideal for supplying higher elevated watercourses and architectural pools
- Integrated in the natural environment, thanks to possibility of in ground installation and the sandstone look of the cover

Your advantages with the set:
- Optimally matched components
- Naturally with Clear Water Guarantee*P.250
- Attractive price advantage over separate purchase of the individual components!
- 100 ml Biokick FREE!

Save with complete filter sets!

For the pond size specifications cited above (FiltoClear / Sets) 1 m delivery head and 5 m 1½" hose were taken into consideration. Larger pumps should be used for longer hose lengths and / or greater delivery heads. Clear Water Guarantee*P. 250 in accordance with a Secchi light penetration depth of 1 m. Please note that in case of extreme temperature fluctuations, friction losses for hose lines longer than 5 m or direct sunlight due to the position of the pond (south facing), more intensive planning is required.
All references regarding our Filter / UVC combinations for special pond sizes are based on Mid-European climatic conditions. For other regions they could differ due to the water temperature and sun intensity.

Important note: *When planning a new pond with koi stock, please ensure a minimum pond size of 5 m³!*

Ponds with plants, without fish stock

Ponds with plants and fish stock to 1 kg / 1000 l

Ponds with plants and fish stock to 1 – 2 kg / 1000 l

Additional information in the OASE app
Available in the Apple Store & Google Play Store

Flow through filters:
The effortless path to clear water

A flow-through filter is fed by the pump in the water. The filter is the highest point in this cleaning cycle; from this point the water then flows back into the pond. Special filter foams that not only work mechanically but also biologically clean the water; this is where, after a period of time, industrious microorganisms form that decompose the excess nutrients in the water. The advantage of flow-through filters: They are above ground and easy to reach. Cleaning and maintenance are quickly executed. The OASE product line offers many innovative products here. Systems with self-cleaning function, such as the FiltoMatic CWS, the ScreenMatic prefilter or the new BioTec Premium for large bodies of water, spare you hours of pond cleaning and filter cleaning. You will have more time to enjoy your garden.

Advisor

Only Bitron C

2 m

Max. watercourse height = height of the filter discharge

Flow through filters are installed for medium-sized to large ponds or small koi ponds. They stand above the water surface at the edge of the pond or above a watercourse so that the water flows back into the pond under gravity.

Flow-through filters

BioSmart The combination of filter foam and integrated UVC clarifier ensures ideal filter capacities. Thanks to a sludge drain it is easy to clean and it is the ideal entry model.
Now new filter sizes: BioSmart 18000 and 36000!

FiltoMatic CWS The self cleaning filter controls the integrated sludge pump and UVC clarifier as needed. More detailed information on the Clear Water System is provided on pages 108 / 109.

BioTec Screenmatic with clarifier stage
Particularly low maintenance effort thanks to automatic Screenmatic coarse debris extraction.

BioTec Premium
Maximum convenience thanks to drum filter technology paired with integrated BioTec filter technology – the BioTec Premium is an especially compact and powerful filter package. The watertight controller detects contamination in the preliminary separator and regulates the self-cleaning automatically.

Tip!

OASE Filter Sets – complete solutions with perfectly matched components.

BioSmart Sets
Incl. pump, UVC and hose

FiltoMatic CWS Sets
Incl. pump, UVC

BioTec ScreenMatic Sets
Incl. pump, UVC

Schematic diagram: **BioSmart 36000** in combination with filter and watercourse pump **AquaMax Eco Classic**

BioSmart *P. 250

Solid flow-through filters for garden ponds

BioSmart **UVC 16000**

BioSmart **18000 / 36000**

START

- Suitable for ponds up to 36 m³
- Additional oxygen enrichment through special water channelling
- Cleaning handles for convenient maintenance
- Including displays for pollutant level and water temperature
- Sludge drain for easy removal of coarse debris
- Easy to conceal; the filter can be recessed into the ground to ⅓ of its height
- Optimally matched to the OASE AquaMax filter and watercourse pumps (from page 62)

BioSmart UVC 16000
- Guaranteed clear water*P. 250 through the combination of mechanical/biological cleaning with effective UVC technology

BioSmart 18000 / 36000
- Can be optimally combined with the Bitron C 24 – 36 W, and the Vitronic 18 – 36 W UVC clarifiers

PRODUCT DETAILS

Nitrification and denitrification zones
Toxic ammonia, nitrite and nitrate are transformed into harmless end products in the different sponges.

Temperature display
The thermometer indicates the current water temperature at all times.

UVC unit*
The integrated UVC unit ensures fast elimination of suspended algae and reduction of pathogens.

Easy maintenance
After activating the cleaning lever, the bottom drain can be opened and coarse debris can be disposed of**

Extras

Top 3 product characteristics
- Reliable entry level flow-through filter for ponds up to 36 m³
- Easy maintenance thanks to cleaning handles and bottom drain
- Pollutant level indicator and temperature indicator for convenient filter monitoring

Recommendation
The perfect supplement for the Flow through filter: Thanks to the clever new design, now the UVC clarifiers, Vitronic 18 W − 36 W can easily be connected to the BioSmart 18000 and 36000.

FILTOMATIC CWS *P. 250

Pond manager with automatic self-cleaning

PRO

- Suitable for ponds up to 25 m³
- Intelligent control system adjusts the filtration capacity to the seasonal requirements of the pond
- Up to 40% power savings*[1] thanks to UVC unit with patented self-cleaning that is activated as needed and oxygen enrichment
- Incl. OASE Clear Water Guarantee*P. 250
- Virtually invisible, the filter device can be buried to 70% of the device height
- Cleaning effort is reduced thanks to automatic sludge discharge of the filter
- Convenient cleaning of the filter foams
- Long service life and high quality filter sponges offer the best conditions for the filter biology
- Less string algae through continuous removal of phosphates and nutrients
- Interval cleaning, UVC and pump function can also be controlled manually
- Special space saving filter design
- Determination of the specific replacement requirement of the bulb thanks to UVC operating hours meter
- Easy installation, low maintenance and user friendly
- Available in three different sizes

FiltoMatic 25000
- UVC with integrated stainless steel reflector for even more effective sterilisation

*[1] As compared with devices without an energy saving function in continuous operation

PRODUCT DETAILS

Automatic control unit
The innovative control system ensures energy savings through a temperature controlled UVC unit and automatic cleaning intervals.

Filter cover
Easy to open and close with one hand. Unintentional opening is prevented through integrated lock element.

Compact design
Strong filter effect in the smallest space. With the FiltoCap the device can be buried so that it is virtually invisible.

Cleaning
In addition to the automatic sludge discharge, the sponge elements are cleaned conveniently, your hands stay clean.

Extras

Top 3 product characteristics
- Up to 40% power savings*² thanks to UVC unit that is activated as needed
- Virtually invisible, the filter device can be buried to 70% of the device height
- Low maintenance and user friendly

Recommendation

		Optionally can be used to increase filter capacity		+ OxyTex Set 1000	17	8.5	4.5		
CWS Set 25000	FiltoMatic CWS 25000	24 W (UVC integrated)	AquaMax Eco Premium 8000	–	25	12.5	7	50872	50873
		Optionally can be used to increase filter capacity		+ OxyTex Set 2000	31	15.5	8.5		

Delivery heads ranging from 0 to 1.2 m and hose length of 5 m with a hose diameter of 1½" were taken into consideration for the pond size information cited above (FiltoMatic CWS).
Larger pumps should be used for longer hose lengths and / or greater delivery heads. Clear Water Guarantee*P. 250 as specified by Secchi to a visual depth of 1 m.
All references regarding our Filter / UVC combinations for special pond sizes are based on Mid-European climatic conditions. For other regions they could differ due to the water temperature and sun intensity.

Ponds with plants, without fish stock

Ponds with plants and fish stock to 1 kg / 1000 l

Ponds with plants and fish stock to 1 – 2 kg / 1000 l (koi ponds)

Important note
When planning a new pond with koi stock, please ensure a minimum pond size of 5 m³!

Only Bitron C

Schematic diagram: **BioTec 30** in function with a filter and watercourse pump and a **Bitron C**

BIOTEC *P. 250

Multi zone filter for larger ponds and koi ponds

PRO

- Suitable for ponds up to 120 m³
- Multi zone filter with special filter foams
- Highly effective mechanical / biological decomposition of pathogens and nutrients
- Large surface for settlement of filter bacteria
- Coarse debris extraction though filter brushes
- Bottom drain for easily flushing out coarse pollutants
- Easy cleaning and maintenance
- Connection possibility for OASE Bitron UVC clarifiers
- High quality GRP material and first class workmanship

Product details

Brushes and mat meshwork
For separating the coarse debris.

Filter foams
For settlement of microorganisms for decomposition of pollutants and nutrients.

Ball valve
Clean water outlet back to the pond lowers the water level in the filter and enables water saving filter cleaning.

Discharge chamber
with DIN 110 connection

Extras

Top 3 product characteristics

- Large settlement surfaces for filter bacteria
- Low maintenance multi zone filter system with long service life
- For large ponds up to 120 m³

Recommendation
The BioTec 30 is an important component of the BioTec filter systems, see selection table (page 117).

Matching filter and watercourse pumps: AquaMax Eco Premium 12000 / 16000 / 20000 (page 70), AquaMax Eco Twin 20000 / 30000 (page 76)

Matching UVC clarifiers: Bitron C 72 W−110 W (page 140) Bitron Eco 120 W−220 W (page 142)

Schematic diagram: UVC in combination with OASE **BioTec ScreenMatic**

BioTec ScreenMatic *P. 250

High performance filter with automatic coarse debris extraction

BioTec ScreenMatic **12**

BioTec ScreenMatic **36**

PRO

- Suitable for ponds up to 140 m³
- Highly effective flow-through filter also for medium size koi ponds
- Incl. OASE Clear Water Guarantee*P. 250
- Significantly less maintenance is required, thanks to coarse debris extraction, upstream from the filter inlet
- Automatically driven self cleaning of the ScreenMatic sieve
- Collection tank for removal of extracted coarse pollutants
- Different filter media and large settlement surface for optimal development of filter bacteria
- Flow speed of the incoming water can be adjusted individually depending on the amount of coarse debris
- Sludge drain with slide valve for removing debris from the filter system
- Cleaning of filter sponges directly in the filter, without removal
- Use of the PhosLess filter media tubes as needed for string algae reduction (optional accessory)
- Optimally matched to OASE AquaMax Eco filter pumps
- Direct connection possibility for Bitron C and Eco UVC clarifiers

PRODUCT DETAILS

Setup possibility
Free access to the sponges through 90° setup possibility for easy and fast maintenance.

Water distributor with flow regulator
Adaptation of the ScreenMatic sieve to different pump capacities for functions.

Electric motor
For electrical driving of the ScreenMatic preliminary separator at 30 minute intervals.

Triple separator
Frees the ScreenMatic from accumulated debris in three stages.

Extras

Top 3 product characteristics
- Clear and healthy pond water with minimum maintenance requirements
- Long service life thanks to automatic coarse debris extraction before it enters into the filter
- Settlement surface for microorganisms for decomposition of pollutants and nutrients

Recommendation

3 YEARS GUARANTEE | **PATENTED** | **EASY CLEAN** | **AUTO CLEAN** | CE | DVE

*1 Note: When planning a new pond with koi stock, please ensure a minimum pond size of 5 m³!

Extras

Top 3 product characteristics

- *Coarse debris extractor protects the filter sponges and extends the service life of the filter*
- *First class and powerful individual products, perfectly matched*
- *Easy installation*

Recommendation
Filter sponges should not be cleaned too often because valuable bacteria can be lost with each cleaning, and they redevelop slowly!

BIOTEC SCREENMATIC SETS *P. 250

Flow through filter systems with UVC, pump and automatic coarse debris extraction

PRO

Eco PLUS

- Suitable for ponds from 5 – 140 m³
- Filter technology simply selected and ready for connection
- Complete set includes: Flow through filter BioTec ScreenMatic with Bitron self cleaning UVC clarifier and AquaMax Eco Premium energy efficient filter pump
- Incl. OASE Clear Water Guarantee*P. 250
- Combination of mechanical biological cleaning and effective UVC technology
- Fast and easy set up
- Incl. BioKick Filter Starter for initial settlement of microorganisms

Your advantages with the set!
- Optimally matched components
- Naturally with Clear Water Guarantee*P.250
- Attractive price advantage over separate purchase of the individual components!
- 100 ml Biokick FREE!

Save with complete filter sets!

For the pond size specifications cited above (BioTec) 1 m delivery head and 5 m 1½" to 2" hose were taken into consideration. Larger pumps should be used for longer hose lengths and/or greater delivery heads. Clear Water Guarantee*P.250 in accordance with a Secchi light penetration depth of 1 m. Please note that in case of extreme variations in temperature, friction losses in hoses exceeding 10 m or strong solar radiation caused by a specific location of the pond (south side), a different planning deviant from these recommendations may be required.
All references regarding our Filter/UVC combinations for special pond sizes are based on Mid-European climatic conditions. For other regions they could differ due to the water temperature and sun intensity.

Ponds with plants, without fish stock

Ponds with plants and fish stock to 1 kg/1000 l

Ponds with plants and fish stock to 1–2 kg/1000 l (koi ponds)

Important note
When planning a new pond with koi stock, please ensure a minimum pond size of 5 m³!

BioTec Premium   *P. 250

Compact high-performance filter with drum filter technology

NEW

PRO

- Intelligent filter system for near-to-nature ponds to 80 m³ and fish ponds up to 40 m³
- The automatic coarse debris extraction easily flushes the contamination out of the filter, thanks to drum filter technology
- Long service life and high quality filter sponges offer the best conditions for the filter biology
- Outstanding filter capacity with intelligent control functions
- A watertight microcontroller system monitors and controls the main functions, operation is as easy as child's play (plug & play)
- The filter is flushed only by cleaned pond water. Therefore a fresh water connection is not required.
- Powerful, high-quality pressure pump is integrated for flushing the drum
- Incomparably quiet through extensive noise damping
- Excellent filtration capacity to 150 μm and flow-through rates up to 12500 l / h for a crystal clear view
- Individually removable sieve elements (no tools required) and free-wheeling functions for easy access to the drum interior
- Pollutant rakes on the sieves for reliable removal of string algae and other larger particles from the drum
- Less string algae through continuous removal of phosphates and nutrients
- Pollutant discharge incl. slide valve
- Innovative and reliable product »made in Germany*« (*except pressure pump)
- Available from March 2015

Product details

Clever drum filter technology
The innovative and self-cleaning preliminary separator reliably separates solid and liquid particles to 150 micron. And it separates without additional cleaning effort.

Intelligent switch centre
A watertight microcontroller system monitors and controls the main functions, operation is as easy as child's play (plug & play)

Hard-working filter biology
In the integrated filter foams, microorganisms can do their work perfectly and decompose harmful nutrients. The long service intervals due to the preliminary separation function are optimal for this purpose. Including convenient cleaning – you do not have to get your hands dirty.

Extras

Top 3 product characteristics
- Innovative filter system with extremely effective filter capacity
- Intelligent controller system with easy operation monitors and displays the core functions
- Professional drum filter technology for long service intervals ensures efficient utilisation of the filter biology

Recommendation
If you need a higher biological capacity, simply supplement the BioTec Premium with additional modules of the ProfiClear Classic series.

Module filters: Large ponds perfectly equipped

Owners of large natural bodies of water or swim ponds impose the most rigorous requirements on the performance of filters and they value easy operation. Koi enthusiasts, in particular, want to know that flora and fauna are optimally protected. Every pond owner can extend the clever and powerful module filter systems from OASE, completely in accordance with their requirements. The filter system based on the gravity fed principle that maintains an extremely low level of energy consumption, is particularly attractive. The filter can be concealed in the ground or under the terrace. Discover the OASE ProfiClear Premium system, proven professional filter performance and innovative functions, for example the automatic self cleaning and the intelligent self monitoring functions!

Advisor

The ProfiClear Classic filter system consists of 4 modules that together ensure clear natural ponds, swim ponds, or fish ponds.

Even koi owners can fully rely on the intelligent ProfiClear Premium filter system with 3 different modules, because with the fully automatic system even koi ponds and other ponds get outstanding water quality.

Module filters

ProfiClear Classic This filter system is characterised by powerful filter performance and flexible modules that can be extended. These modules enable individual capacity adaptation if the pond is enlarged or if fish stock is increased.

Special features
- High filter capacity for large natural ponds and swim ponds up to 200 m³
- Can be used as a gravity fed system, or as a pump fed system
- Consists of 4 modules with flexible extension possibility
- Convenient – only requires occasional, manual cleaning
- Average water circulation of 12 m³/h
- Noiseless function
- Moderate space requirements

ProfiClear Premium This new generation of intelligent filter system is the further development of the Classic series and provides incomparable filter performance and unusual functions.

Special features
- First class filter capacity for natural ponds and swim ponds up to 260 m³, in particular for koi ponds to 50 m³
- Can be used as a gravity fed system, or as a pump fed system
- Consists of 3 modules with flexible capacity extension possibility through addition of a Moving Bed module, as well as filling of the individual module
- Maximum convenience thanks to intelligent self cleaning and reliable self monitoring
- Maximum water circulation of 33 m³/h in the gravity fed system
- Low-noise function
- Low space requirements

Tip!

With the AquaSkim Gravity skimmer you can equip your gravity fed system with a skimmer, even if you do not have a shallow water zone. Suitable for all DN 110 pipes.

The ProfiSkim Premium is suitable for pond surfaces up to 65 m² and its stainless steel base enables easy installation. It is equipped with 2" and DN 110 connection possibilities and is suitable for use in gravity fed systems, as well as in pump fed systems.

121

2 m

Only Bitron C

Max. watercourse height = height of the filter discharge

The ProfiClear modular filter systems can be operated in two different ways depending on the local conditions: In accordance with the gravity fed principle or as a pump fed system.

ProfiClear: Pump fed principle

With the pump fed principle the filter system is installed above ground, and is also above the water level of the pond. The polluted pond water is fed out of the pond or out of the levelled pump chamber and into the filter system using a pump. The cleaned water flows back via a freely inclined pipeline, watercourse, or waterfall. In this process the source of the watercourse is not higher than the filter discharge.

SYSTEM ADVANTAGES AT A GLANCE:

- Can be easily retrofitted in existing ponds
- Minimum installation effort
- Easy upstream installation of UVC devices (page 140)
- Easy to extend the system
- Optimally matched to OASE AquaMax Eco Twin / Premium filter pumps (page 76 / 70)

ProfiClear: Gravity fed principle

With the gravity fed system the filter is recessed into the ground and made level to the water line of the pond. Polluted pond water reaches the first filter module via the bottom drain or a liner transition. Because the pump is not positioned at the beginning of the system, the coarse debris extractor can remove suspended matter in the water very effectively. The pump is in the pump chamber at the end of the system and conveys the cleaned water back into the pond.

Since there are no significant height differentials to overcome, energy-efficient AquaMax Eco Gravity pumps can be used.

SYSTEM ADVANTAGES AT A GLANCE:

- Effective removal of suspended matter through exploitation of the gravity fed principle
- Energy-efficient, as there is virtually no height differential and only minimal friction losses occur
- Can be integrated inconspicuously in the water garden
- UVC devices can be installed downstream or even upstream with the new Bitron Gravity (page 144)
- Optimally matched to OASE AquaMax Eco Gravity filter pumps (page 82)

PROFICLEAR CLASSIC *P. 250

Reliable modular filter system for large bodies of water

ProfiClear Classic **pump chamber**

PRO

Ideal for large ponds and swim ponds up to 200 m³
- Modularly extendible filter system for individual adaptation to local conditions
- Individual solutions through bringing together of different components
- Can be implemented in any size of pond and under any pond conditions
- Can be used as a pump fed version as well as a highly efficient energy saving gravity fed filter
- Coarse pollutant extraction with automatic cleaning (optional accessory)
- Easy maintenance cleaning handles and floor drains in each filter chamber
- High quality and impact resistant GRP and perfect workmanship
- Optimally matched to OASE filter pumps
- Protection against disproportionate algae growth when using the phosphate binder module

Rec. flow rate (gravitation)	l/h	−	6000		
Other		Pollutant discharge incl. slide valve			
Description		Whether gravity fed principle or pump fed system – the ProfiClear Classic pump chamber ensures optimal pump position. • Filters mechanically and biologically • Reduction of pressure losses • Safe and standard conformant set up for swim ponds • Easy maintenance and winter care • Protection against excessive silt • Two inlets [1] incl. regulator for individual adjustment of the inflow • Debris that accumulates in the sediment tank is flushed out via the bottom drain [2]	Enables easy mechanical extraction of solids up to 800 µm in size. • Incoming water is fed via two large-surface extraction sieves [1] into the next filter chamber • Pulling the slide valve [2] flushes out the debris via a DN 75 discharge • Incl. hose coupling for fresh water rinsing • The extraction sieves are quickly cleaned by interior and exterior brushes by operating the cleaning handle [3] • A pollutant level indicator [4] signals when maintenance is required • Automatic and regular cleaning is possible via the ProfiClear Screendrive (optional accessory)	Reliably removes toxins such as ammonium/ammonia or nitrite. • The water to be filtered is channelled through the coarse and fine foams [1] that contain the vital filter biology • The oxygen necessary for the nitrification processes is supplied via connections on the housing • The foams are cleaned by being compressed against the intermediate floors via the cleaning levers [2] • Pulling the slide valve [3] flushes the debris out via a DN 75 discharge, which can be supported through rinsing via cleaning nozzles	Converts nitrate into gaseous nitrogen (denitrification) and eliminates phosphates. • A majority of the water is channelled past the [1] filter foam. This establishes the low oxygen milieu that is so important for the denitrifying bacteria • The lesser portion of the flow volume is channelled through the PhosLess inserts [2] (4 units) • Binders ensure quick and safe phosphate removal • Elimination of these nutrients significantly restricts string algae growth • Virtually maintenance free due to bypass regulation in the foam prevents clogging • A pollutant level indicator [3] signals when maintenance is required • Pollutant discharge [4] incl. slide valve

ProfiClear Premium:
For the most rigorous demands.
With no compromises.

The solution for large koi ponds. Koi pond owners know that what starts as a small pond with a few koi can quickly become a larger installation. With the number of fish and use of the pond, the demands imposed on performance and convenience of a filter system increase as well; no one wants to make any more compromises.

The new generation ProfiClear Premium module filter system has been developed jointly in intensive cooperation with leading koi experts. With its extremely reliable filter performance, its well thought out functions, and its price / performance ratio, it sets totally new standards. It consists of three modules, drum filter module, moving bed module and individual module, the entire system even ensures clear water and will be extended by an additional 50 m³. The secret is its flexibility: Depending on the use of the pond a second or even third Moving Bed module can be connected, and the Individual module can be equipped with additional filter media. In a manner that is completely uncomplicated, this increases the overall filter capacity. Even large bodies of water, such as natural ponds and swim ponds to 260 m³ remain clear.

See this new product for yourself and be inspired by the ProfiClear Premium product film!

www.oase-livingwater.com/proficlearfilm

Extras

1 *Drum filter module – intelligence sets the pace.*

The drum module is not only an intelligent filter system, it also removes coarse debris before the debris reaches the filter bacteria. The exceptional filter with a maximum flow rate of 33 m³/h ensures crystal clear water. A microcontroller system automatically monitors and controls the main functions. Maximum convenience is guaranteed; with the easy operation the automatic self-cleaning can also be individually adjusted.

2 *Moving Bed module – Hel-X ensures optimum media circulation.*

In this module professional Hel-X biomedia ensure an extremely effective decomposition of nutrients and pollutants in the water. With their unusual structure they offer an incomparably large protected settlement surface for microorganisms. The moving bed process and the innovative bypass technology ensure optimal movement of the biomedia, even at high flow-through rates, as well as for self-cleaning of the dead biomass. The pre installed aerator bar integrated in the module ensures additional oxygen.

3 *Individual module – flexible with maximum effectiveness.*

Here the filter system is adapted individually to the pond and the desired use. The module offers extensive connection possibilities for additional system products, such as AquaMax Gravity Eco filter pumps or Bitron Gravity UVC clarifiers. In addition, stainless steel baskets with a fill volume of 8 litres are integrated in the flow area; these baskets can be filled with additional filter media, such as active charcoal or zeolite.

PROFICLEAR PREMIUM

- Maximum filter performance to 60 µm
- Automatic self-cleaning
- High flow rate, now up to 33 m³/h for even faster circulation rates

Schematic diagram: **ProfiClear** module filters are outstandingly suited for use on koi ponds

PROFICLEAR PREMIUM

- Perfect for koi ponds, swim ponds and other large bodies of water
- New generation of module filters for professional water quality
- Developed by and with koi experts
- Excellent decomposition rates of ammonium / ammonia and nitrite.

PROFICLEAR PREMIUM **P. 250

Sophisticated filter system for koi ponds

Extras

Top 3 product characteristics
- *Highly efficient filter system with deep bed filtration to 60 microns*
- *Intelligent controller completely handles the self cleaning*
- *First class price / performance ratio*

Recommendation
Matching filter and watercourse pumps:
AquaMax Eco Premium (page 70)
AquaMax Eco Twin (page 76)

Matching UVC clarifiers:
Bitron C 72 W / 110 W (page 140)
Bitron Eco (page 142)
Bitron Gravity (page 144)

- Intelligent high end module filter system for Koi ponds and other large bodies of water to 260 m³
- Outstanding filter capacity with intelligent control functions
- Intelligent self cleaning function for unique maintenance free operation (drum filter module)
- Highly effective decomposition of pollutants and nutrients, thanks to professional filter media and moving bed process (MovingBed module)
- Flexible adaptation of the filter system to individual requirements (individual module)
- Mature, professional technology with more than 3 years of development time
- Innovative and reliable product »made in Germany« (except pressure pump)

128

Drum filter module

Intelligence sets the pace. The intelligent switch centre removes coarse debris to 60 µm – i.e. finer than a hair.

- Maximum partical removal to 60 µm and flow-through rates to 25 m³/h for pump fed. 33 m³/h for gravity for a crystal clear view
- Automatic self-cleaning offers maximum convenience
- Rinsing is executed with cleaned pond water, a water connection is not required
- A watertight microcontroller system monitors and controls the main functions, operation is as easy as child's play (Plug & Play)
- Control system with retrospective display of errors in running operation, as well as adjustment possibilities for forced cleaning, duration of cleaning and supplemental cleaning
- Pollutant rakes on the sieves reliably remove string algae and other larger particles from the drum
- Pollutant trough made of ductile EPDM material prevents jamming of larger particles
- VDE testing certifies reliable and safe functions
- Flexible implementation possibilities; can be used in the gravity fed system, as well as in the pump fed system
- Safety level switch in the pumped system prevents jamming due to debris particles
- Stable housing thanks to solid stainless steel elements and dimensionally stable Duroplast
- Individually removable sieve elements (no tools required) and free-wheeling functions for easy access to the drum
- Incomparably quiet through extensive noise damping
- Powerful, high quality pressure pump is integrated for flushing the drum
- Full flexibility for the connection with up to 4 x DN 110 inlets (1 x optional)
- Screen elements in 150 µm mesh width optionally available as accessories

Moving Bed Module

Hel-X ensures optimum media circulation, Original Hel-X biomedia are highly effective at degrading pollutants in the moving bed process.

- Extremely large, protected settlement surface for microorganisms (704 m²/m³)
- Innovative bypass technology for optimal movement of the Hel-X bio-elements, even at high flow rates
- Removal of toxins, such as ammonium / ammonia and nitrite.
- Hel-X Biomedium: 50 l decompose approx 300 g of fish food per day. Its performance depends on temperature, feed quality and degree of settlement of microorganisms
- Aerator bar for optimal oxygen enrichment and turbulence already installed
- Advantages of the moving bed process: Permanent, optimal oxygen supply; self-cleaning effect from dead biomass, know-how from industrial water treatment
- Integrated bottom drain with high-quality, finely engineered slide valve

Integrated aerator can be connected to AquaOxy aerator pumps.

Biological surface for settlement of the microorganisms (left – biomedia that has not yet been used, right – with settled microorganisms).

POWERED BY Hel-X®

Individual module

Flexible with maximum effectiveness. The filter system is flexibly aligned to the individual conditions of the body of water.

- Space-saving pump and UVC chamber for easy integration of: AquaMax Gravity Eco filter pumps and Bitron Gravity UVC clarifiers
- Maximum flexibility in the connection through DN 110 and 2" ducts
- To increase the filter capacity, it is possible to fill the individual baskets in the flow area with additional filter medium up to 8 litres fill volume
- Integrated bottom drain with high-quality, finely engineered slide valve

Convenient filling of the 2 individual baskets with up to 8 litres fill volume.

* Double-row configuration (The filter system must be operated in two filter rows that are separate from each other) see illustration below.
   This table considers the usual flow losses within the filter system.
**All references regarding our Filter / UVC combinations for special pond sizes are based on Mid-European climatic conditions.
For other regions they could differ due to the water temperature and sun intensity.**

BIOLOGICAL PERFORMANCE OF THE HEL-X BIO MEDIUM IN THE MOVING BED MODULE:

50 l of Hel-X decomposes approx 300 g of fish food per day. If necessary, the fill level already contained can be extended from 50 l to 100 l (600 g fish food) per Moving Bed Module with an additional aeration. **Up to 3 Moving Bed Modules per row can be inserted in succession.** Among other factors, biological performance depends on temperature, food quality and the degree to which the Hel-X is settled with microorganisms.

RULES OF THUMB

How to calculate the right UVC power for your pond

Ponds **without fish stock**:   **1 W** UVC power per m³ pond volume
Ponds **with fish stock**:   **2 W** UVC power per m³ pond volume
Ponds **with koi stock**:   **4 W** UVC power per m³ pond volume

Note: To keep the bacterial load low in the koi pond, the Bitron Gravity should be operated with a max. flow rate of 12.5 m³/h. In this regard recirculation of 55% of the pond volume/h should be the objective. These recommendations are already considered in the table above.

Double-row configuration with ProfiClear as the example
The filter system must be operated in two filter rows that are separate from each other.

Setup – gravity fed system

High water level

Setup – pump fed system

Extras

Combination possibility with the BioTec Premium 80000
You already have a pumped ProfiClear Classic System, or do you want to supplement a planned ProfiClear filter system with an automatic self-cleaning function? With the new BioTec Premium, the ideal extension module for pumped ProfiClear Classic systems is now available. With a slight elevation of 20 cm, the modules can be easily connected. Experience the advantages of automatic solid/liquid separation. More detailed information on page 116.

ProfiClear Screendrive
Takes over regular and automatic cleaning of the coarse debris extractor in the ProfiClear Classic Coarse debris extractor module.

Item no. 57094 (page 232)

ProfiClear Premium sieve Set 150 µ
• *Accessories for the Drum Filter Module*
• *At 150 µm, ensures removal of coarser debris and thus reduces water consumption*
• *Ideal for use on natural ponds or swim ponds*
• *Contents: 8 sieve elements*

Item no. 50947

Discharge set ProfiClear Premium pump fed system
With the optional discharge adapter you can operate the ProfiClear Premium in pump fed setup even without individual chamber.

Item no. 50949

Hel-X Bio Medium 25 l
Extra media for Moving Bed Modules. Increases the biological performance. 2 x 25 l suffices for approx 300 g fish food/day.

Item no. 51060

Extras

Top 3 product characteristics
- *Trouble free level detection thanks to a conductive sensor 12 V AC*
- *Full setup flexibility through 20 m sensor cable*
- *Solenoid valve closes automatically if there is a power outage*

Recommendation
With automatic water replenishment you sustainably assure a stable water level. This is recommended for stable operation of a gravity fed drum filter system, such as the ProfiClear Premium or to protect sensitive technology from dry run.

ProfiClear Guard

Automatic water replenishment system

- Complete set consisting of control system, ½" solenoid valve and conductive level detection
- Sensor can be shortened to 10 mm switching differential
- Sensitivity of the sensor can be adjusted
- LED status display for the solenoid valve
- Integrated switching hysteresis to prevent undesired replenishment through waves

- The control system can be conveniently mounted on a wall
- Including sensor fastening element for projecting pond edges
- Servo-controlled 230 V brass solenoid valve (splashproof installation required)

UVC clarifiers for a clear view into the pond

Every garden owner is pleased with the clear and healthy water in their pond. But what happens when suspended algae or other particles turn the water green and lessen the enjoyment of the garden pond? This can be changed: Simply place the UVC clarifier in the water circuit of the pond – ideally in combination with your filter. The special UV light rays cause suspended algae, bacteria, and germs in the water to be killed off. If the water is then routed through a filter, these residues remain in the filter sponges and

the pond water becomes clear. This is where the Bitron Eco provides outstanding performance: In its innovative, organically shaped exterior, the water has a long sitting time and receives high intensive UV irradiation. This combination makes the high capacity of the Bitron Eco extremely effective. In addition, the Bitron Eco has an on demand automatic control system. In this case, the UVC is only activated when required, thus up to 50 % of energy costs can be saved (see page 143).

Advisor

UVC clarifiers

Vitronic The OASE Vitronic is the ideal entry to the world of UVC clarifiers up to 55 W. The algae pumped through the housing are safely eliminated. Thanks to the visual function check the status of the UVC bulb is always shown. Perfect connection to the BioSmart and BioTec flow-through filters (devices 18 – 36 W).

Bitron C With this UVC clarifier the integrated automatic cleaning rotor continuously cleans the quartz tube and thus ensures optimal UVC radiation. The bypass technology enables high flow rates and sufficient contact time. The Bitron C is the ideal supplement for the OASE flow-through filters with 24 – 110 W.

Bitron Gravity Particularly suited for demanding gravity fed applications, it shows its worth with not only outstanding 55 W power, but also with 100 % VDE certified safety. Virtually free of flow losses, the UVC device equipped with a stainless steel housing is a genuine alternative to the immersion lamps.

Bitron Eco The revolution among the UVC clarifiers with highest level of efficiency thanks to an even longer water dwell time. The irradiation times are regulated automatically and thus energy costs are reduced by as much as 50 %! The clever cleaning automation ensures permanent, intensive UV irradiation from 120 – 240 W.

Tip!

Performance of a UVC clarifier depends on the type of the pond and the amount of water in the pond. With the OASE rotary chart you easily find out which combination of filter pump, UVC clarifier and pond filter is suitable for your pond. Naturally your OASE stockist is also at your side in this regard.

VITRONIC *P. 250

Universal UVC clarifiers

Vitronic **11 W**

Vitronic **18 W / 24 W / 36 W**

Vitronic **55 W**

START

- Suitable for ponds up to 60 m³
- Elimination of suspended algae (green water)
- Reduction of harmful bacteria and pathogen level
- New: Direct installation on the BioSmart (only Vitronic 18 – 36 W)
- Visual function check of the UVC bulb
- Quick release for easy bulb change and cleaning of the quartz glass
- High quality workmanship with impact resistant plastic housing
- Easy installation thanks to an extensive range of connection accessories
- Incl. high quality UVC bulb
- 100%, VDE-certified safety; does not cause eye injuries

PRODUCT DETAILS

High quality UVC
The use of high quality UVC bulbs guarantees a long service life, and a constant effective irradiation capacity

Direct installation on the BioSmart (only Vitronic 18−36 W)
The Vitronic devices 18−36 W can now be directly mounted on the filter housing of the BioSmart and BioTec models.

Visual function check
Transparent connections and a function display on the bulb button, reliably indicate the bulb function.

Closure technology
Quick release for easy bulb change and cleaning of the quartz glass.

Extras

Top 3 product characteristics
- *Clear pond water via UVC clarification*
- *Highly effective against suspended algae, bacteria and germs*
- *Can be combined with almost all off the shelf filters*

Recommendation
The UVC bulbs should be changed at regular intervals, ideally in spring before the season starts, to guarantee the full strength capacity of the UVC light waves!

UVC clarifiers with patented self cleaning and bypass technology

Bitron C **24 W**

Bitron C **36 W / 55 W**

Bitron C **72 W / 110 W**

PRO

- Suitable for ponds up to 110 m³
- Elimination of suspended algae (green water)
- Reduction of harmful bacteria and pathogen levels
- UVC radiation is at its best at all times thanks to patented, autonomous bulb cleaning
- Bypass technology enables optimal irradiation of the polluted water, even at high flow-through rates
- Individual water flow adjustment for optimal adaptation to the connected filter pump
- Integrated magnets protect the UVC technology against limescale deposits
- Visual function check of the UVC bulb
- 100%, VDE-certified safety; does not cause eye injuries
- Quick release technology for easy bulb replacement
- High quality workmanship with impact resistant plastic housing
- Incl. high quality UVC bulb
- Including OASE-Clear Water Guarantee*P.250 in conjunction with the OASE flow-through filters, BioSmart, BioTec and ProfiClear

PRODUCT DETAILS

Automatic cleaning rotor
The automatic cleaning rotor is continuously guided around the quartz glass tube by the water flow and prevents debris from settling.

Closure technology
Quick release closure for easy opening of the bulb housing. A safety switch deactivates the UVC bulb automatically for protection against eye injury.

Throttle handle
Easy adjustment of the water flow rate.

Inspection window
The function of the UVC bulb can be checked at any time through the inspection window.

Extras

Top 3 product characteristics
- Clever bypass system combines high flow rates with duration of radiation
- Self cleaning thanks to patented cleaning rotor
- Highly effective against suspended algae, bacteria and germs

Recommendation
Do not forget to replace UVC bulbs regularly, ideally in the spring!

BITRON ECO *Eco* *PLUS* ***P. 250**

The most efficient UVC clarifier in its class

PRO

- Concentrated UVC power clears ponds up to 240 m³
- High intensity treatment of suspended algae, turbidity and harmful bacteria in the pond water
- Now with unique UVC bulb with 50 % longer service life (12000 h) – developed in cooperation with Philips
- High volume UVC housing with a new design and organic shape for a particularly long water dwell time
- Eco control system enables maximum energy efficiency with savings potential of up to 50 %[*2]
- More protection for the climate. Eco mode saves up to 525 kg CO_2/year[*2]
- UVC radiation is at its best at all times thanks to patented, autonomous bulb cleaning
- Intelligent bypass regulation automatically adapts the flow rate to the pump capacity in the filter system
- If desired, continuous irradiation or device switch off are possible at the touch of a button
- Clever UVC function monitor, display for bulb change and water temperature
- Protection class IP68 enables direct set up at the edge of the pond
- Simple connection to other 2" filter systems
- 100 %, VDE-certified safety; does not cause eye injuries
- Including OASE Clear Water Guarantee[*P.250] in conjunction with the OASE flow-through filters, BioSmart, BioTec and ProfiClear

PRODUCT DETAILS

Automatic cleaning rotor
The automatic cleaning rotor is continuously guided around the quartz glass tube by the water flow and prevents debris from settling.

Closure technology
The quick release closure now allows direct access to the bulb without dismounting the quartz glass. Replacement of the UVC bulb just takes a few minutes.

Automatic bypass regulation
The integrated bypass membrane regulates water distribution automatically based on the water flow and adapts itself to changing conditions, such as the Seasonal Flow Control system, for example.

Automatic control unit
It not only shows the actual status of your bulb and the water temperature, it also allows adaptation of capacity depending on the requirement.

Extras

Top 3 product characteristics
- Maximum efficiency, thanks to perfect combination of flow rate and irradiation intensity
- Reduced bulb costs thanks to 50% longer service life (12000 h)
- Energy costs reduced up to 50% with the same cleaning capacity*[2]

Recommendation
To enable optimal settlement of the filter biology, we recommend that switch off the UVC device for at least 24 h after using the BioKick filter starter bacteria.

Bitron Gravity inserted in the Individual module of the ProfiClear Premium system

BITRON GRAVITY *P. 250

Highly efficient – perfect for gravity fed filter systems

PRO

- Suitable for ponds up to 70 m³
- Extremely effective elimination of algae and pathogenic bacteria (to 12.5 m³/h) – similar to an immersion UVC
- 100%, VDE-certified safety; does not cause eye injuries
- Energy efficient thanks to electronic ballast
- Effective sterilisation, thanks to long water dwell time in the Bitron
- Flow optimised reactor design ensures direct and virtually loss free UV radiation
- High quality V4A stainless steel housing for stability and good reflection rates
- Extremely easy installation with stainless steel connection elements
- Flexible connection before or after the ProfiClear filter system – also for other gravity fed applications
- In the event of pond enlargements or increase in koi stock, extension with additional Bitron Gravity UVC devices is possible at any time
- Visual function check
- Horizontal or vertical setup possible
- Incl. 2 x DN 110 quick release couplings, easy to install
- With the adapter set (18127) it is also suitable for pump fed operation
- Clear Water Guarantee*P.250 when used in conjunction with OASE ProfiClear filters

PRODUCT DETAILS

High quality V4A stainless steel housing
provides stability and good reflection rates. Can be used even with increased salt content (dry setup).

Easy installation with
stainless steel connection elements.

Flexible installation
possible before or after the filter system. Also ideal for other gravity fed applications.

Extras

Top 3 product characteristics
- Powerful, efficient UVC clarifier
- Extremely effective sterilisation thanks to well thought-out flow optimisation
- Extremely easy and flexible installation before or after the filter system

Recommendation
Do not forget to replace UVC bulbs regularly, ideally in the spring!

Perfect for gravity fed filter systems on koi ponds.

Can be optimally integrated in the ProfiClear Premium system.

*1 Note: When planning a new pond with koi stock, please ensure a minimum pond size of 5 m³!

Pond aerators:
For oxygen in the pond

Every creature needs air to breath, for growth, and to thrive. In a garden pond oxygen, in particular, is of vital importance because many different creatures can make this small space their home. This variety of fish, plants and smaller organisms consume a lot of oxygen, particularly in the summer months. Consequently in the warm season we recommend that owners support their pond through the use of pond aerators.

Discover the classic AquaOxy, which in some cases can even be set up outdoors. Complete new design here the OxyTex with a clever double function as oxygen supplier and filter medium in one. In a filter system the pond aerators are an ideal supplement, because even the small microorganisms in the filter sponges profit from the additional oxygen. Particularly in summer animals and plants can breathe deeply!

Advisor

Pond Aerators

AquaOxy the classic among the aerators for ponds up to 50 m³ or with a high fish stock. In the summer season it can be set up completely independently of the weather – the AquaOxy 4800 must be protected from splashing water.

OxyTex Through its plant like appearance the pond aerator is integrated seamlessly in the water landscape. With the use of the OyxTex, in addition to the large surface and extra oxygen the filter capacity is increased by up to 25%. It is also available with an aerator pump in a set.

Filters & Aerators

Pond Aerators

AquaOxy

Flexible oxygen supply for ponds

AquaOxy **500**

AquaOxy **4800**

- Suitable for ponds up to 50 m³ or with high fish stock
- Special safe 12 volt technology for AquaOxy 1000 – 2000
- Optimal oxygen supply for pond flora and fauna
- Robust motor and high quality UV stabilised housing
- Reduced noise, energy efficient operation
- Flexible location thanks to long hose length
- Easy handling
- Included in the scope of delivery: Air stones and replacement membrane set

From AquaOxy 1000
- Air stones are wear free
- Infinitely adjustable air outflow rate

AquaOxy 4800
- Crafted with high quality aluminium housing
- Can be used as ice preventer

PRODUCT DETAILS

Air stones
Ensure high volume, uniform dissipation of oxygen into the water through newly designed air guidance channels. The AquaOxy 240 and 500 are delivered with a classic air stone.

Regulating valves
For connection of the silicon hoses. Easy, infinite adjustment of the oxygen rate is possible.

Except AquaOxy 240 / AquaOxy 500

Extras

Top 3 product characteristics
• Outdoor setup possible (AquaOxy 4800 must be protected against splashing water)
• Special reduced noise motor technology
• Aerator function for supplying the entire pond with oxygen

Recommendation
The AquaOxy aerator pumps are optimally matched to the OxyTex. With the AquaOxy 4800 an OxyTex can be used at depths to 3 m.

OXYTEX / SETS

Pond aerator and filter medium in one

OxyTex **Set 500**

OxyTex **1000**

- Unique combination of oxygen supply, water circulation and nutrient decomposition
- Ample space for microorganisms thanks to surface optimised fibre structure
- Ideal supplement for the FiltoMatic CWS and FiltoClear filter capacities can be increased up to 25%
- Attractive plant effect design
- Optimised for connection to existing aerator pumps (incl. adapter for 9 mm hoses)
- Connection ready complete sets with aerator pump AquaOxy and OxyTex
- Patent applied for

PRODUCT DETAILS

OxyTex
The OxyTex as standalone product for previously installed aerator pumps. Incl. adapter for 9 mm hoses.

OxyTex Set 500
The OxyTex Set 500, consisting of an OxyTex 400 and a high performance AquaOxy 500 pond aeration pump.

OxyTex Set 1000
The OxyTex Set 1000, consisting of an OxyTex 1000 and a high performance AquaOxy 1000 pond aeration pump.

OxyTex Set 2000
The OxyTex Set 2000, consisting of two OxyTex 1000 units and a high performance AquaOxy 2000 pond aeration pump.

Extras

Top 3 product characteristics
- Increases overall filter capacity up to 25 %
- Unique combination of aeration, circulation and settlement surfaces
- Harmonises with the surroundings thanks to plant effect design

Recommendation
With an AquaOxy 4800 (page 149), either up to four OxyTex 1000 units can be operated at a max. depth of 1.5 m, or a single unit can be operated at a max. depth of 3 m. The individual OxyTex 400 and 1000 units can be operated with a max. air displacement rate of 500 or 1000 l/h. Here as well the AquaOxy 500 − 4800 (page 149) are optimally matched.

Schematic diagram: Pond aerator **AquaAir 250** in use – distributes oxygen in the pond

AQUAAIR 250

Focussed oxygen enrichment – easy installation

- Suitable for pond surfaces up to 250 m²
- Adjustable injector nozzle for optimal oxygen input with depth penetration to 4 m
- High turnover rate bring standing water into life
- Extremely long service life thanks to high-quality workmanship with stainless steel elements
- Low noise underwater operation
- Fastening material included in the scope of delivery
- Optimal oxygen supply thanks to small bubbles

Product details

Injector nozzle
Adjustable injector nozzle for focussed oxygen input to aerate the pond.

Professional oxygen supply
Powerful pump with professional Venturi principle enables optimal oxygen supply in small bubbles.

Stainless steel basket
High quality design with corrosion-resistant filter basket and suspension element.

Fastening material
Easy and secure anchoring of the aerator thanks to the fastening material included in the scope of delivery. (2 x 20 meter, 3 mm thick)

Extras

Top 3 product characteristics
- Injector nozzle for oxygen distribution even on the pond floor
- Penetration depth to 4 m
- High quality, durable workmanship with stainless steel

Recommendation
Pay attention to the placement of the AquaAir – it performs to its full capacity in quiet edge areas that are particularly low in oxygen where air flow is inadequate.

Before: Standing water with excessive algae formation

After: Uniform oxygen enrichment plus circulation

Technical data

Application examples: Three different nozzle pattern sizes are included in the scope of delivery.

AirFlo

Strong combination of oxygen supply and fountain for ponds and large bodies of water

- Floating aerator for oxygen supply through powerful water patterns for water surfaces up to 15000 m²
- Axial propeller technology for water flow rates up to 295000 l / h
- Maximum oxygen supply for the body of water
- Easy installation and maintenance through bayonet technology
- Foamed float for extraordinary stability and noise reduction
- Pump basket of corrosion resistant stainless steel
- Included in the scope of delivery: Fastening set, as well as 3 »Trumpet« type nozzle attachments
- Lighting sets with stainless steel holder available as an accessory

154

PRODUCT DETAILS

Bayonet technology
for easy mounting.

Fastening material
Easy and secure anchoring of the aerator thanks to the fastening material included in the scope of delivery. (3 x 30 meter, 3 mm thick)

Earthing pin plug + control box
The 230V version is delivered ready to operate with control box.

CEE connector + protection switch
The 400 version comes with a ready to connect, 5 pole CEE connector and motor protection switch.

Extras

Top 3 product characteristics
- *High performance aerator and decorative floating fountain in one*
- *Fast and easy installation*
- *Variable number of lights (max. 3 x 3) can be retrofitted*

Accessories

Illumination set MIDI / MAXI / AirFlo LED / 01

This set supplies an atmospheric, illuminated fountain in the twilight hours and consists of:
- *3 LunAqua 10 LED spotlights*
- *3 stainless steel holders*
- *1 underwater transformer incl. special holder*
- *50 m cable*

Cleaning & Care

Cleaning and care: Practical helpers for all seasons

True beauty comes from within. This also applies to garden ponds: Assuring the quality of your pond water is crucial for the overall biological balance. With OASE you easily succeed in this regard.

Throughout the year your pond experiences different development phases and in the process is subjected to a variety of changes. The products of the OASE pond care prod-uct line provide totally individual support when these changes occur. These include the clever pond vacuums and skimmers. They remove coarse debris before it affects the water quality. Nevertheless, should debris sink to the bottom, pond vacuums of the PondoVac series are the equipment of choice. The new PondoVac Premium offers an extremely high suction capac-

»The best care for my pond!«

PondoVac Premium

Unbeatable suction power and convenient operation.

ity. At 20000 litres per hour it is perfect for the professional sector and fulfils the most rigorous requirements. It is particularly convincing in its continuous operation, as the suction capacity is independent of the emptying process. In winter the extremely powerful ice preventers, IceFree Thermo 200 and 330 ensure that surfaces are free of ice. Also discover the extensive and competent

AquaActiv pond care product line. Give your pond the direct support it needs with clever products. With the products from the OASE 3-Step Plan, you can respond appropriately to the result of the water quality check, and sustainably keep your garden pond free of algae. Learn more on the following pages.

The pond care team: Practical and reliable for healthy water

Falling leaves, branches and pollen make the water surface murky and allow algae to grow. This is where products, such as skimmers that remove contamination before it sinks to the bottom, or also PondoVac pond vacuums that free the pond floor of silt, can help. The new PondoVac Premium, which even satisfies professional requirements, is particularly powerful. The helpers, such as pond pliers, nets or leaf nets are perfect for smaller implementations. In this regard, the new EasyPick where no branch is out of reach, is practical.

EASYPICK The new telescopic premium EasyPick pond pliers are the ideal companions for care tasks all around the pond. Branches and leaves that protrude into the water should be removed regularly. This is easily and safely possible with the EasyPick pond pliers, and thanks to their telescopic handle, it is possible at a distance of up to 2 meters! Discover additional pond helpers, starting on page 168.

Advisor

Pond & Pool vacuums

NEW

PondoVac Premium The pro among pond vacuums is impressive with a suction capacity of 20000 litres an hour and a maximum particle size of 50 mm. Here the most rigorous professional requirements are fulfilled, this product was designed particularly for continuous use on large ponds or pools. This is enabled through the concurrent suctioning and emptying of the 95 l tank.

PondoVac 4 This convenient pond and pool vacuum, is equipped with 5 suction nozzles and also with high-quality aluminium suction pipes. With rated power of 1700 watts, it vacuums continuously at a maximum depth of 2.4 m. It is also practical as a wet vacuum in the household.

20% more power

Surface Skimmers

SwimSkim 50
The floating skimmer powerfully cleans a pond surface of up to 50 m². Thanks to its unique outlet and aerator functions, sedimentation on the pond floor is prevented and in addition, oxygen is introduced into the pond.

AquaSkim This stable skimmer ensures clear water surfaces for ponds up to 40 m². Ideally connected on the AquaMax Eco Premium, it powerfully pulls debris particles into a collection basket that can be easily removed for cleaning.

Ice Preventer

An Ice Preventer in winter ensures that there is a gap in the ice cover. This gap allows harmful fermentation gases to escape and ensures oxygen exchange. Your pond inhabitants get safely through the winter. The perfect solution for extreme minus temperatures and shallow ponds are the powerful **IceFree** ice preventers. Read more on page 176.

SwimSkim

Floating for clear water surfaces

SwimSkim 25

SwimSkim 50

Eco

- Powerful suction cleaning of pond surfaces up to 50 m²
- The result is clearly improved water quality and viewing depth through direct removal of pollutants on the surface
- Integrated injector that enriches the pond with oxygen
- Extremely strong suction
- Including whirlpool function for avoidance of floor sedimentation, for SwimSkim 50
- Easy cleaning with basket removal
- Automatic adaptation to any water level (from 40 cm water depth)
- Special energy saving motor technology for SwimSkim 50

160

Product details

Cleaning
The accumulated debris can be easily removed by taking out the basket

Patented flap technology
The unique skimmer flap directed to the inside, generates powerful suction and sucks up leaves and other surface debris.

Whirlpool and aerator function
With the SwimSkim 50 the integrated whirlpool function, if desired whirls up deposits on the floor of the pond and feeds them to the pump. In addition, both models enrich the water with vital oxygen and improves the water quality.

Extras

Top 3 product characteristics
- Powerful suction cleaning of pond surfaces up to 50 m²
- Integrated aerator function for oxygen supply
- Easy and convenient cleaning

Recommendation
The SwimSkim 50 can be fixed in place either on the pond floor or with the provided ground stakes at the edge of the pond.

Extras

Top 3 product characteristics

- Powerful suction cleaning of pond surfaces up to 40 m²
- Adaptation to changes in the water level to 120 mm
- Supplement in the entire filter system

Recommendation
The AquaSkim is the ideal supplement for the filter pump AquaMax Eco Premium.

AquaSkim

Variable stationary and gravity fed skimmer

- Powerful suction cleaning of pond surfaces up to 40 m²
- The result is clearly improved water quality and viewing depth through direct suction removal of pollutants on the surface
- Base with large surface receptacle shell for rocks as ballast
- AquaSkim 20 – ideal for use on the AquaMax Eco Premium 4000 – 8000

- AquaSkim Gravity with high quality DN 160 / 110 adapter for easy integration in DN 110 line systems
- Easy maintenance with easily accessible coarse debris basket
- Debris basket can also be taken out from a distance via grip hooks
- Adaptation to differences in the water level to 160 mm
- Ideal combination with AquaMax Eco Premium filter and watercourse pumps

Extras

Top 3 product characteristics

- *Powerful suction cleaning of pond surfaces up to 50 m²*
- *Easy accessibility at the edge of the pond*
- *Rock look cover fits perfectly in the pond landscape*

Recommendation
For the best possible result, surface skimmers should be installed on the side of the pond that is away from the wind.

BioSys Skimmer +
Skimmer for installation on the pond edge

- Powerful suction cleaning of pond surfaces up to 50 m²
- Permanent installation directly at the edge of the pond
- Easy installation through joining the unit onto the pond liner

- Convenient cleaning thanks to easy removal of the coarse debris
- Compensation of water level fluctuations up to 100 mm
- For operation with AquaMax Eco in integrated pump chamber
- Included in the scope of delivery: Cover in natural rock look

50 m²

163

Schematic diagram: **ProfiSkim 100** in use

Extras

Top 3 product characteristics

- Powerful suction cleaning of pond surfaces up to 80 m²
- Can be used with large filter systems and shallow water zones
- Perfect dimensions for large quantities of water

Recommendation
Ensure that the skimmer is installed in a horizontal position and confirm this with a spirit level. Place the skimmer in such a manner that you can execute maintenance tasks, such as emptying the basket.

PROFISKIM

The pro for the shallow water zone

- Powerful suction cleaning of pond surfaces up to 65 m² or up to 80 m²
- Ideal implementation in shallow water zones
- Can be used in gravity fed operation (DN 110) or pump fed operation (incl. 2" adapter)
- Water routing for effective suction capacity
- Perfect supplement for filter systems in the gravity fed, as well as the pump fed system

- Large, easy to clean stainless steel basket with 8 mm mesh width. On request, a debris basket with 2 mm mesh width is available for the ProfiSkim Premium.
- ProfiSkim Premium with stable stainless steel base for even easier installation

PondoVac Classic

Wet and dry vacuum for pond and household

START

- Silt removal through powerful 1400 W motor
- Automatic activation and emptying through clever motor control
- Compact design with 27 litre wastewater tank
- Transparent suction tube for flow through control
- Maximum suction depth of 2 m
- Suction capacity up to 3000 l/h, depending on the implementation conditions
- Included in the scope of delivery: 4 suction pipes, 4 different suction nozzles (see details), 1 filter bag, 1 coarse debris collection sack and 4 m suction hose and 2 m drain hose

166

Product details

Scope of delivery
With 4 suction pipes (3 x black, 1 x transparent), 4 suction nozzles, (variable universal nozzle, special string algae nozzle, flat nozzle with rubber lip and crevice nozzle), 4 m suction hose and 2 m discharge hose, 1 filter bag for dry vacuuming and 1 coarse debris collection sack.

Switch
Illuminated rocker switch for starting the vacuum process.

Plug connections
For fast installation of the suction and discharge hoses.

Quick release
For easy removal of the motor unit.

Extras

Top 3 product characteristics
- Maximum suction depth of 2 m
- Automatic activation and emptying through clever motor control
- Multifunction use for pond, pool, and household

Included in the scope of delivery

Universal nozzle
The all round product (2−10 mm) removes pond floor debris without vacuuming up the gravel.

Special string algae nozzle
With this nozzle, strands of string algae can be separated and easily removed.

Flat nozzle
The flat nozzle has rubber lips that permit trouble-free wet suctioning of residual water, or enables use in the household as a dry vacuum.

Crevice nozzle
Pollutants between stones and plants can be suctioned out with ease.

Wastewater discharge
Simply dispose of it as »organic fertiliser« in a flower bed or the sewer.

Cleaning & Care

Pond & Pool Vacuums

PondoVac 4

Convenient and effective –
without any disturbing interruptions whatsoever

PRO

- Vacuum non stop thanks to the patented two chamber system – simultaneous vacuuming and emptying of the tank
- Maximum suction depth of 2.4 m thanks to high performance 1700 W motor with optimised blade geometry
- Can be used for cleaning garden ponds, pools and swim ponds as well as a wet vacuum in the household
- Transparent suction tube for flow through control
- Easy to move with transport rollers and adjustable handle
- Hand regulator for adjusting the suction power
- Suction capacity up to 5000 l/h, depending on the implementation conditions
- Included in the scope of delivery: 4 robust aluminium tubes, special string algae nozzle, broadened universal nozzle, wet suction brush, brush nozzle, debris collection bag, 5 m long suction hose and 2.5 m long discharge hose

168

PRODUCT DETAILS

Two chamber system
Two same size cylinders are filled and emptied in alternating cycles. This enables non stop vacuuming.

Hand regulator
For adjusting the suction power, for example in shallow water.

Wastewater discharge
Simply dispose of it as »organic fertiliser« in a flower bed or the sewer.

Handle, transport rollers + suction tube receptacle
Fast and convenient transport to the pond site via the adjustable and ergonomic handle.

Debris collection bag
Ideal for returning cleaned water when suctioning larger particles > 1 mm (not suitable for pond silt).

Extras

Top 3 product characteristics
- Continuous vacuum thanks to patented two chamber system
- Maximum suction depth of 2.4 m
- Also ideal for cleaning pools and swim ponds

Recommendation
High-power suction to a depth of 2 m

Included in the scope of delivery

Universal nozzle
The all round product (2–10 mm) removes pond floor debris without vacuuming up the gravel.

Special string algae nozzle
With this nozzle, strands of string algae can be separated and easily removed.

Area nozzle
With rollers, integrated brush and weight for large areas such as in pools or swim ponds.

Brush nozzle
For corners and stubborn debris.

Wet suction nozzle
Wet suction for indoors and outdoors.

Accessories

Extension discharge set PondoVac
2.5 m hose with connection union and collection bag for coarse debris particles.
Not suitable for pond silt!

PondoVac Premium

High-performance skimmers for professional pond and pool cleaning

PRO

- Can be used for cleaning garden ponds, pools and swim ponds – also for commercial applications
- Extremely strong suction capacity with up to 20000 l / h – without interruption
- Unusually quiet suction operation of the turbine < 60 dB (A)
- The large, 95 l tank is emptied via sensor control with a digital fill level indicator.
- Manual control of turbine and feed pump via control buttons is possible
- Flexible movement thanks to the robust chassis with four solid rubber wheels and parking brake
- Innovative and reliable product »Made in Germany«
- Optionally available: Extensive and practical accessories in heavy-duty quality for daily professional use

PRODUCT DETAILS

Strong feed pump
The integrated feed pump with a capacity of 27000 l/h is a real powerhouse and pumps particles up to 50 mm in size.

Clearly organised operating panel
The clearly organized operating panel is impressive with easy handling; the fill level is displayed via LED and the pump and suction turbine are controlled from the panel.

Convenient chassis
Extremely robust, the four-wheel chassis with solid rubber wheels handles any unevenness and can also be firmly fixed in place thanks to the parking brake.

Drain with C-connection
On the pressure side, the PondoVac Premium has an aluminium C-connection for the drain hose – reliable and sealed.

Easy cleaning
The flexible connections enable access to the tank without bothersome disconnection of the connecting lines.

Extras

Top 3 product characteristics
- Pond and pool cleaners with extremely strong suction capacity of 20000 l/h – perfect for professional use
- Full power without interruption, thanks to separate suction and pump function
- Quiet continuous operation thanks to slow-turning suction turbine

Accessories

Floating suction hose PondoVac Premium
Floating suction hose with a length of 12 m convinces with robust workmanship and an extremely smooth inner wall surface for particularly effective suction results. 50 mm diameter union on both ends.
Item no. 40301

Discharge hose extension – PondoVac Premium
Compact discharge hose with rubberised surface, 10 m length and C-coupling on both ends.
Item no. 40302

Discharge hose, dimensionally stable – PondoVac Premium
Safe to tread on, kink-resistant discharge hose with 10 m length. Thanks to the C-couplings on both ends extension of up to 30 m is possible with additional hoses
Item no. 41298

Telescopic pole PondoVac Premium
Thanks to the three-piece adjustment element, lengths between 1.8 m and 4.8 m can be easily adjusted. Including quick-connector and plastic handles.
Item no. 40303

Suction bell PondoVac Premium
Sludge vacuum with transparent poly carbonate bell and rotating 39/50 mm connection. Ideal for gentle cleaning of gravel surfaces.
Item no. 40304

Wide area nozzle PondoVac Premium
Heavy, 4 kg area nozzle with 480 mm width for cleaning large areas, e.g. pools or swim ponds. Including a clever articulated mechanism for the transition between floor and wall.
Item no. 40307

Round nozzle PondoVac Premium
Transparent round nozzle for suctioning up sludge or leaves. With 50 mm diameter.
Item no. 40305

Flat nozzle PondoVac Premium
Transparent flat nozzle for stronger suctioning of sludge on the floor, for example. With 80 mm diameter and 50 mm connection.
Item no. 40306

Extras

The tool duo
Regular care is important for the healthy growth of plants in and on the pond. For this we recommend the Flexi Cut 2 in 1 pond scissors, with which the cuttings can be firmly held and cut. Thus plant remains can also be easily removed from the water. Also, branches or leaves at a distance of up to 2 meters can now also be conveniently grabbed with the new EasyPick telescopic premium pond pliers. This is what we mean by easy work on the pond!

Recommendation
A minimum water depth of 80 cm is recommended for reliable operation of the IceFree 20.

ICEFREE   *Ensure your pond is safe this winter*

- To −20 °C an ice free area is generated around the float body
- Ensures oxygen access to the water and allows harmful fermentation gases to escape
- Extremely energy-efficient pump technology without additional heating element for the IceFree 20 (requires a depth of at least 80 cm)
- Maintains the warm temperature zones on the floor, particularly with the IceFree Thermo models

- The IceFree Thermo with an active heating element is also suitable for shallower ponds, as well as for continuing cold periods with freezing temperatures
- IceFree Thermo 330 contains an integrated frost monitor function. It activates the device only when there is danger of frost. This means energy is not consumed on warmer days.
- Resistance heating technology for higher performance in the freezing range, and protection against temperature damage on air

Pond care – it's easy
Suitable helpers for any season

Spring, summer, autumn and winter: Each season has its peculiarities, and thus the garden pond also requires appropriate care. We have put together several tips for seasonal cleaning and care to ensure enjoyment of your pond throughout the year, to ensure the well-being of the fish and that the natural balance remains intact.

Spring: Getting started! At the start of the season there are some things to do. Now it is time for water cleaning and plant care. Optimal water conditions can be easily achieved with the basic care product AquaActiv OptiPond, and you can really get the filter biology moving with the BioKick filter starters. The algae net removes bothersome pond growth, and to prevent subsequent algae growth simply suction up any silt on the pond floor, ideally with the PondoVac 4. Bring on the summer!

Summer: The motto for this season is: As little as possible and as much as necessary. Only intervene in a support capacity, in order to maintain the beauty of your garden pond for as long as possible and to prevent the body of water from spoiling. Remove undesired leaves and string algae, and cut back plants that have blossomed with the FlexiCut 2 in 1 pond scissors, so that the water quality is not impaired due to excess nutrients from the roots. In this season a surface skimmer not only ensures a good view of your fish, it also ensures better water quality. Ensure the water level is topped up, if the quantity of water is reduced due to evaporation in dry spells. Keep the filter system, as

well as watercourses running 24 hours per day. So your pond will be supplied with important oxygen. And then: Enjoy the most beautiful time of year at your pond!

Autumn: In the Autumn things get serious: Use of effective pond helpers is now required. Remove silt and other sediments (e.g. with the PondoVac 4) and remove the plant remains. Now strengthen the fish for the winter with QuickFit and cover the garden pond with the AquaNet pond net; the net prevents leaves from blowing into the pond, sinking to the bottom, and prevents excessive nutrient input from impairing the water quality.

Winter: Naturally winter is the quietest time of year. This also applies for the pond and its care. Nevertheless, you should prepare the garden pond and its inhabitants for colder temperatures and frost. The fish in the pond need a depth of at least one metre, so that there is sufficient space for settlement and warmer zones in spite of the layer of ice. Always ensure that there is a small hole in the ice cover, so that pond inhabitants can breathe and fermentation gases can escape. A practical ice preventer from the IceFree series (page 176) helps in this regard. Using PhosLess inserts during the winter removes excess phosphates and thus prevents algae growth in the new season. Also remember to make the entire filter system winter-proof in accordance with the recommendations – this ensures that your garden pond and its inhabitants are prepared for the cold season.

& Google Play Store

AquaActiv: Clear living water

The sensitive pond biology is frequently burdened by excessive fish stock, rainfall and too much sunlight or leaves. The consequences are poor water quality, excessive algae and silt formation or even fish disease. AquaActiv is effective treatment against these factors and restores the biological balance in the pond. You can help your pond to help itself. The entire concept of the successful pond care series has been optimised and extended Innovative products, developed based on our years of experience, and with support from recognised experts, have been added.

The AquaActiv **3 Step Plan** shows you the biologically effective path to an algae free pond and allocates the AquaActiv products to steps A, B, or C. In this plan the two first steps ensure decomposition of the excess nutrients, step C contains algaecides that you can subsequently use if steps A and B are not successful.

A — IMPROVING WATER QUALITY

B — BINDING NUTRIENTS

C — CONTROLLING / PREVENTING ALGAE

D — DISINFECTION

Fast, effective and clear – disinfection for some ponds or water pools

Biofilm formation, microorganisms or algae growth on the surface can cloud the enjoyment on the modern garden. Correctly dosed, the OASE disinfection products keep bodies of water, such as swim ponds, architectural pools or ornamental fountains clear and fresh. However, ensure that these agents are not used on fish ponds or biotopes.

Tip!

Clear division of the products facilitates the selection
In addition, there is extra talent behind the clever bottle concept; the supplemental container has three functions:
1. *Measuring cup*
2. *Storage space for useful accessories that come with the product, such as test strips or instructions for use*
3. *Storage compartment for 2-component products, such as »BioKick Fresh«.*

Tip!

Your direct path to ideal water values:

If you want to know precisely what the status of the water quality is in your pond, with the new OASE Online Laboratory you get the analysis of individual parameters and best of all — you also get helpful tips and recommendations:

www.oase-livingwater.com/onlinelabor

WATER ANALYSIS

For safe monitoring of water values

AquaActiv	QuickSticks 6 in 1	Water analysis Profi-Set
Description	• For fast, simple, and reliable water analysis of the 6 most important values • One minute is all it takes • Suitable for testing approximately 50 water samples (300 parameters)	• Professional drop solutions for precise determinations of all important pond parameters • Phosphate test incl. shelf life check solution • Incl. measurement accessories, colour charts, and useful application instructions • Delivered in a modern plastic case
Simple and accurate determination of:		
pH value	•	•
Total hardness (GH)	•	•
Carbonate hardness (CH)	•	•
Nitrite (NO_2)	•	•
Nitrate (NO_3)	•	•
Phosphate (PO_4)	–	•
Ammonium (NH_4)	–	•
Ammonia (NH_3)	–	•
Chlorine (CL_2)	•	–

Extras

Ampoule opener

Now it is even easier to open the BioKick Premium glass ampoules. Simply fit on the convenient, well-designed opener – press and the filter starter is easy to apply.

STARTER CULTURES

For use in filter and pond

AquaActiv		BioKick			BioKick fresh	BioKick Premium
		Starter cultures				High-performance bacteria for pond filters
Container size		100 ml	200 ml	2 l	500 ml	4 x 20 ml
Suitable for ponds up to max. m³		5.0	10.0	100.0	10.0	40.0
Description		• Wakes up the biology in the filter in the spring or for a new start • Detoxification of nitrite, ammonium, and ammonia starts immediately • Also recommended for post dosing if some of the water is changed or after cleaning the filter • Follow up dose is not required • Easy to use • Free of pathogens • More than 10 million active micro-organisms / ml * • Ideal for near natural garden ponds • Full capacity of the pond filter within a few weeks			Like BioKick, however: • Combination of dry cultures and nutrient solution • Long lasting and highly active • Now ready to start after just 20 minutes through significantly increased number of bacteria • Maximum freshness; the microorganisms are activated just before use • Follow up dose is not required • Fast decomposition of ammonium / ammonia, nitrite and nitrate • Ideal for activating filter systems, particularly if there is fish stock • More than 1 billion active microorga-nisms /ml solution* • Ideal for ponds with moderate fish stock • Sufficient decomposition capacities in the filter within 2 weeks • Contents: 450 ml nutrient solution + 50 ml bacteria concentrate	Like BioKick, however: • Liquid preparation with highly concentrated, autotrophic bacteria strains and enzymes • Contains natural ammonium oxidising bacteria (AOB) and nitrite oxidising bacteria (NOB) • Packaged in medical glass ampoules. In spite of an incredibly high bacteria density, it can be stored uncooled for 36 months • One ampoule suffices for 10000 litres of pond water. Overdosing accelerates the running-in period • More than 50 million active microorga-nisms / ml * • This corresponds to 1 billion bacteria per ampoule* • Ideal for highly stressed ponds, particularly with koi stock • Full capacity of the pond filter within a few days • New: Including ampoule opener
Optimal supplements				OptiPond, Safe & Care

BINDING NUTRIENTS

AquaActiv		PhosLess Direct		PhosLess	PhosLess
		Algae protection with immediate effect		**Algae protection**	**Algae protection Refill pack**
Container size		500 ml	5 l	2 l filter media tubes	2 bags 1 l
Suitable for ponds up to max. m³		10.0	100	40.0	
Suitable for ponds with fish stock m³		10.0	100	10.0	
Description		• Binds excess phosphates and thus naturally reduces algae growth • Binds hydrogen sulphides that can cause bad odours • Easy to spread on the pond surface • Keeps phosphates in anaerobic zones, such as pond silt • 100 ml bind up to 80 g of phosphates!		• Binds excess phosphates and thus naturally reduces algae growth • Effective through 2-component technology in the exchange system • Binds harmful heavy metals like copper, lead or zinc • Can be used in the BioTec 18/36 filters, as well as in moving water • Dimensions per filter media tube 310 x 86 mm	• 2 1 l bags PhosLess CA and PhosLess FS • Suitable for use in larger bodies of water • Replacement medium for PhosLess filter media tubes • Can also be directly applied in moving water • Ideal in ProfiClear Premium
Item no.		51284	51287	36981	57477

BINDING NUTRIENTS

AquaActiv		PondLith	AquaHumin
		Natural ammonia removal	**Biological algae protection**
Container size		2.5 kg	10 l
Suitable for ponds up to max. m³		2.5	10.0
Suitable for ponds with fish stock m³		1.30	10.0
Description		• Zeolite based natural product • Special high performance filter material • For decomposition of ammonium, nitrite and nitrate • Grain size 5 - 10 mm • Withdraws the nutrient base for green algae • Effective for approximately 125 days • Per m³ pond volume 1 kg (without fish stock), 2 kg (with fish stock) or 3 kg (for koi ponds)	• Special peat for the garden pond • Free from chemical additives, nematodes, pathogens and substances that are toxic to plants • 30% – 45% humic acid • Softens the water and reduces the pH value • Restores the biological balance • Prevents excessive algae growth • Delivered in the practical net bag
Item no.		54049	53759

Recommendation
Many AquaActiv products are also available in attractive large containers.

CONTROLLING ALGAE

AquaActiv		AlGo Universal Algae control			AlGo Greenaway Green water clarifier	AlGo Direct String algae control			AlGo Bio Protect Biological algae protection
Container size		250 ml	500 ml	5 l	500 ml	250 ml	500 ml	5 l	500 ml
Suitable for ponds up to max. m³		5.0	10.0	100.0	10.0	5.0	10.0	100.0	10.0
Description		• Safely effective against the most frequently occurring algae types, string algae, suspended algae, and slime algae • Inhibits photosynthesis of the algae; algae starves • Effective without controversial copper additives • Harmless for plants and animals when used properly • Prevents further algae growth • Use biocides carefully. • Always read the label and product information before use!			• Highly effective elimination of suspended algae and removal of mineral and organic substances that cause turbidity • 2-phase active ingredient clears green/murky water quickly and safely • Effective against fine, non-filterable pollutants such as phosphates and heavy metal combinations • Accumulated flocculated material is simply skimmed off with a net • Effective without controversial copper additives • Harmless for plants and animals when used properly • Contents: 500 ml algaecide effective solution + 50 ml flocculation concentrate • Use biocides carefully. Always read the label and product information before use! • Use biocides carefully. • Always read the label and product information before use!	• Particularly for local and fast treatment of string algae, e.g. in watercourses • Works through direct contact • Microorganisms decompose dead algae • Includes pH/GH quick test • Active ingredient decomposes to oxygen and water within a short time, consequently use in swim ponds is possible • Effective without controversial copper additives • Use biocides carefully. • Always read the label and product information before use!			• Physically inhibits algae growth due to sunblock effect • Contains a humic acid complex of natural raw materials • Free of heavy metals and biocides • Generates a barely perceptible amber colour, the vital UV light supply for the algae is significantly reduced • Protects against excessive algae growth

Extras

Category D – Disinfection **D**

In many gardens, water has now become a permanent component of modern garden design. The range extends from small ornamental fountains to large architectural pools. However the typical challenges associated with an artificial body of water, such as biofilm formation, odours, microorganisms or algae growth on the surface, develop very quickly. For most garden owners this is an irritation, since for modern garden design in particular, clear pools are the main focus. Correctly measured, the Category D disinfection products ensure a body of water that is as sterile as possible and keep swim ponds, architectural pools or ornamental fountains sustainably clear and fresh. However, please note that these disinfectants must not be used in fish ponds or biotopes.

Now brand new in this category is also the cleaning agent PumpClean for efficient removal of contamination and lime scale from your OASE pond pump.

DISINFECTION / CLEANING AGENTS

AquaActiv **D**	AlGo Fountain Ornamental fountain clarifier		OxyPool 9.9 % Cleaner for lager ponds and swim ponds	PumpClean Pond pump cleaner
Container size	500 ml	5 l	20 l	500 ml
Suitable for ponds up to max. m³	0.2	10.0	100.0	–
Description	• Fast help against algae and odours in ornamental fountains, decorative pools and water features • Keeps the water fresh and clear • Also effective against biofilm formation • Prevents limescale deposits • Compatible with surfaces and technology • Protects against bacteria and fungus • Long lasting effect • Use biocides carefully. Always read the label and product information before use! • New: 5 l concentrate for pools to 10000 litres • **Use biocides carefully.** • **Always read the label and product information before use!**		• Efficient water cleaner with the active ingredient hydrogen peroxide 9.9 % and silver ions • Eliminates algae and acts against bacteria and fungus • Suitable for ornamental ponds, swim ponds, spray fountains and water features • Leaves, silt, algae and calcium deposits float to the surface and can be removed. • 100% biologically degradable, without chlorine and alcohol additives • Colourless and odourless • Use biocides carefully • **Use biocides carefully.** • **Always read the label and product information before use!**	• Effective pump cleaner for cleaning pond pumps • Reliably removes lime scale and other deposits within 24 hours • Free of chlorine and vinegar • Also ideal for cleaning UVC quartz glass and ProfiClear Premium sieves • Easy application - mixed with 9.5 l water results in 10 l descaling solution • 100% biodegradable • Colourless and odourless.

ILLUMINATION & POWER

ILLUMINATION & POWER: FASCINATING LIGHT AND STATE-OF-THE-ART TECHNOLOGY

Every garden owner looks forward to the quiet evening hours; to enjoy relaxing outside alone or with friends. The flexible, economical lighting sets from OASE provide atmosphere.
Bring the evening hours in the garden to life with a variety of possibilities from OASE. With well-placed flood lights or spotlights, such as the OASE LunAqua series, trees and shrubbery can be highlighted and the garden can be made luminous. For example, the LunAqua Terra LED light fixture can be discretely installed in the ground without posing a stumbling hazard. Thanks to its small dimensions, the modern LED technology offers flexible design and setup

»*Garden control –*
conveniently from
the terrace!«

FM-Master WLAN

power management
is even more
convenient as
an **App** !

possibilities on terraces, paths, in and on the pond – and it offers these possibilities with high energy efficiency and safe 12 V technology. Now discover the new Waterfall Illumination that immerses every OASE Waterfall in fascinating light. Quickly and easily installed with energy-efficient LED technology. The FM-Master WLAN is a key component for the revolution in device control in the garden. Based on the existing flexible concept of InScenio Power Management, this connection can be controlled via Wi-Fi with a smart phone or tablet. Thus all connected devices can be conveniently controlled from your armchair.

Pond illumination: Radiantly beautiful

When the colours of trees and plants fade into the background in the evening, it is light that can bring it to life. OASE provides garden owners with a variety of possibilities to give the garden a special charm. Special effects are produced when shrubs or grasses obstruct the light beam and make exciting contours. Concealed, the LunAqua 3 LED effectively illuminates figures and ornaments, providing a mystical atmos-phere. Bubbling stone fountains, for example, can be easily transformed into highlights through the LED illumination of the LunaLed S series. Even watercourses are radiant with a new light with aid of our LunAqua Maxi LEDs. Now discover how even waterfalls get that certain something. Easily and quickly installed, Waterfall Illumination brings the radiant lighting fixtures into your waterfall. Pure fascination!

Advisor

Pond illumination

Water and light skilfully combined

LunAqua Terra LED The high quality recessed lighting fixtures can be used under water and above the water surface. Watercourses and gardens are pleasantly illuminated indirectly, while driveways and paths receive tranquil, dusky illumination.

Above water and underwater

LunAqua 3 LED Finally the classic LunAqua 3 LED becomes an energy-saving favourite! This spotlight is appealing underwater and above the water surface with its unusual Illumination range thanks to 110 lumen – at a power consumption of just 3 watts! With the wide half peak angle of 30°, low bushes, shrubs and reeds are skilfully staged. Complete set with 1 or 3 spotlights.

Waterfalls made to shine

Waterfall Illumination Waterfall Illumination Easily installed with high-quality plastic carriage, Waterfall illumination is the finishing touch for every waterfall. This Waterfall Illumination, which can be installed retroactively provides a pleasant, warm-white LED light and is suitable for waterfalls with widths of 30 cm and 60 cm

NEW

Stainless steel design

LunAqua Maxi LED Appealing design and maximum functionality: With the LunAqua Maxi LED there is nothing more to be desired in a light. The warm white power LED with interchangeable lenses offers multifunctional implementation as a pond light fixture, wall light fixture or as an in ground light fixture, e.g. in a gravel bed. One spotlight per set can be retrofitted – for maximum flexibility.

Application examples: The right choice underwater and above the water: **LunAqua Terra LED**

Top 3 product characteristics

- *Pleasant warm light out of the ground for perfect evening atmosphere*
- *Individual installation possibilities: In the garden above the water and underwater*
- *Easy installation*

Recommendation

Whether on the terrace, in the swim pond or in the pavement – the LunAqua Terra LED is suitable for various implementation areas in the garden or in driveways. Route the cable, insert the light fixture in the 40 mm bore – a romantic evening atmosphere is provided!

LunAqua Terra LED

Warm light recessed in the ground – as complete install set

- Warm white LED light fixture, extremely energy efficient and long lasting
- Crafted in polished, high-quality stainless steel material
- Installation is particularly easy thanks to the stainless steel clip for fastening in the 40 mm bore opening
- Load bearing capacity for pedestrian and vehicular traffic up to 3 t (with proper installation)

- IP68 for continuous safe operation underwater and above the water (IP44 connection)
- Easy extension through LunAqua Terra LED Solo is possible (delivered without power unit)
- 10 m extension cable available as an accessory and suitable for bulb and 6x connector (max. 2 x per strand)

Extras

Top 3 product characteristics

- *High quality stainless steel cap*
- *Easy installation via hose connectors, ideal for bubbling stones*
- *Adjustable water feature height*

Recommendation
Be creative – combine multiple LunaLeds using the OASE multiple distributor (page 230) and design your custom fountain.

Application examples: **LunaLed 6 s / 9 s**

LunaLed

Innovative illumination with modern LED technology

- With 6 or 9 cold white LEDs
- Suitable for use underwater and above the water, e.g. for illumination of a bubbling stone
- Suitable for permanent underwater use, thanks to protection class IP68 (connection IP 44)
- High quality stainless steel cap, with which the water flow rate can be regulated

- Diameter 30 mm or 50 mm
- Half peak angle of the LED: 72°
- Incl. low volt plug transformer
- Easy installation via the innovative hose connector

The waterfall illumination emphasises the contours of the water pattern and ensures atmospheric lighting

WATERFALL ILLUMINATION

LED waterfall lighting –
for stylish light accents in the evening

NEW

- LED for waterfalls, for terrace pond edge decoration, in widths 30 and 60 cm
- Suitable for use underwater and above the water
- Suitable for permanent underwater use, thanks to protection class IP 68 (connection IP 44)
- Easy to retrofit, thanks to innovative plastic carriage
- Uniform light pattern thanks to virtually invisible LEDs
- Pleasant warm-white light colour
- High-quality, stainless steel enclosure

PRODUCT DETAILS

Plastic carriage
The innovative plastic carriage in discrete grey enables easy retrofit of the waterfall lighting at any time.

LED
The warm-white LEDs ensure pleasing light and at the same time they are extremely durable and energy-efficient.

Attractive water pattern
The light rail is placed at an optimal height in the waterfall and supports the harmonious water pattern.

Extras

Top 3 product characteristics
- Easy to retrofit waterfall lighting
- Pleasant warm-white light colour
- It is also ideal as terrace or pond edge lighting

Recommendation
Combine Waterfall Illumination with Waterfall 30 and 60 (see page 18) or with the stands Waterfall Set 30 or Waterfall Set 60 Solo (see page 19).

Set focussed accents at the edge of the pond or on the terrace, as well as between cobblestones, or for framing a wooden terrace.

Extras

Top 3 product characteristics

- LED underwater spotlight with warm white light
- Energy efficient
- Broad half peak angle, ideal for illuminating plants and other features in the pond and garden

Recommendation

For an optimal result, always illuminate plants from top to bottom.

LunAqua Classic LED

The all rounder – underwater and above the water

- LED underwater spotlight for pleasant warm white light accents
- Suitable for use underwater and above the water
- Suitable for permanent underwater use, thanks to protection class IP68 (connection IP 44)

- Energy efficient with only 1 watt power consumption (multi LED)
- Adjustable head for flexible alignment of the beam angle

Schematic diagram: Halogen / LED spotlight systems in use

LunAqua 10 System

Powerful & flexible:
The spotlight system for every implementation site

LunAqua 10 **Halogen**

LunAqua 10 **LED/01**

• Optimally matched lighting system
• Robust connection technology with many implementation possibilities
• Seamlessly compatible with the existing LunAqua 10 connection technology
• Easy mounting via a connecting cable with special connections

LunAqua 10 Halogen
• Available as spotlight without illuminant, cable and transformer (optionally available as an accessory)
• Pivot range approximately 180° thanks to the integrated mounting bracket

LunAqua 10 LED/01
• Thermal protection function: Luminous intensity is reduced automatically if the temperature is too high
• Incl. illuminant (not dimmable)
• Bulb available as a spare part, easy replacement
• Illumination range to 12 m

Underwater transformer UST 150/01
• Connection possibility for up to 4 spotlights: 4 x 35 W, 3 x 50 W, 2 x 75 W halogen or 4 x 10 W LED spotlight
• With the PowerBox 12 V, up to 12 LunAqua 10 LED / 01 spotlights can be connected (8 spotlights in series on one plug-in position)

PRODUCT DETAILS

LunAqua 10 spotlight
This spotlight offers versatile installation, whether as illumination for floating fountains or as a flexible light system for every garden.

Underwater transformer
Easy and safe operation above water and underwater – this connection technology is unrivalled! Standard regulations do not allow underwater use in swim ponds.

Connecting cable
This robust hose line is available in three lengths. Longer connecting cables with larger cable cross sections are in our commercial catalogue.

LunAqua 35 Set
Halogen spotlight including 35 W bulb, transformer and 7.5 m cable.

Extras

Top 3 product characteristics
• Powerful light system
• Spotlight and transformer suitable for underwater set-up to 4 m
• Flexible extension

Recommendation
With the OASE PowerBox 12 V up to 12 LunAqua 10 LED spotlights can be connected on one UST 150/01 (up to 8 units in one series).

LED SYSTEMS FROM OASE

*The world's first IP 68 underwater connection technology with 2 year guarantee**P. 251

At last, no more unsafe wiring and connecting of light fixtures: The IP 68 connection technology from OASE sustainably ensures safety and it is particularly easy to install.

With the worldwide unique IP 68 connection technology, connection and operation of light fixtures underwater is now particularly safe.

All connecting cables, transformers and power units of this series guarantee all-round water-tightness to a depth of 4 m! An axial flat seal with integrated capillary barrier in the plug connectors of the connecting cable and the associated boxes (PowerBox and DMX box) make it possible. OASE even provides a guarantee*P. 251 of 2 years.

Through this innovative technology the entire system is perfectly matched and can be put together to suit individual requirements:
Simply select from among the extensive OASE assortment of pumps, LED illumination, Jumping Jets, as well as connecting cables and PowerBoxes.

Tips & tricks:

• Our LunAqua 10 LED or ProfiLux LED offer power savings of up to 80% compared with the halogen variants.

• If the LED illuminant should actually fail, it can be easily replaced by plug connection.

• The cable cross section of the connecting cable that must be used is 2.5 mm² and the maximum cable length should not exceed 60 m for each line overall.

Extras

PowerBox 12 V
With the PowerBox up to 12 LunAqua 10 LED spotlights can be connected on one UST 150 / 01 (up to 8 units in one series).
Dimensions: 75 x 80 x 95
Rated voltage: 12 V
Number of outlets: 2
Item no. 50492

Top 3 product characteristics
- Powerful light system
- Easy retrofit thanks to the Plug'n Play principle
- Spotlight and transformer suitable for underwater setup

Recommendation
Particularly in the evening hours, the large floating fountains with matching illumination really show off their assets! Enjoy the luminous water patterns of the OASE Pond-Jets and AirFlos.

LunAqua 10 Illumination Set
Elegant light staging for Floating fountains

Technical data

	Illumination Set PondJet	Illumination Set MIDI / MAXI / AirFlo LED / 01
Description	• Perfect match for the OASE PondJet floating fountain • Including the proven LunAqua 10 halogen spotlight with 50 W halogen bulb • Fast installation thanks to unique connection technology based on the Plug'n Play principle • Complete set consists of: 3 x LunAqua 10 Halogen, 3 x holding bracket for the light fixtures, 1 x UST 150 underwater transformer, incl. stainless steel holder, 20 m cable	• Perfect match for the OASE AirFlo floating fountain • Including energy-efficient LunAqua 10 LED spotlight • Fast installation thanks to unique connection technology based on the Plug'n Play principle • Complete set consists of 3 x LunAqua 10 LED with 10 W LED bulb, 3 x holding bracket forr the light fixtures, 1 x UST 150 incl. stainless steel holder, 50 m + 2 m cable

Reliable power management: Anywhere and any time!

All the technology in the pond, such as pumps, filters, and UVC clarifiers, as well as the illumination in the garden would be impossible without the appropriate power supply. OASE InScenio power management offers the possibility of connecting up to four devices simultaneously. These devices are controlled via remote control with total comfort and convenience – even at distances of up to 80 m. This year's innovation, the FM-Master WLAN, is absolutely revolutionary for

device control in the garden. The WLAN technology enables operation and control of the appropriately connected devices, conveniently via Wi-Fi from your Smart Phone or tablet! And those who must make do without a power grid, can rely 100 % on the OASE Solar product line. The heart of the product line is a solar module that converts the solar energy obtained into useable power and even supplies the appropriate fountain pump and light fixture when the sky is cloudy.

Advisor

POWER MANAGEMENT & SOLAR COMPONENTS

The **INSCENIO FM-MASTER 3** is a small multi talent. Of its 4 connectible power outlets not only are 2 switchable by remote control, but an additional power outlet is also dimmable, for connection of a fountain pump, for example.

The new **FM-MASTER WLAN**, is a small sensation. This garden power outlet has WLAN connection technology and thus enables control of the connected devices with total convenience via an app on your smart phone or tablet. In addition, the FM-Master WLAN is equipped with an innovative DMX-RDM connection, with which, for example, the also new AquaMax Eco Expert can also be controlled bi-directionally.

NEW

WiFi

The **SOLARSAFE 41** as storage and control unit promises reliable power supply of the other solar devices, even in bad weather.

Tip!

The InScenio Rock sand cover in a near natural rock design fits naturally in the garden and serves as a splash guard thanks to the weather resistant and robust material. Additional information is provided on page 230.

InScenio FM-Master WLAN

*An **App** usable for the garden pond – at last, control your technology via WLAN!*

NEW

- Innovative highlight of the OASE InScenio Power Management family, controllable via Wi-Fi on tablets or Smartphones (iOS or android)
- Simply download the app (from the Apple Store or via Google Play) and get started
- With 4 power outlets: 3 can be switched on and off, 1 is dimmable in addition
- Each power outlet can be controlled over 24 hours with integrated timer
- With additional DMX-RDM connection for connecting to end devices that are garden system compatible
- In addition, up to 10 remote-controlled OASE devices can be integrated and controlled via the app
- All-year round use with spray water resistant power outlets
- Ground stake guarantees secure anchoring in the ground
- Available from March 2015

PRODUCT DETAILS

WLAN connection technology
At last, you can easily, conveniently, and quickly read out and regulate the capacity information of your garden devices. And you can do it with a range of up to 80 m (with unobstructed signal transmission).

DMX-RDM connection
A DMX-RDM interface is provided here for connecting intelligent, garden system compatible end devices, such as the AquaMax Eco Expert.

Spike
The ground stake for easy installation without digging and secure anchoring in the ground, is included in the scope of delivery.

Splash guard
To be on the safe side: The InScenio cover protects the electronic parts from splashing water. In addition, with the optional InScenio Rock cover the InScenio can be ideally integrated in the garden world.

Extras

Top 3 product characteristics
- Revolutionary device control in the garden with WLAN, via tablet, or smart phone.
- Connection possibility for DMX-RDM capable end devices (e.g. AquaMax Eco Expert)
- With radio remote control for up to 10 remote controllable OASE devices

Recommendation
The OASE InScenio FM-Master WLAN app is programmed for mobile devices iOS 7.x or higher, and Android 4.0.3. As soon as valuable updates are available there is an automatic notification for the free download. To ensure the best possible range of the WLAN connection (2.4 GHz) make sure there is an unobstructed view between the smart phone / tablet and the FM-Master. Even greater distances can be achieved through off-the-shelf booster antennas or repeaters.

For all OASE products that can be controlled remotely, such as the FM-Master 1 to Profimaster, as well as the Water Entertainment products, Water Trio, Quintet, Quintet Creative, Jet Lightning and the JumpingJet Rainbow Star, you can replace the remote control units with your smart phone / tablet in combination with the FM-Master WLAN.

Schematic diagram: Connection possibilities with the OASE **InScenio** garden outlets

InScenio

Flexible & decorative power management

Cover in sandstone-effect

InScenio Rock cover in stone décor elegantly conceals the technical unit. (optional accessory)

Splash guard

For your safety the InScenio cover protects the electronic components from splashing water.

Main module

Example – InScenio FM-Master 3 offers four power outlets of which two can be switched on and off. One input offers permanent power and one a dim function.

Remote control

From a range of up to 80 metres all functions can be easily and conveniently activated.

- Clever power connection system for the complete garden
- Extremely easy and flexible installation no digging whatsoever
- Retroactive extension is conveniently possible at any time
- Year round use thanks to splashproof and strain relieved power outlets
- Ground stake guarantees secure anchoring in the ground

From InScenio FM-Master 1
- Remote control range of the FM-Master to max. 80 m if there is no transmission interference

210

PRODUCT DETAILS

Strain relief
Strain relieved outlets are specially protected against mechanical stress and perfect for safe, year round use

Splash guard
To be on the safe side: The InScenio cover protects the electronic parts from splashing water. In addition, with the optional InScenio Rock cover the InScenio can be ideally integrated in the garden world.

Spike
The ground stake for easy installation without digging and secure anchoring in the ground, is included in the scope of delivery.

Remote control
The remote control unit of the FM Master included in the scope of delivery, and of the FM-ProfiMaster, has a range of up to 80 m, (if there is no transmission interference).

Extras

Top 3 product characteristics
- Flexible modular system
- Easy installation, can also be retro-actively extended
- Protective cover protects against splashing water and mechanical stress

Accessories

InScenio Rock sand
Cover in rock effect suitable for all InScenio FM-Master housings.
Item no. 50417 (page 240)

SOLAR COMPONENTS

Use new energies – and not only for the good of the environment

Extras

Top 3 product characteristics

- *Holistic solar system with matched components*
- *Easy installation thanks to plug connection*
- *Off grid power supply for incredible flexibility*

Recommendation
With a full battery the SolarSafe 41 enables solar operation of the Aquarius Solar 700/1500 for up to 17 hours or 8 hours even without sunlight. The devices can be used day and night, and even in poor weather conditions.

- The solution is as elegant as it is simple for allotment gardens and other locations without a power supply
- High quality matched components: Solar cell, storage and control unit, fountain pump and illumination
- Extremely robust and convenient plug connections for all components ensure safe and fast installation
- The consumers equipment operates even in poor light conditions thanks to the SolarSafe electronically regulated storage and control unit (optional)

SolarModul 35 *Solar cell for power generation*

- Extremely high efficiency levels
- Compact dimensions, high impact resistance and break resistance and long service life
- With stand, 10 m power cable and special plugs for connecting to the other OASE solar devices

		SolarModul 35
Dimensions (L x W x H)	mm	600 x 40 x 600
Power cable length	m	10.00
Net weight	kg	8.00
Guarantee*P. 251	Years	2
Setup type		Dry installation only
Item no.		37105

Aquarius Solar 700 / 1500 *Fountain for solar operation (see also page 54)*

- Connection to the optional Solar Module 35 or to the optional OASE SolarSafe 41 storage and control unit
- Ideal for locations without power supply
- The detachable wings can be placed in the shallow bank area
- Telescopic pipe extension with integrated swivel head for individual alignment of the fountain
- 3 fountain attachments included in the scope of delivery

		Aquarius Solar 700	Aquarius Solar 1500

Pond construction & Decoration

Pond construction materials: you have the dream – we have everything that you need to make it a reality!

With the extensive pond construction product range, construction of your pond is surprisingly easy. The well designed program makes OASE the perfect pond partner. Any type of pond is a genuine natural experience and gives the garden a very special, individual highlight. Starting with the smallest pond pools to larger liner ponds with fish, to large swim ponds – for every pond OASE has the ideal construction concept with the right materials. The advantage of a preformed pond is the easy installation with integrated plant zones, the first-class and flexible OASE pond liners, OaseFol EPDM and AlfaFol PVC, are well suited for different pond sizes

»Now it can be the way, I want it to be !«

OASE quality promise:

High-quality workmanship and selected materials assure you of many years of satisfaction with your pond!

and shapes. The latter are particularly easy to process as finished liner sections. You can rely on the high-value, tested and long lasting quality of our pond liners – with a guarantee*P. 251 of up to 20 years! The pond liners and fleece are supplemented with an extensive and well thought out range of hoses and accessories. All connections for

filters and power fit perfectly together and can be inconspicuously integrated in the garden. With additional information, as well as material and building instructions available as a film and brochure, you can rely on OASE as your pond construction partner!

Pond planning & implementation: Plan correctly, right from the start

To make your garden dream a reality it needs to start with proper planning. You must take size, position and condition of the garden or the terrace into account. A few ground rules must be complied with to ensure long term enjoyment of your very own garden pond!

Important prerequisites

Pond type: Garden ponds with fish should be constructed close to the terrace or patio for observation. If you prefer a natural pond to encourage wildlife, then use the space in your garden to your advantage. Design oriented fountains and architectural ponds can be integrated into the design of any garden.

Sunlight exposure: Four to six hours of direct sunlight per day are ideal for a pond. Extended deep water zones help prevent excessive warming of the water and algae formation in areas exposed to a lot of sunlight.

Trees and shrubbery: Deciduous trees and conifers, as well as plants that develop strong roots, should be far enough away from the pond. Root barriers offer containment possibilities for plants, such as bamboo, that develop strong, penetrating roots.

Minimum water depth: In winter to prevent the pond from completely freezing solid, OASE recommends a minimum water depth of 80 cm.

There are virtually no limits to the design possibilities of a liner pond. Before laying out the liner, a protective fleece that protects the liner from damage due to roots and small stones should always be used. Pond liner is best laid out on sunny days in warmer temperatures. Alternatively preformed ponds can be used for pond construction. The OASE Stonecor preformed ponds with natural look are easy to install.

Additional information in the OASE app
Available in the Apple Store & Google Play Store

Power and water connections: Proximity of the pond to power and water connections can facilitate operation and control of the devices in and on the pond.

Hose diameter: When selecting hoses select a diameter that is as large as possible to avoid excessive friction losses.

The right pond technology: In addition to selecting the right combination of pump, filter, and UVC clarifier, the position of the pump in the pond also plays a role: A filter pump should be placed as deep as possible so that it can displace pond floor sediment. Fountain pumps are positioned closer to the surface for reduced maintenance.

Step-by-step instructions for pond construction are on the next page.

Extras

Basic garden pond equipment includes:

- **Pond liner** (page 220) or **preformed pond** (starting on page 234)

- **Pond fleece** (page 220) to protects the pond liner

- **Pump** for operating a filter, a fountain or a watercourse (starting on page 42)

- **Filter** for biological-mechanical cleaning (starting on page 86)

- **Skimmer** for surface cleaning (starting on page 160)

- **Pond aeration** for supplying the pond with oxygen (starting on page 146)

Recommendation
For selecting the right fountain pump the following applies:
Maximum fountain height = minimum distance to the nearest edge of the pond!

To feed a higher elevated watercourse the OASE pressure filters BioPress (page 96) and FiltoClear (page 98), as well as the matching AquaMax (from page 68) filter pump are suitable!

Rule of thumb for determining the right pump for a watercourse:
Watercourse width (cm) x 1.5 = pump capacity in l / min.

217

The right sequence for installing liner:
1. Pond fleece
2. Pond liner
3. Stone liner
(starting on page 220)

3

Marginal plant holders &
embankment mats

Pressure filter »FiltoClear«
(page 98)

EASY POND CONSTRUCTION

Step-by-step with products from OASE

1. Location
The right location for the garden pond
should be half in shade;
4 – 6 hours of sun a day are ideal.

2. Pond contours
First mark out the pond contours with
sand. The different deep zones should
also be marked with sand.

3. Determine the dimensions of liner and fleece
Then use a cord to measure the necessary
length of the fleece and the pond liner.

4. Fleece
After excavation, first clad the hole
with fleece, to protect against root
and rock penetration.

5. Liner and stone liner
Then carefully lay out the liner. Stone liner
is particularly well suited for a natural-
looking edge area.

6. Planting on level areas
Coconut mats are laid out for planting
level areas. They provide an optimal
opportunity for plants to take root.

1 **DEEP WATER ZONE**
This is where the filter and watercourse pumps or possibly pond drains are placed.

2 **MARSH ZONE**
Offers space for plants and micro organisms and makes an important contribution to nutrient reduction in the pond. It is approx. 30 – 40 cm deep and should be laid out as wide as possible.

3 **MOIST ZONE**
Ideal for lush embankment plants.

4 **WATERCOURSES (OPTIONAL)**
When selecting the location for the watercourse, pay attention to damming stages, damming depths, as well as the overflows that are as large as possible so that additional movement and oxygen comes into the pond.

Extras

Recommendation
The movement of water through watercourses and waterfalls supplies the pond with necessary oxygen.
The topsoil you removed for the garden pond can be used to create a watercourse or waterfall.

Slopes for a watercourse should not be steeper than 40 %.

7. Planting on steep areas
Steeper sections are planted using marginal plant holders. Use large rocks to first weight the plant holders so that you can insert the plants.

8. Pond technology
Carefully read the instructions for installing the OASE pond technology (pumps, filters, lights) and follow these instructions precisely.

9. Gravel and water
After the gravel, at last it is time to put water in the pond: First fill the pond halfway full; completely fill the pond only after the liner has settled in place.

10. Edge area décor
The final step is to fill the edge area with rock (pebbles or similar) and landscape it as you desire.

11. Lighting
For atmospheric ambiance in the evening hours we recommend considering the appropriate lighting from the outset.

That's it!
The result deserves to be seen: Living water landscapes with pond construction materials from OASE.

Extras

Liner information

PVC liner
- PVC liner is manufactured from plastic and can be welded or bonded.
- It is characterised by an outstanding price / performance ratio; minor damage, e.g. due to garden tools can be quickly and easily repaired.
- Temperatures above 10 Celsius are ideal for installation.
- PVC liner is suitable for all pond types, small reservoirs and rainwater retention basins.
- Should always be protected from rocks and roots through a pond fleece
- We provide a 15-year guarantee*[P. 251] on our AlfaFol PVC pond liner.

EPDM liner
- Consists of a synthetic rubber material and is environmentally friendly.
- It is flexible, ductile, and easy to process. EPDM liner is UV-resistant and ozone-resistant.
- OaseFol EPDM is available in the standard thickness of 1.00 mm, as well as in thicknesses 1.14 mm or 1.52 mm (in container loads).
- EPDM is suitable for all pond types, small reservoirs and rainwater retention basins. We recommend protecting the liner from rocks and roots through a pond fleece.
- Should always be protected from rocks and roots through a pond fleece
- We provide a 20-year guarantee*[P. 251] on our OaseFol EPDM pond liner.

FLEECE & LINER

Liner types and areas of implementation

Choosing Pond Liner
Constructing a pond with liner offers an infinite variety of design possibilities. The larger the pond or the more stress to which the pond is subjected, the thicker the liner should be. Single liner strips from the roll can be quickly and easily connected together with the appropriate OASE accessory (see page 223).

They are available in different versions:

Pond liner
- **OASEFol** rubber liner offers particular stretch capacity, it is particularly robust, flexible to lay out, and easy to work with.
- **AlfaFol** is a single-ply PVC liner; it is available in two thicknesses and colours.

Swim pond liners
- **SwimFol** is extremely tough and ideally suited for implementation in swim ponds.

Decorative liner
- **Stone liner** is a robust decorative liner with fleece coating that can be quickly and easily applied to the pond liner with PVC liner adhesive or UniFix+. The stone liner is now also available in the colour granite-grey.

Calculation aid

How much liner is required for a pond?
There are two formulas for calculating liner requirements:

Length + 2 x depth (at the deepest point of the excavation) + 2 x 50 cm = length of the liner

Width + 2 x depth (at the deepest point of the excavation) + 2 x 50 cm = width of the liner

Recommendation
The pond liner can be damaged by strong root development, such as occurs with bamboo. Consequently ensure that strong rooting plants are always planted in the pond with root protection liner and root barrier. We recommend coordinating your planting ideas with your plant supplier beforehand.

Pond fleece

	Item no.	Dimensions (L x W) m	Grammage g/m²	Roll weight kg	Core length m	Core inner diameter mm	Colour	Material

SWIMFLEX

	SwimFlex DA 50
Diameter mm	50
Length m	25.00
Guarantee*P. 251 Years	2
Colour	Black
Material	PVC
Max. operating pressure bar	7.00
Description	• Flexible PVC line • Extremely tough • For easy installation of pipelines in swim ponds • Can be bonded to PVC connection fittings • On the roll • Temperature resistant from −20 °C to +60 °C • Pressure: 7 bar
Item no. (GB-Version)	Not available in GB!
Item no.	37288

Tip!

To optimally exploit the capacities of the pump, select the largest hose diameter possible. Inadequate hose diameters or angled hose joints and flow-through obstructions through hose connections impact the flow-rate!

More information concerning pressure losses on page 244.

Recommendation

OASE filter sponges are manufactured exclusively for use in pond water that is suitable for fish. Consequently they exceed the special requirements. Strict quality controls and specifications ensure consistent and high quality workmanship of the filter sponges.

OASE-Quality criteria

- *Regular eco-toxicological examinations ensure a permanent, 100% compatibility for plants and animals in the pond, also for the sensitive microorganisms, as well.*
- *The pore size is permanently defined and consequently ensures a constant and regular flow of water in the sponge.*
- *OASE filter sponges are characterised by incredible durability at a high level of dimensional stability. This stability is extremely important, particularly for the cleaning processes in which the filters are compressed via the cleaning handles.*

The prerequisite for guarantee claims under each guarantee*P.251 is the exclusive use of original OASE spare parts!

Extras

Top 3 product characteristics

- *Natural design of large lakes*
- *Extremely robust, long service life*
- *Easy installation with preformed pond zones*

Recommendation

Plants in and on the pond not only look nice, but they also offer their own contribution to maintaining the biological balance. Speak with your OASE dealer about optimal planting.

PREFORMED PONDS STONECOR

Easy to mistake for nature

- Incomparable material: Durable, abrasion resistant, impact resistant, as well as weather-resistant; made of linear high-pressure polyethylene LLD-PE
- Grained surface offers ideal conditions for settlement of pond biology
- Perfectly matches nature in form and material
- Unique design – topographically based on the most beautiful lakes in the world
- High inherent stability

- Uniform density of material in the entire preformed pond
- Frost-proof
- Environmentally friendly
- 100% recyclable
- 15 year guarantee[*P.251]

≈ Floating plants																									

Our Stonecor® preformed ponds offer a lot of living space for a wide variety of plant life with their pronounced deep zones – planting is easy with this table.

INSTALL IT YOURSELF
Easy step-by-step!

1. Location
The ideal pond location is away from deciduous trees and conifers and has approximately 4 – 6 hours of sunlight daily.

2. Tools
For installation you require: Spade, shovel, filler sand, level, yardstick, and a garden hose with water connection.

3. Marking
First, position the preformed pond in the desired location, then mark the contours with sand.

4. Deep zones
This is what the finished marking-out should look like, including all deep zones.

5. Excavation
Generously dig out the specific zones of the garden pond.

6. First test
Insert the pond on a trial basis.

•	•	•	•	•	•	•	•	•	•	•	•	•	•	•	•										35 cm	3
										•	•	•	•	•	•	•	•	•	•	•	•				60 – 80 cm	4
										•					•	•	•	•	•	•	•	•			83 – 110 cm	5
																							•	•	Floating plants	≈

7. Fill-in
Adjust the different depths with filler sand until the finished excavation looks like this.

8. Levelling
The preformed pond is inserted and levelled out in length and width. Then fill with water to approximately 1/3 of the total volume.

9. Backfilling
All around the perimeter wet sand is backfilled under the edge of the preformed pond to fill any cavities.

10. Filling and compensating
In the final step the area around the preformed pond is adapted to the preformed pond with sand, soil, gravel, etc.

11. Edge area decor
Now you can start with the planting and pond design (see plant table).

That's it!
In just a short time, a great result – your own pond is ready!

Tips for correct watercourse calculation

- *Use the pump performance curve to identify the required pump capacity (page 246). To deliver the desired water quantity from the pump to the source of the watercourse, minimum hose diameters are required, e.g. to 20 l/min = 25 mm (1") or from 50 l/min 38 mm (1½") etc.*
- *In addition, it is important for the watercourse to pay attention to the pressure loss of the water supply line. Generally this is considered with 0.4 mWc. Consequently, for displacement of greater quantities of water it is necessary to use a more powerful filter & watercourse pump. Larger water quantities increase pipe friction loss, and a higher capacity pump is required.*

Here is a rule of thumb for determining the right pump for a watercourse:

Width of watercourse in cm x 1.5 l/min. = capacity l/min.

WATERCOURSE ELEMENTS

The classics for custom watercourses

- Near-natural elements fit perfectly in the environment
- 3 different elements for individual routes of the watercourse
- Long service life, robust GRP material

Information on the energy efficiency classes of OASE spotlights

A++
A+
A
B
C
D
E

The EU energy efficiency label provides information concerning the energy efficiency class of a light fixture, i.e. the ratio of light output to power consumption, as well as additional characteristics of the product. Power saving LED bulbs reach an energy efficiency class of A++ to A, efficient halogen bulbs must be assigned to classes B to C.

For your information, here we have presented the energy efficiency classes of the OASE illumination product range together with more detailed information in an overview.

Item no. PUMP PERFORMANCE CURVES

What is the pump performance curve used for?
The pump performance curve, also referred to as performance data, helps you in correctly advising customers. It shows the relationship between the flow-rate (Q) and the delivery head (H) of a pump.

The delivery head is specified in mwc (metre water column). 1 mwc ~ 0.1 bar

Determining the operating point (example)
The pump should displace water 1 m above the water surface. At the operating point, e.g. on the Aquarius Universal 2000, you can read out that approx. 18 l/min are displaced (determined theoretically). Small hose diameter, the hose length and built in curvature can change the value in the extreme.

Explanation of the pump performance curve using the Aquarius Universal 2000 as the example
At the maximum flow rate (Q) of 33 litres per minute, measured directly on the pressure duct of the pump, the delivery head equals 0 cm. At maximum delivery head (H) of 200 cm the flow-rate equals 0 litres.

WATERCOURSE DIAGRAMS

Easy, if you know how: Which pump is right for your watercourse?
These diagrams serve as recommendations for selecting the right pump for your watercourse (average watercourse application). In this regard, approx. 5 m of a 1½" hose are considered (with a pressure loss of approx. 0.15 head height).

Here is a rule of thumb for determining the right pump for a watercourse:

Wide watercourse in cm x 1.5 l / min. = capacity l / min.

Clear water guarantee

Clear Water Guarantee conditions from OASE:

OASE guarantees clear water in the pond to all purchasers of an OASE filter system, if the system is used properly in accordance with the selection table, if the system is set up properly in accordance with the set-up instructions, and in compliance with the instructions in the operating manual, and in compliance with the instructions for achieving clear water in the pond through the addition of OASE filter starter bacteria in the defined scope.

Clear water means that fish, plants, or rocks on the pond floor are recognizable to a pond depth of 1 m below the pond surface. Ponds with string algae are not considered to be unclear, as scarcely any suspended substances are formed. Pond water is not tap water. Turbidity and colouration are always present and are also natural, and these conditions exclude a guarantee case.

The Clear Water Guarantee is granted exclusively for ponds in the conventional sense of the term. A pond is an artificially created body of water made of liner or in a preformed pond with minimum planting of $\frac{1}{3}$ of the water surface and is exposed to sunlight for 4 to 6 hours a day. The location of the pond is 4 m away from deciduous trees and/or conifers.

For the first use and every new use in the spring the application of OASE filter starter bacteria is prerequisite. It can take up to 6 weeks until the pond is clear, depending on the burden of the pond. The filter works mechanically and biologically. Settlement of microorganisms is required for biological cleaning. Consequently the Clear Water Guarantee assumes that the pump, and thus the filter system, is operating 24 hours a day during the pond season (approximately from March to November). Excessive cleaning prevents formation of microorganisms in the filter foam. If cleaned too infrequently the filter sponges cannot absorb any more pollutants, or they can only do so if the flow-through rate is significantly reduced. The OASE filter must be used with an OASE Solids handling pump (i.e. AquaMax) in order to comply with the terms of the clear water guarantee.

The guarantee applies for a maximum of 3 years within the scope of the Clear Water Guarantee conditions, starting from the date of purchase from the authorised OASE dealer (initial purchase, not for resale of the new product), if the provisions of the OASE instruction manuals are complied with and the products are used as intended. A directory of OASE dealers is available at **www.oase-livingwater.com**.

The Clear Water Guarantee can be acquired either through online registration or via the Hotline. Please register in good time and conveniently on the Internet within 3 months from the date of first purchase at https://www.oase-livingwater.com/en_GB/clear-water-guarantee/ or within the same period call our OASE Hotline +44 (0) 12 56 / 89 54 42 (UK only).

For all procedures involving data processing (e.g. obtaining, processing and transferring) we comply with the statutory regulations. Your data that is necessary for guarantee processing is stored and is forwarded by us to commissioned service providers in the scope required for processing. Address data and order data are collected and processed for our own marketing purposes. Data is only used for third-party marketing purposes if this is permitted by law, e.g. generally published data and certain data contained in lists in accordance with the Data Protection Act 1998. You can stop the use, processing and exchange of your personal information for marketing purposes at any time by sending an informal letter by mail to OASE (UK) Ltd., The Old Cart Shed, Apsley Barns, Andover, SP11 6NA or by e-mail to enquiries@oase-livingwater.com. However this does not apply for the data that is necessary for processing the guarantee. Upon receipt of your request, we will no longer use, process or exchange the information in question for any purpose other than the processing of your order, nor will we continue to send advertisements, including our catalogue, to you.

Prior to submitting a guarantee claim the customer is obligated to report the deficiencies determined via the OASE Service Hotline (see below). After logging the fault, OASE will provide assistance for correction of the fault. If help cannot be provided on-site, or if the help does not bring the desired success, the customer must then inform the Hotline specified above of this situation. Then, if OASE cannot suggest any other remedy possibility that should be particularly attempted, the customer has a claim for processing of the guarantee through the dealer, if in all other aspects the dealer affirms / determines that the prerequisites of the guarantee are satisfied. Otherwise the dealer has a last opportunity to attempt to implement the consulting. In the case of a guarantee claim the dealer refunds the purchase price paid for the product, for which the Clear Water Guarantee applies, to the customer, only against submission of the original purchase receipt and return of the defective product, if OASE has previously accepted the guarantee claim. More extensive claims arising from the Clear Water Guarantee do not exist.

The legal guarantee rights of the purchaser remain unaffected through the Clear Water Guarantee.

The guarantee is invalidated if the installation instructions in the instruction manuals are not complied with, or in the case of wrong system selection, or if pond care products from other manufacturers are used, particularly if pond care products containing copper are used, or if the customer's behaviour otherwise is in violation of the customer's obligations. Comply with the service and maintenance instructions in the instruction manual.

Frequent causes for unclear water
- Failure to replace parts subject to wear, e.g. UVC bulb or filter sponges
- The height difference between the water surface and the highest point in the pressure system is greater than 1 m (assumed value in the OASE selection tables)
- Pressure losses due to excessive hose lengths or a hose diameter that is too narrow
- Missing inlet barrier (capillary barrier). Surface water flushes mud and / or fertiliser (nitrogen, lawn fertiliser, etc.) into the pond from the garden
- Over-intensive feeding of fish generates nutrient loads in the pond
- Incorrect placement of the pond results in imbalance (For example, excessive sun, excessive shade)
- Faulty mixing of the pond water, i.e. deficient circulation

Information concerning the Clear Water Guarantee
Information is available through the OASE Hotline at: +44 (0) 12 56 / 89 54 42 (UK only) or directly from your dealer.

Guarantee

Guarantee

OASE GmbH grants a manufacturer's guarantee under the conditions cited below; the guarantee period is designated on a product-specific basis. This is provided in the form of supplemental text with the product.

The designated guarantee period starts with the first-time new product purchase from an OASE stockist. In the event of a subsequent sale the guarantee period does not start over again from the beginning. The guarantee period is neither extended nor restarted through guarantee performances; legal guarantee claims do not occur on guarantee performances.

If the content of the guarantee is not otherwise specified separately, OASE grants a guarantee in the scope cited below: The prerequisite for claiming any guarantee from OASE, including the extension guarantee is that in the case of parts replacement / repair, the customer must have properly installed OASE spare parts exclusively for any repair or remediation. Any OASE guarantee is invalidated if products from other manufacturers are used.

We provide guarantee performances, at our discretion, through no charge repair, or no charge delivery of spare parts or of a replacement device of comparable value. If the type in question is no longer manufactured, we reserve the right, at our discretion to deliver a replacement device from our product line that most nearly approaches the type that is the object of the guarantee claim. Reimbursement of expenses for removal and installation, inspection, claims for lost profit and compensation for damages are not covered by the guarantee, nor are more extensive claims for damages and losses, regardless of type, that have been caused by the device or its use. The guarantee only applies for the country in which the product was purchased from an OASE stockist. German law applies for this guarantee in accordance with these conditions; with exclusion of the United Nations Convention on Contracts for the International Sale of Goods (CISG).

The legal rights of the purchaser, particularly from the warranty, continue in effect and are not limited by this guarantee. Defects or damage that are due to faulty installation or operating errors, as well as insufficient care, or for example, due to the use of unsuitable cleaning agents or neglected maintenance, non-intended use, damage, impact, the effects of freezing, etc. cutting off the plug, shortening the cable, calcium deposits or improper repair attempts, do not fall under the protection of the guarantee. With regard to intended use we refer you to the use instructions, compliance with which is the basic prerequisite for a guarantee claim. Parts subject to wear, such as bulbs, are not part of this guarantee. If there is a guarantee case please contact your OASE stockist that sold the product to you. If this possibility does not exist, then claims arising from the guarantee can be made binding against OASE GmbH & Co. KG Tecklenburger Str. 161, 48477 Hörstel, Germany by shipping the device or the parts in question to us at your expense, together with a copy of the original purchase receipt of the OASE stockist, the guarantee certificate, as well as written information about the claimed defect.

A directory of OASE stockists is available at **www.oase-living-water.com.**

Extension Guarantee

Extended OASE Guarantee on request

As the manufacturer, we extend the legal warranty period of 2 years relative to your OASE dealer, if there are special customer requirements, and in specially advertised cases by an additional year guarantee period (extension guarantee: 2 years basic guarantee + 1 year request guarantee), and in other, likewise specially designated, cases by an additional 2 years guarantee period (extension guarantee: 3 years basic guarantee + 2 years request guarantee). The term of the guarantee period starts with the end of the legal guarantee period that commenced with the initial purchase from an OASE dealer. Therefore in the event of resale the guarantee period does not begin at a later point in time, nor does it start over again. The guarantee period is neither extended nor restarted through guarantee performances. At OASE's discretion the guarantee performance extends to repair of defective part or replacement delivery of a comparable/equivalent value product with exclusion of more extensive claims.

The legal rights of the purchaser arising from the warranty continue in effect and are not limited by these guarantees. The guarantor is OASE GmbH in Hörstel.

The respective extension of the guarantee for 1 additional year and/or also for 2 additional years can only be acquired within the legal warranty period of 2 years, either through online registration or via Hotline in compliance with the information required for the registration or on the Hotline: **https://www.oase-livingwater.com/en_GB/extended-guarantee/ OASE Hotline +44 (0) 12 56 / 89 54 42 (UK only).**

By registering, the customer declares that he agrees that OASE may confidentially save personal information provided by the customer, in accordance with the Data Protection Act 1998 and that OASE may use this information for the purpose of administration, statistical analysis, and marketing. Disclosure of the data to third parties is excluded, with the exception of disclosure to service providers for OASE's own adver-tising requirements and for fulfillment of the guarantee. The customer can revoke his consent at any time by sending his written revocation to the address cited below. After receipt of the revocation OASE will no longer use the data concerned for purposes other than for the processing of the guarantee.

Clear Water Guarantee*[P.250]

Product can be operated
with 12 V

Energy savings up to:
25%, 40% or 60%

Product is particularly energy
efficient and cost-efficient
in operation

Power supply

Power in watt

Bulb power in watt

A UVC clarifier is integrated
in the product

Long service life of 8000 h
for OASE UVC bulbs

Integrated LED display

Function check for UVC devices

Protection against eye injuries
through UV radiation

Remote control

Easy installation

Low-noise function

Device is only designed
for indoor use

Device must be set up
where it is protected
against splashing water

Dry installation only
(pumps must be below the water level)

Can be installed
submersed and dry
(pumps must be below the water level)

Fountain height

Adjustable telescopic
fountain

Fountain pump offers
a second outlet

Suitable for ponds
to 25 m² pond surface

Suitable for ponds with plants,
without fish stock

Suitable for ponds with plants
and fish stock to 1 kg / 1000 l

Suitable for ponds with plants
and fish stock up to 1−2 kg /
1000 l (koi ponds)

Can be used for spray fountains

Can be used for watercourses

Can be used for waterfalls

Filter can be used for higher
positioned watercourses

Suitable for swim ponds

Suitable for swim ponds with
separate pump chamber

Product set:
Consists of pump, filter,
UVC clarifier

Can be operated from
the edge of the pond

Easily concealed filter

With integrated bottom drain

Filter installation above
the water surface

»Seasonal Flow Control«
Adapts to the respective pond
biology throughout the year

Automatic self-cleaning

Automatic silt discharge

EASY CLEAN
easy cleaning

EASY CLEAN PLUS
extremely easy with active
cleaning function

Pond vacuum cleans
without interruption

Illuminants can be used
above the water surface and
below the water surface

JumpingJet Set:
A point of light runs
through the jet

Coloured, alternating light
in the jet

JumpingJet Set:
Permanently programmed
combinations can be selected

A maximum of 2 JumpingJets
can be connected to the pump

Second suction inlet

Second adjustable
suction inlet

Maximum flow rate
for filters

Maximum circulation
in m³/h

Maximum air displacement
quantity

Minimum water depth
for faultless function

Maximum insertion depth

Maximum suction depth
of 2 m

Skimmer adjusts to the pond
surface at water level
differentials up to 10 cm

Whirlpool function

Pump installation below
the water surface

The product can float

Water level can vary
by as much as xx cm

Winterproof

Tested regularly by OASE to
−20 Degrees Celsius

Product offers protection
against overheating

Thermal protection, e.g. in the
event of dryrun or blocking

Stainless steel has been used

Patent applied for

Patented

Tested OASE quality

VDE-certified

Manufacturer's declaration
that the device corresponds
to the European guidelines.

Can be controlled via WLAN

A: Improving water quality

B: Binding nutrients

C: Controlling /
preventing algae

D: Disinfection

Eco:
Good energy balance

Eco-Plus:
Excellent energy balance

Explanations:

All specified values for the fountain attachments are
approximate values.
H = height in cm
∅ = diameter of the spray water in cm
Spray diameters and spray heights can vary through
individual installation and different water qualities.

An overview of all icons and their meanings is provided
on the Internet at: www.oase-livingwater.com

Note: Electrical connection points must be at least
2 m from the edge of the pond; they must be dry and
secured with a max. 30 mA residual current protection
circuit.

The products shown/offered are designed exclusively
for the described purpose. If the products we have
cited are used inappropriately, we assume no liability
whatsoever for defects or damage that occurs due to
this circumstance.
Text and image descriptions do not constitute any
assurances of characteristics. Minor deviations in our
products do not constitute a defect.

Alphabetical product overview

Eco Offensive

Bitron Eco

AquaMax Eco Premium

UVC POND CLARIFIER BITRON ECO
100 % MORE CAPACITY*, WITH UP TO 50 % ENERGY SAVINGS!**

The Bitron Eco is a highly efficient UVC clarifier for high intensity treatment of suspended algae, substances that cause turbidity and harmful bacteria. It is available in a 120 W, 180 W or 240 W version and is suitable for ponds up to 240 m². The innovative UVC lamp technology enables high flow-through rates at optimum energy efficiency with high energy-saving potential.

- Maximum efficiency, thanks to a perfect combination of flow rate and irradiation intensity
- Lower replacement bulb costs thanks to a 50 % longer service life (12000 h)
- Clear water with up to 50 % less energy costs**

* Calculated using the example of the Bitron Eco 240 W, as compared with the predecessor model Bitron C 110 W; 305 days operation in Eco mode 50% and Central European temperature profile. With a different combination the savings may be less.
** As compared with devices without an energy saving function in continuous operation. Bitron Eco 240 at 305 days of operation in EcoMode 50 % and Central European temperature profile.
With a different combination the savings may be less. CO_2 calculation: www.iwr.de

**Additional information from your OASE stockist at**
www.oase-livingwater.com/eco

More economical consumption, more powerful in the result.
Thus, the Bitron Eco sets new standards: As opposed to simple UVC devices without energy saving function that irradiates throughout the entire year with undiminished capacity and thus waste energy, the Bitron Eco optimally adapts itself to the seasonal progression of algae growth.

Therefore, only as much energy is used which is actually required. In this manner you achieve maximum results, save energy and money and protect the environment at the same time!

Algae and pathogen burden over the course of the year: energy consumption of the classic UVC device (upper axis) and – thanks to intelligent control technology – the performance curve of the Bitron Eco tracks algae growth throughout the course of the year.

Pond filter pump
AquaMax Eco Premium

ø **save**
1,154 €*!

Pond filter pump AquaMax Eco Premium
Pays for itself through energy savings!*

- **Made in Germany.** High quality level from design and development to production.
- **Flexible.** Flow rate can be mechanically and electronically adjusted.
- **Inspired by nature.** Organic design with rounded surfaces and clever applications.
- **Unstoppable.** Even coarse debris particles up to 11 mm in size are reliably removed from the water.
- **Supplemental debris supply.** Patented second inlet for additional filter accessories.
- **Frost-proof to –20 °C.** Fully functional even in winter thanks to first class frost protection.
- **Protection against dry run or blocking.** Thanks to »Environmental Function Control« (EFC by OASE)

The additional costs of energy consumption within 5 years (as compared to the costs for the AquaMax Eco Premium) are presented. Source: OASE laboratory test, summer 2011 – 2013, various pumps from several suppliers were tested and measured. Test setup: Measurement of energy consumption at an application height of 1 or 1.5 m (average application) and use of the recommended hose diameter. Energy costs were calculated based on the following assumptions:
• Standardised flow rate
• Runtime 8760 h per year; 5 year runtime
• Price per kW/h 0.25 €

* Savings in electricity costs within 5 years. Calculated using the example of the AquaMax Eco Premium 16000 compared with competitive models.
 Energy costs were calculated based on the following assumptions: Normalised flow rate, runtime 8760 h per year; 5-year runtime, price per kW/h € 0.25.

Energy savings for the environment, cost savings for you. The diagram below shows at a glance how much you can save with an AquaMax Eco Premium. **Here you have saved an amount equal to the purchase price!**

AquaMax Eco Premium 16000

Comparable pumps in the range of 14460 – 16000 l/h were tested at an application height of 1.5 m.

You save
up to
2188.00 €**
